Cleanburn Outdoor Fire Pit

NEW
For
2021!

All the Benefits of a Log Fire Pit Without the Smoke!

DOUBLE WALL DESIGN: This smokeless design increases the airflow and burning process. The bottom vents pull oxygen in, feeding the flames from below, while also traveling between the double walls causing the air to heat up.

EASY CLEAN ASH TRAY: The ash collects into the Ash Tray making cleanup a breeze! This separate ash tray will keep the embers and coals contained so they don't clog the airflow.

EASY ASSEMBLY: No tools required! Simply place the fire bowl onto the base ash tray and it is ready to use. Nests together for compact storage.

STAINLESS STEEL INTERIOR AND BASE: Durable stainless steel interior is rust resistant. No need to purchase a special type of wood, this works with standard wooden logs.
