floating nuts
x10

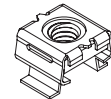

long box
extra large

wing nuts
x8

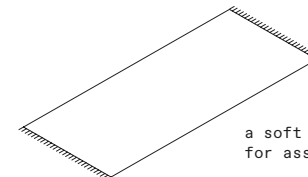

bolts
x22

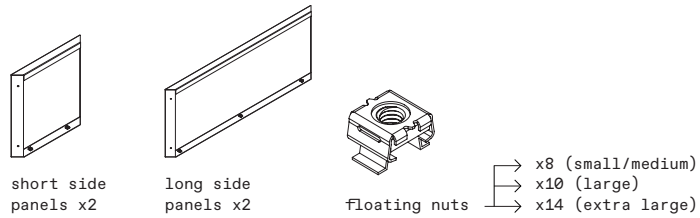

floating nuts
x14

not included

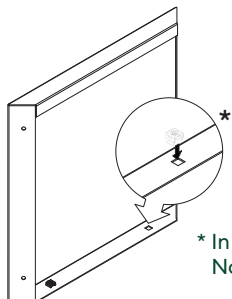

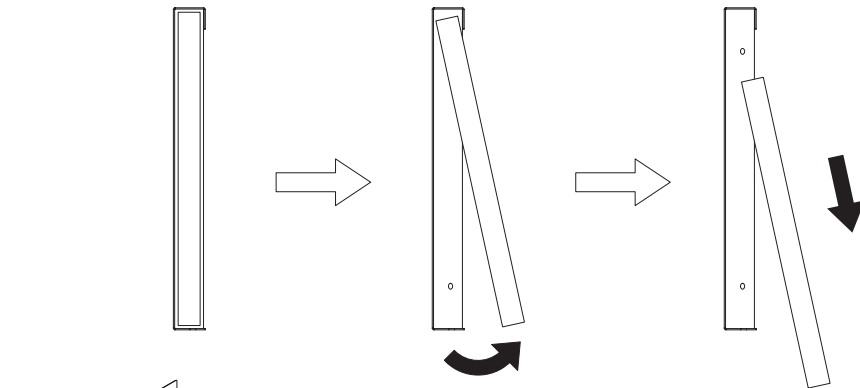

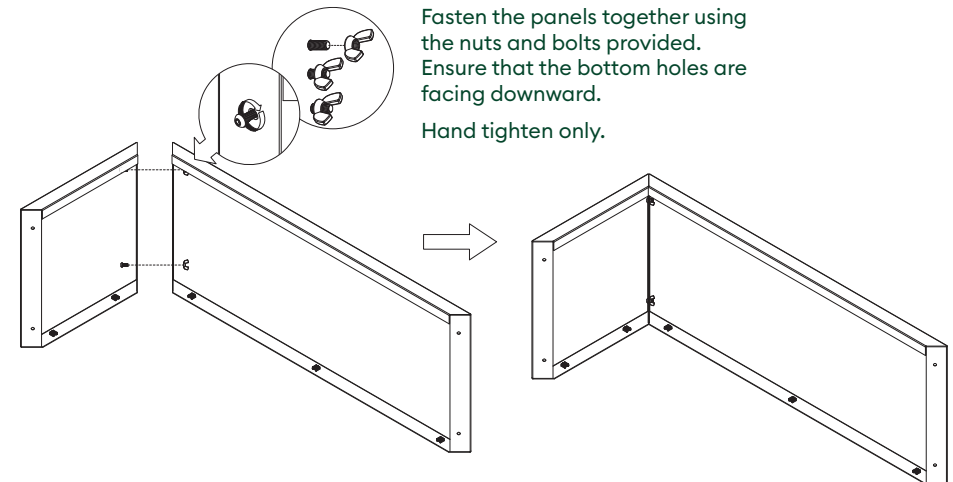

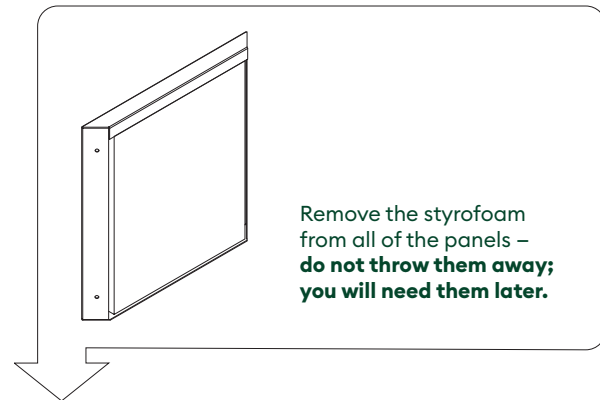

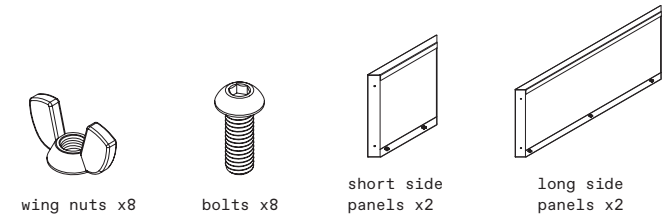

a soft working surface
for assembling your items

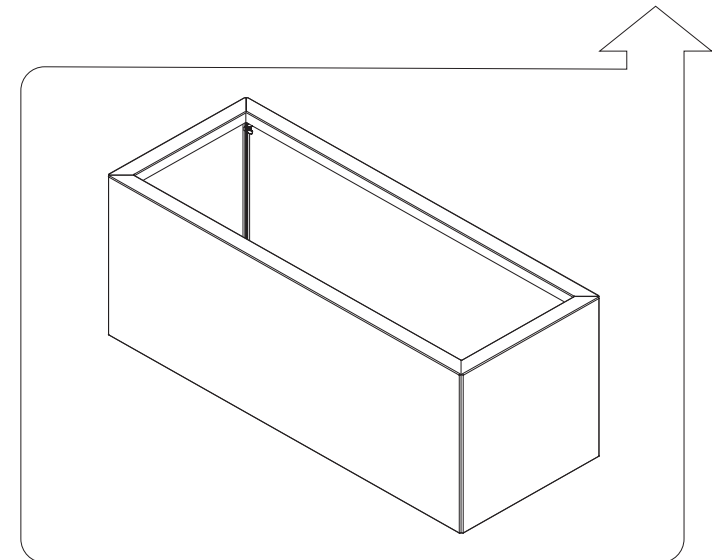

step 1

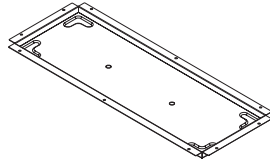

step 2

* In transit, the floating nuts may dislodge from the panels. No need to worry; they can be easily reinserted into place.

step 3

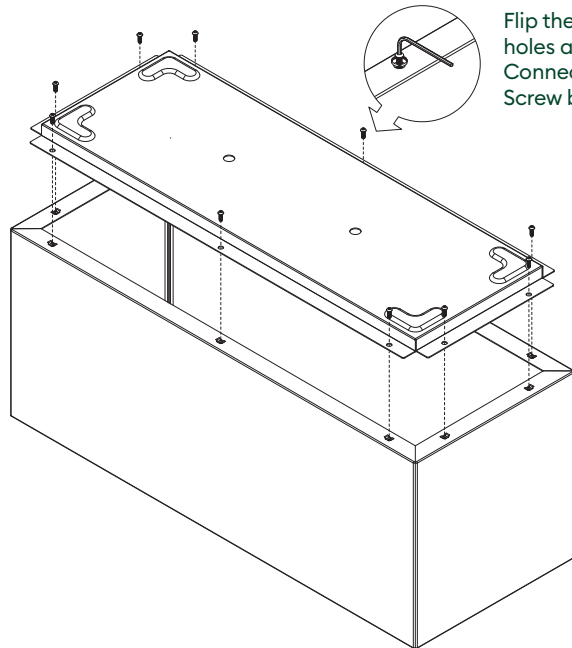

bottom panel x1

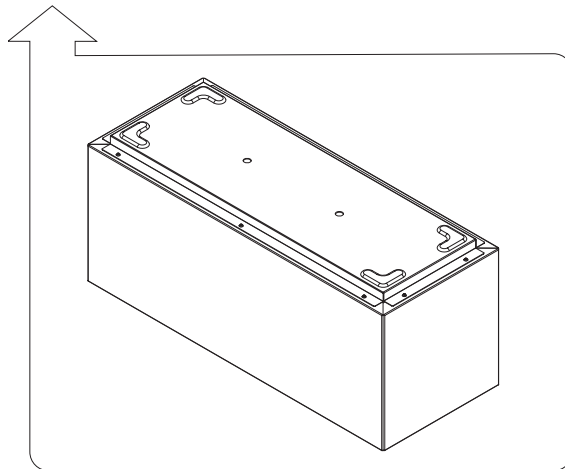

bolts

- x8 (small/medium)
- x10 (large)
- x14 (extra large)

Flip the body over so the bottom panel holes are facing up.
Connect the bottom panel to the main body.
Screw bolts into floating nuts and tighten.

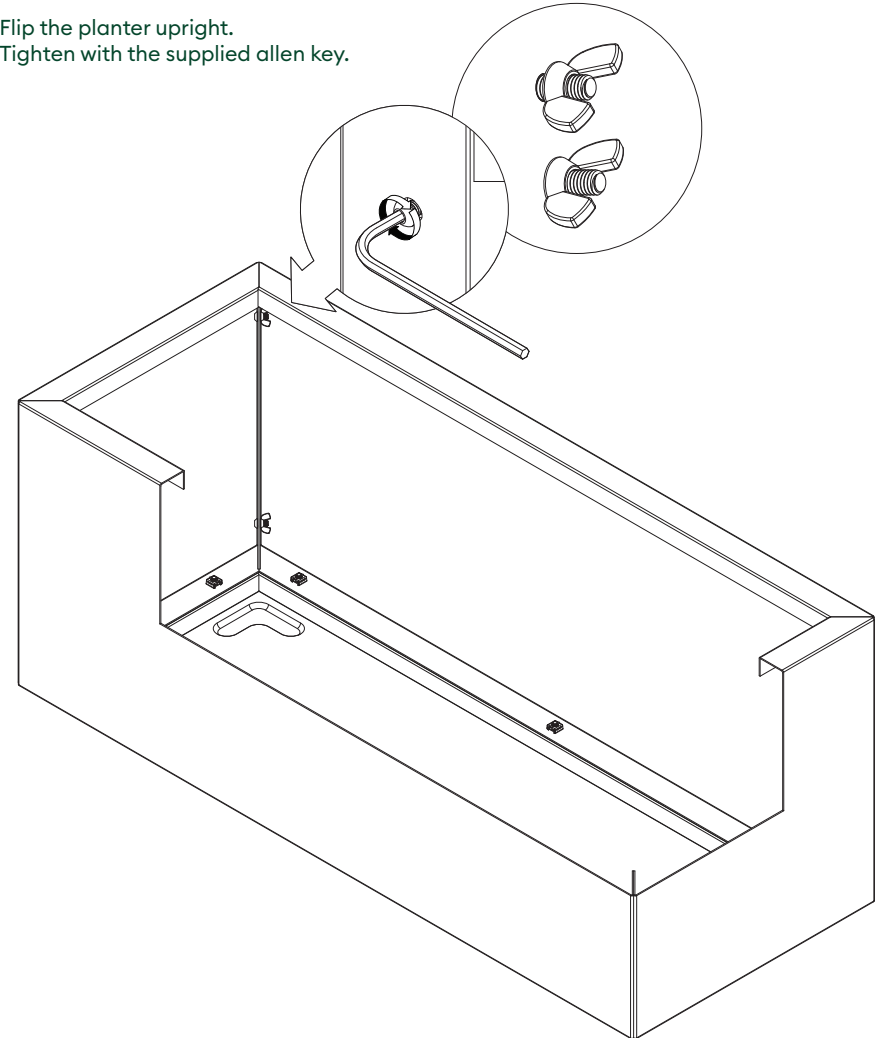

step 4

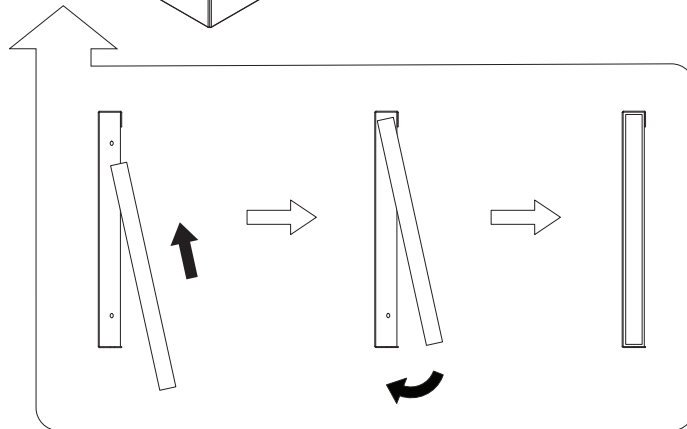

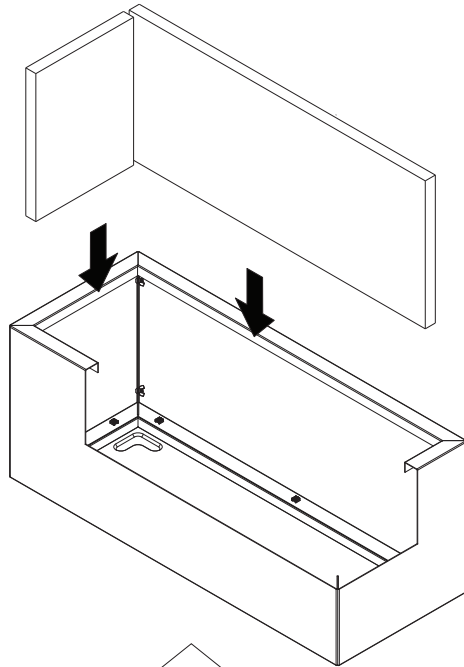

allen key x1

Flip the planter upright.
Tighten with the supplied allen key.

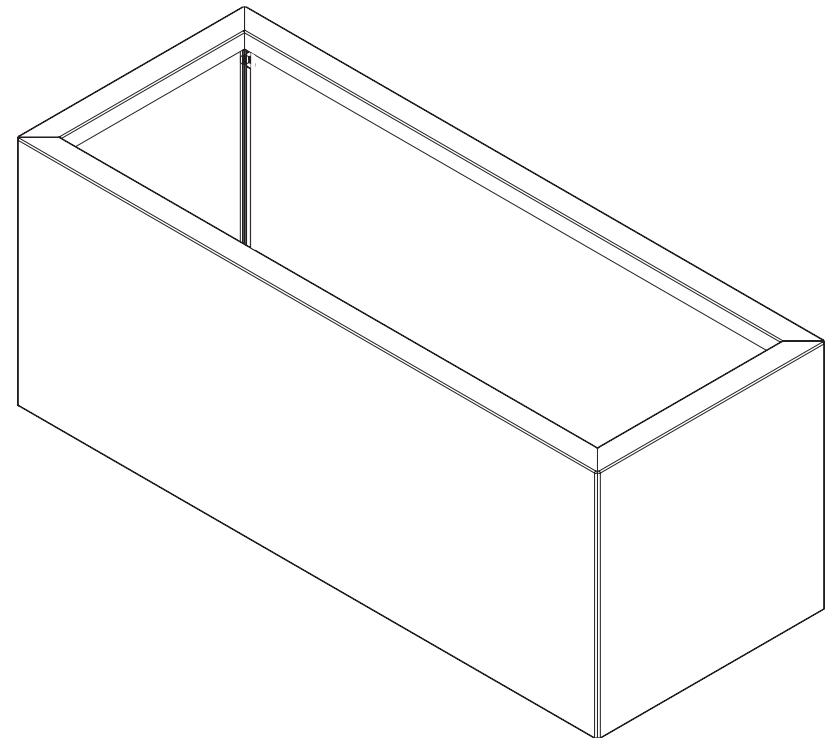

step 5

complete

You can now place the styrofoam back into the panels.
It will act as insulation against extreme heat and cold.

share your outdoor space with **#MYVERADEK**

meet the *family*

Hi! We're the Corten Steel Planter Series, and we make warming up your space easy. With clean, simple corners coated in rich, rusted hues, we add a cozy touch that makes your outdoor space feel right at home.

01 round bowl — 02 pedestal — 03 long box — 04 garden bed
— 05 cube — 06 span — 07 window box
