Chef Series Learning Tower®, Toddler Tower (Premium Charcoal Grey)

Description:

We believe a child's journey to learn and develop can be fun! We've created educational products that inspire, delight, and engage children's interest in learning and also promote child and parent interaction.

Like the Original Learning Tower®, the Chef Series Learning Tower® has been carefully designed to provide a secure environment for a child's imagination to be stimulated and blossom. Its design nurtures a child's innate desire to be independent and to participate alongside his or her parents and siblings.

Additionally, the Chef Series Learning Tower® includes a plexi-glass panel for writing recipes and creative opportunities! Children will also love the addition of an Activity Board or Learn and Share Easel on the outside of the tower so they can engage and learn developmental skills.

Get more out of your Chef Series Learning Tower® by adding on one of our accessories. Accessories available include Playhouse Kits , Learn and Share Easels, and Learn 'N Discover Activity Boards.
