

Step by Step Assembly Instructions:

*Safety Precautions:

1. Turn off the power at the main electrical service box before starting installation.
2. Electrical connections must comply with local code ordinances or national electrical codes.

Installation Steps:

1. Connect the chain to the fixture loop and feed the wires through the chain to your desired length.
 - A general rule is the bottom of the fixture should be 30 inches from a tabletop or 9 feet from the floor for a foyer fixture.
2. Feed wires through upper connector loop and nut.
3. Unscrew the upper connector loop nut and slide down chain.
4. Slip canopy over wires, upper connector loop and slide down chain.
5. Attach mounting bracket to upper connector loop using threaded pipe and nuts provided.
6. Ensure the electrical box in the ceiling can carry the weight of your fixture. It may need extra support. If you are unsure, please contact a qualified electrician. If the box is secure, please proceed by attaching the mounting bracket to the electrical box using the crews provided.
7. Connect the ground wire to the electrical box. Connect the white wire from the ceiling to the identified conductor. Connect the black wire from the ceiling to the non-identified conductor from the chandelier.
8. Slide canopy and upper loop nut up the chain to cover the electrical box ensuring all wires are tucked inside and not pinched between canopy and ceiling.
9. Secure the canopy using the upper connector loop nut.
10. Install proper type wattage of bulb as per label on socket or socket ring (you should not touch the hardware part in case of electric shock)
