INSTALLATION

Tools:

Adjustable Wrench

Plumbers Putty

Teflon Tape

Rags

Model Number: 2LG100, 2LG100B, 2LG110, 2LG240

Warnings and Notes:

Check with local plumbing code requirements before installation.

This product should be installed by a local listed plumber.

Do not use plumbers putty on threads.

Installation Steps:

Two Handle Kitchen Faucet

(1) Shut off water supplies. Remove old faucet. Clean mounting surface in preparation for new faucet.

(2) Apply plumbers putty under the base gasket, with base gasket on the bottom of deck plate, place faucet in position on the sink. Slide washers on shanks and secure the locknut to the shanks from underneath the sink.

(3) when using stainless steel braided faucet supply hose; this faucet requires one end of the supply hose to have a 1/2" female IPS connection. The other end of this supply hose must match the thread on the water supply valve under your sink. Once you've identified the required size, carefully follow the manufacturer's installation instructions for each hose.

(4) Important: After installation is complete, remove aerator. Turn water supplies on and allow both hot and cold water to run at least one minute each. While water is running, check for leaks. Turn off water and replace aerator.
