

TOUCH OF ECO®

INSTRUCTIONS

PACKAGE INCLUDES:

- 2 Solar Candles
- 2 Pre-installed AAA Rechargeable Batteries
- 2 Locking Suction Cups
- 1 Instruction Sheet

HOW TO OPERATE:

The settings switch is located on the left side of the battery pack and has 3 settings...

1. **ON (left setting)** - For “ON” mode: the LED will automatically illuminate at night (when light is not detected).
2. **OFF (middle setting)** - For “OFF” mode: the LED will not illuminate.
3. **FLICK (right)** - For “FLICK” mode: the LED will automatically illuminate at night (when light is not detected).

HOW TO MOUNT:

Choose a window that receives at least 6-8 hours of direct sunlight. Make sure that the window is clean. Dampen the suction cup to make sure it sticks. Turn the device to the desired position (On or Flick). This will allow the CAROLITE to charge during the day and light up automatically at night. Mount the CAROLITE to window by pressing the suction cup located above the solar panel/battery pack flush against the window and pushing the lever located behind the suction cup toward the window until secure.

Rechargeable battery may be replaced with a non-rechargeable battery if desired, however only the rechargeable battery will work with the solar panel and should be used at all times unless the panel is not getting enough sunlight to charge the battery.

IMPORTANT:

Please note that the light is designed to work in the dark. If there are strong light sources nearby, then the LEDs may be very dim or not work at all. Although the manufacturer has charged the battery, the charge levels will have decreased when you receive it. Please charge it for a full day to optimize performance. The surface of solar panel must be kept clear, if not, this will influence the efficiency of charging.

LIMITED WARRANTY

New Product Solutions and Touch Of ECO warrants to the original consumer purchaser that this Touch Of ECO product will be free from defects in workmanship and material under normal consumer use during the applicable warranty period identified on www.touchofeco.com, subject to the exclusions set forth below. We will not assume, nor authorize any person to assume for us, any other liability in connection with the sales of our products.

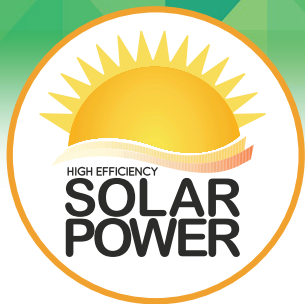

EXCLUSIONS

Touch Of ECO warranty does not apply to (i) any product that is misused, abused, modified, damaged by accident, or used for anything other than normal consumer use as authorized in Touch Of ECO's then-current product literature, or (ii) any product purchased through an online auction house. Power and strength of LEDs will vary and is dependent upon both region and product placement.
