

Kräus®

INSTALLATION MANUAL

Oletto™ Sensor Commercial Pull Down Kitchen Faucet

KSF-2631

Congratulations on the purchase of your new Kraus® plumbing fixture!

Please keep the box and packaging materials until your product is completely installed. If you have any questions, require technical assistance or have any problems with your product:

DO NOT RETURN TO STORE

**Please contact our Customer Service Team
1-800-775-0703 / customerservice@kraususa.com**

Have the model number available and retain a copy of your receipt with purchase date for reference.

If for any reason this product does not meet your expectations, please be sure to repack this product in the original box and packaging material to avoid damage during transit.

Prior to Installation:

- Make sure you have all necessary parts by checking the diagram and parts list. If any part is missing or damaged, please contact Kraus[®] Customer Service at 800-775-0703 for a replacement.
- Read all instructions and safety warnings and ensure you have all tools, parts, and equipment necessary for a safe installation.
- Turn off the hot and cold water supply at the angle stops and turn on the old faucet to release any built up pressure. Remove existing faucet.
- Pre-drilled hole size requirement: 1 3/8" (min)
- Max countertop thickness: 3 1/8"

For technical assistance or replacement parts, please contact Kraus Customer Service and one of our representatives will be happy to help:
Toll-Free: 800-775-0703 or Customerservice@kraususa.com

Tools Required

Care & Maintenance

* To keep the product clean & shining, follow the steps below:

1. Rinse with clean water & dry with a soft cloth
2. Do not clean with soaps, acid, polish, abrasives or harsh cleaners
3. Do not use cloth with a coarse surface
4. Unscrew the aerator and clean when necessary

* This installation manual is subject to change without further notice.

I. Sensor Control Box
 J. Brass Check Valve
 K. Battery Pack
 K1. Battery Pack
 K2. Screw
 K3. Anchor
 L. Battery
 M. 6mm Hex Wrench
 N. 2.5mm Hex Wrench

Faucet Dimensions

Installer Tip:

Shut off main water supply before installing new faucet.

Step 1a: Installing the easy install assembly (without escutcheon)

Shut off the water supply. Remove the old faucet. Clean the mounting surface. Check for the proper thickness of the sink. Insert the base (a) into the sink. If your model does have a escutcheon, skip to step 1 b.

NOTE: "Front" on the base (a) must face the front of the sink. The two mounting plates (b) on the base (a) must be loose and movable during the installation of the base (a).

Step 1b: Installing the easy install assembly (with escutcheon)

Place the escutcheon (C) and the gasket (D) on the sink. Insert the base (a) into the escutcheon (C). **NOTE:** "Front" on the base (a) must face the front of the sink. The two mounting plates (b) on the base (a) must be loose and movable during the installation of the base (a). If the sink is uneven, use silicone under the gasket (D).

Step 2: Installing the easy install assembly

Press the base (a) and escutcheon (C) so that they can not move, then turn the screws with the provided hex wrench (M, HEX: 6.0mm) clockwise, as shown Fig 1. When the mounting plates (b) make contact with the sink (1), continue to turn the screw with the provided hex wrench (M, HEX: 6.0mm) clockwise, as shown Fig 2, until the base (a) is completely tightened and secured, as shown Fig.4.

Step 3: Installing the faucet

Insert the hose (1), supply lines (2) and quick connect hose (3) one by one through the hole of the base (a). Carefully insert the hoses into the base. Place the faucet assembly onto the base (a) as shown in the above figure. Secure the faucet assembly (B) by tightening the set screw with the provided hex wrench (N, Hex: 2.5 mm).

Step 4: Installing the sensor control box

Install the data cable (1) to the control box connection (2). Ensure the arrows on the data cable and control box connection are aligned to one another to ensure proper installation. Ensure they are tightly connected by firmly pushing together. Secure the connection by hand tightening the nut (3) in a clockwise direction onto the threaded sensor cable.

CAUTION: If the connections are not made properly, the sensor feature will not work.

Step 5: Installing the sensor control box

Connect the hose (1 & 2) to the connector (3 & 4) on the control box (5). Push firmly together until they snap into place.

Step 6: Installing the counterweight

Install the weight clip (G) at the point of the hose marking "weight here". Insert the weight (F) onto the weight clip (G) by sliding it down onto the weight clip (G).

Step 7: Installing the battery pack

To open the battery housing, squeeze the tabs (1) on the cover (2), then remove the cover (2). Install the four AA batteries (3) included by matching the positive (+) and negative (-) ends on the battery (3) to the (+) and (-) markings in the battery pack (4). The negative ends of the battery (3) should always connect to the spring end of the battery slots in the battery pack (4). Reinstall the battery pack cover (2) by pushing up and snapping into place.

NOTE: When the sensor flashes 10 times continuously and slowly, the batteries have lost their charge. Replace the batteries (3).

Step 8: Installing the battery pack

Drill a hole in the wall using a 6mm (1/4 in.) diameter drill bit. Install the battery pack (K1) using the molly anchor (K3) and screw (K2) provided. Insert the battery pack cable (1) into the control box connection (2).

NOTE: After installing the battery pack, the light on the sensor will flash and the faucet will sound when you move your hand in the sensor area. If not, check to ensure the batteries are installed correctly.

Step 9: Connect waterlines to main valve

Before connecting waterlines to main valve, attach brass check valves (J) to angle stops (not included), then connect waterlines to brass check valves (J) and tighten until snug. Turn on angle stops and check for leaks (**DO NOT TURN FAUCET ON**).

NOTE: Please make sure filter washers are installed before connecting to the main valve.

Step 10: Flush faucet

Flushing and checking for leaks: After the installation is complete, unscrew and remove the spray head in order to flush the line. Turn on the water supply and allow both hot and cold water to run for at least one minute each. This flushes away any debris that could cause damage to internal parts. Check for leaks. Reattach the spray head. Do not lose the gasket (1) in the hose.

NOTE: Please make sure washer (1) is installed attaching spray head to hose.

Operating the sensor: Turn the handle (2) away from the faucet to the full on position. Turn the water on by activating the sensor (3) by waving your hand within 6cm of the sensor. Move the handle towards you and away from you, the water flow pattern can be switched from hot water to cold water. If the sensor does not work, then you can refer to the troubleshooting. If you want to use the faucet without the sensor feature, then you can refer to troubleshooting 5. Then, turning on the water can be done by moving the handle away from the faucet to the full on position.

NOTE: The sensor is active only when the handle is in the ON position. As a water saving feature, the water will turn off automatically after 3 minutes of continuous flow.

Replacement Parts

Replacement Parts List	Finish / Color	Part #
1. Spray Head	SFS, MB, SFACB**	KP27250
2. Washer		KP27251
3. Sprayer Hose	BLMB, GRSFS, BLSFACB*	KP27252
4. Spring Assembly	SFS, MB, SFACB**	KP27253
5. Inverter	BL, GR**	KP27254
6. O-ring		KP27255
7. Inverter	BL, GR**	KP27256
8. Cartridge		KP27257
9. Bonnet Nut		KP27258
10. Cap	SFS, MB, SFACB**	KP27259
11. Handle	SFS, MB, SFACB**	KP27260
12. Set screw		KP27001
13. Cover Button	BL, GR**	KP27002
14. Escutcheon	SFS, MB, SFACB**	KP27261
15. Block		KP27073
16. O-ring		KP27092
17. Easy Install Assembly		KP27262
18. Filter Washer		KP27248
19. Weight & Clip Assembly		KP27236
20. 2.5mm Hex wrench		KP27020
21. 6mm Hex wrench		KP27263
22. Quick connector assembly		KP27294
23. Control Box		KP27186
24. Battery Housing		KP27188
25. IN Connector		KP27190
26. Filter Washer		KP27189
27. OUT Connector		KP27191
28. AC Adapter		KP27187
29. Brass Check Valve		KP27323

*Denotes spray hose assembly color options:
 Spray hose assembly color options:
 Black hose w/ Matte Black connector (BLMB);
 Gray hose with Spot-Free Stainless connector (GRSFS);
 Black hose with Spot-Free Antique Champagne Bronze (BLSFACB);

**Denotes faucet component color options:
 SFS - Spot Free Stainless Steel
 MB - Matte Black
 SFACB - Spot Free Antique Champagne Bronze
 GR - Grey
 BL - Black

Troubleshooting

If you have followed the instructions carefully and your faucet still does not work properly, take the following corrective steps:

Problem 1: Water will not shut off when turning the handle to the OFF position.

When you turn the handle to the full on position, the water will turn on.

But when you turn the handle to the full off position, the water does not turn off.

This indicates that the cartridge is damaged. Turn off the water supply, remove the handle and replace the cartridge (1).

Problem 2: The light on the sensor is flashing continuously.

If the handle is closed, turn the handle to the on position and move your hand in the sensor area. If the sensor flashes 10 times continuously and slowly, then replace the 4 "AA" batteries.

Problem 3: There is a low flow of water or LED indicator in the faucet body is not functioning.

- This could indicate that the washer in the control box is dirty or damaged. Remove the hose and unscrew the connector. Take out the washer from the control box. Clear the washer or replace the washer. Reassemble the connector and hose.
- The filter washers (18 & 26) are dirty. Turn off the water supply at the water valves and unscrew the hose connectors from the water supply lines. Clean the filter washers in the water lines with hot water, removing any debris or calcium build up.

Problem 4: The sensor is not activating the water flow.

When you turn the handle to the full on position, the water will turn on.

However, when you move your hand in front of the sensor, the water does not turn off as it should.

Check whether the switch button (1) is tight, if it is loose, tighten the switch button (1) completely with a coin clockwise. If the switch button (1) is tight, this indicates that the control box (2) is damaged. Call customer service to request a replacement control box. Replace the old control box with the new control box.

Problem 5: The function of the switch button.

If you want to use the faucet without the sensor feature, you can loosen the switch button completely with a coin counterclockwise. At this time, you can use the sensor faucet just like a regular kitchen faucet.

However, if you want to continue to use the faucet with the sensor feature, you need to tighten the switch button completely with a coin clockwise. At this time, you can use the faucet with the sensor feature.

Codes/Standards Applicable:

Faucet - Lifetime Limited Warranty

Kraus® USA Plumbing, LLC ("Kraus") extends this warranty to the original purchaser for personal household use of the Faucet when purchased from an authorized Kraus dealer and in the location of original installation. This warranty is non-transferable.

Kraus warrants the structure and finish of the Faucet to be free from defects in material and workmanship under normal usage for as long as the original purchaser resides in the residence in which the Faucet was first installed.

Kraus warrants the Faucet's sprayhead assembly (including the engine, aerators, structure, restrictors, back flow preventers, sprayer hoses, braided supply line hoses which encompasses nylon, silicon and stainless steel) of the product to be free from defects in material and workmanship under normal usage for a period of one (1) year from the date of purchase.

Kraus warrants the Faucet's cartridge to be free from defects in material and workmanship under normal usage for a period of five (5) years from the date of purchase.

Any product reported to the authorized dealer or to Kraus as being defective within the warranty period will be repaired or replaced with a product of equal value at the option of Kraus.

Commercial Warranty

Kraus USA Plumbing, LLC ("Kraus") warrants its Products for a period of one (1) year to commercial purchasers of Products used in industrial, commercial and business applications.

Care and Cleaning Instructions

Certain cleaning products may cause damage to a Product's finish and use of the following on the Product will void this warranty:

- Abrasive cleaners such as powders, bleach, ammonia, alcohol or chlorine
- Abrasive pads, steel wool or wire brushes

What is Not Covered

This warranty does not cover Products that were discontinued when purchased or display Products, whether such Products were purchased at discount outlets, unauthorized dealers, and/or sold on clearance. This warranty does not cover any free gifts included with purchase.

This warranty does not cover damage resulting from neglect, misuse (including use for an unintended application), abuse, carelessness, accident, hard water or mineral deposits, exposure to corrosive materials, improper maintenance, alteration of the Product, or failure to follow care, cleaning or installation instructions enclosed with your Product. Kraus recommends that all Kraus Products be installed by a fully licensed and insured trade professional with experience in the installation of bathroom and/or kitchen manufactured goods.

How to Make a Warranty Claim

If you are a **consumer purchaser**, please contact a Kraus® Customer Service Representative at:

Kraus USA Plumbing, LLC
12 Harbor Park Drive
Port Washington, NY 11050
Toll-free 800-775-0703
Customerservice@kraususa.com

Kraus USA Plumbing, LLC
12 Harbor Park Drive
Port Washington, NY 11050
516-801-8954
Partnersupport@kraususa.com

In requesting warranty service, please be ready to provide your proof of purchase and a description of the problem. Shipping charges will be covered for the first (1) year of the warranted replacement part or product (HI, AK, and Puerto Rico shipping charges may apply). International shipping fees are not included.

Limitation on Duration of Implied Warranties

Please note that some states/provinces (including Quebec) do not allow limitations on how long an implied warranty lasts, so the below limitations may not apply to you. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, ANY IMPLIED WARRANTY, INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY AND OF FITNESS FOR A PARTICULAR PURPOSE, IS LIMITED TO THE STATUTORY PERIOD OR THE DURATION OF THIS WARRANTY, WHICHEVER IS SHORTER.

Limitation of Special, Incidental or Consequential Damages

Please note that some states/provinces (including Quebec) do not allow the exclusion or limitation of special, incidental or consequential damages, so the below limitations and exclusions may not apply to you. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, THIS WARRANTY DOES NOT COVER, AND KRAUS USA PLUMBING, LLC SHALL NOT BE LIABLE FOR, ANY SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES (INCLUDING LABOR CHARGES TO REPAIR, REPLACE, INSTALL OR REMOVE THIS PRODUCT), WHETHER ARISING OUT OF BREACH OF ANY EXPRESS OR IMPLIED WARRANTY, BREACH OF CONTRACT, TORT, OR OTHERWISE.

This warranty gives you specific legal rights, and you may also have other rights which vary from state/province to state/province.
