

## Care and Maintenance of A19 Wall Sconces

### **BISQUE:**

Natural "bisque" (unpainted ceramic) fixtures can be cleaned by sanding with fine 150-grit sandpaper. Do not use liquid cleaners on the porous bisque surface.

### **PAINTING BISQUE:**

Painting your fixture is quite simple. You may use any basic acrylic or latex paint of your choosing. For the ease of clean-up, etc. water based paint (acrylic or latex) is recommended. Should you choose oil based paint (e.g., a can of spray paint), we recommend using an appropriate primer first; otherwise, a primer is not necessary.

### **FINISHES:**

A19's finishes are durable enough to hold up both indoors and out. The exterior surface can be dusted or wiped clean with a non-abrasive damp cloth or sponge.

### **EXTERIOR LOCATIONS:**

To prevent water from reaching the electrical connections, apply a bead of silicone around the full perimeter of the fixture housing to seal it to the wall surface.
