Garniture robinet seulement

Pieza exterior para válvula

Tools You Will Need / Outils dont vous aurez besoin / Herramientas necesarias

Adjustable Wrench

Clé à molette

Llave ajustable

Groove join pliers

Pince multiprise

Pinzas ajustables

SAFETY TIPS

- If you use soldering for the installation of the faucet, the seats, cartridges and washers will have to be removed before using flame. Otherwise, warranty will be void on those parts.
- Cover your drain to avoid losing parts.
- 0°C~55°C

CONSIGNES DE SÉCURITÉ

- Si vous posez le robinet par brasage, il est essentiel de retirer les sièges, les cartouches et les rondelles avant d'appliquer la flamme, faute de quoi la garantie sur ces pièces sera annulée.
- Couvrez le drain pour ne pas perdre des pièces.
- 0°C~55°C

CONSEJOS DE SEGURIDAD

- En el caso de utilizar soldadura para instalar el grifo, remueva los asientos, cartuchos y arandelas antes de usar la llama. De lo contrario, se anulará la garantía para esos componentes.
- Tape la boca del desagüe para prevenir la pérdida de piezas pequeñas.
- 0°C~55°C

INSTALLATION/INSTALLATION/INSTALACIÓN

This valve is designed to fit into a wall that is 2 7/8" to 3 7/8" from finished wall to the back of the valve. Extensions are shipped with the trim if necessary.

Turn off the water supplies. Install the valve so the finished wall will fit between the markers on the mud guard.

Using mounting holes secure the valve making sure the "UP" label outlet is on top.

If you are making a back-to-back installation (hot on right and cold on the left), install the back valve body as described in steps #5 – #6. If not, go to step #7. NOTE: Notice that the back valve has hot and cold indicators that will be opposite of the incoming supply lines.

Remove the cartridge and stem assembly. Notice that the outlet is at the top. Rotate the cartridge 180°. The outlet should be on the bottom.

Align the outlet on the bottom of the cartridge and push the cartridge into the valve. Make sure the cartridge is firmly installed into the valve body. Reinstall stem assembly with mud guard.

Warning

Connect valve body to water supplies using the proper fittings. Warning: avoid soldering at high temperature. Exposure to high temperature may damage the cartridge. Be sure stops and pressure balance cartridge are removed before soldering.

Connect the valve body to the shower outlet with the proper filling. Note: it is suggested that you anchor all water lines.

1. Pressure test and flush the valve.

- Prior to testing, remove mud guard, stem assembly, cartridge as stops as shown.
- Plug the shower outlet and check for leaks.
- After testing, flush system.
- Remove shower outlet plug. Re-install the stops, cartridge, stem assembly and mud guard.

2. Check for leaks.

Installation completed.

TROUBLESHOOTING / DÉPANNAGE / GUÍA DE SOLUCIONAR

If you've followed the instructions carefully and your faucet still does not work properly, take these corrective steps:

Si vous avez suivi attentivement les instructions et que votre robinet ne fonctionne toujours pas correctement, apporter les correctifs suivants.

Si usted ha seguido las instrucciones cuidadosamente y su grifo todavía no funciona correctamente, siga estos pasos correctivos.

Problem/Problème/Problema	Cause/Cause/Causa	Action/Correctif/Solución
Leaks underneath handle.	Retainer nut has come loose. O-ring is dirty or damaged.	Tighten the retainer nut. Clean or replace O-ring.
Fuites sous la manette.	L'écrou de fixation s'est desserré. Le joint torique est sale ou endommagé.	Serrer l'écrou de fixation. Nettoyer ou remplacer le joint torique.
Goteo debajo de la manija.	La tuerca de ajuste se ha aflojado. La arandela circular está sucia o dañada.	Apriete la tuerca de ajuste. Limpie o reemplace la arandela circular.
Aerator leaks or has an inconsistent water flow pattern.	Aerator is dirty or misfitted.	Unscrew aerator, remove any debris, check seating of rubber seal then re-assemble aerator.
Le brise-jet fuit ou la diffusion des jets qui s'en écoulent n'est pas uniforme.	Le brise-jet est mal ajusté ou sale.	Dévisser le brise-jet, le nettoyer, vérifier l'assise de la garniture en caoutchouc et remonter le brise-jet.
El aireador gotea o el chorro de agua está irregular.	El aireador está sucio o mal puesto.	Destornille el aireador, límpiolo, revise el asiento del empaque de goma, y vuelva a ensamblar el aireador.
