## To insert a cam lock: (Please read below instructions before assembling)

Diagram A

1. Insert cam screw into hole as shown in diagram A .

Diagram B

Make sure not to insert the cam screw:  
Too deep as shown in figure B as this will cause the cam screw to be misaligned and unable to interlock properly.

Diagram C

Also avoid inserting the cam screw too close to the surface of the hole as shown in figure C, as this will cause the cam lock to be too loose, and not interlock properly.

2. Connect the panels together.

ARROW SIGN

3. When inserting the cam lock make sure the arrow of the cam lock faces the cam screw.

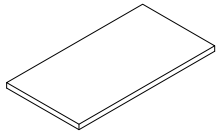

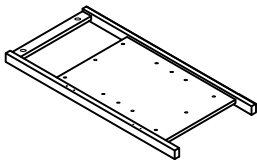

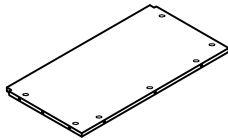

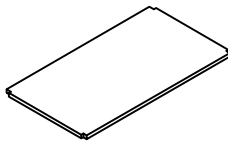

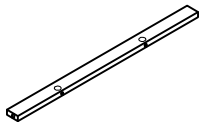

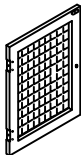

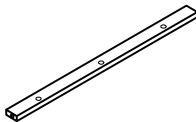

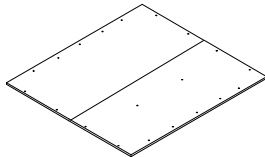

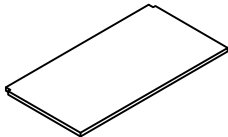

4. To tighten the cam lock turn the cam lock clockwise 90-180 degree or until the arrow is facing opposite the place cam lock was inserted.

**NOTE: DO NOT USE AN AUTOMATIC SCREWDRIVER TO TIGHTEN CAM LOCKS.**
