Island Display Rack (IDRx) Assembly Instructions

Required tools: IDR-AK - included with IDR and contains an 8mm Nut Driver and Alignment Tool
Electric Screw Driver with #2 Phillips Bit
2 X 14mm (or adjustable) Wrench

Hardware shown actual size

[†]IDR Extension packages contain only 1 IDRx-UPRIGHT and 2 footer pads.

1. Assemble frame - Thread footer pads into the bottom of the uprights. Lay down one upright and attach all three crossrails using the provided crossrail assembly screws in predrilled mounting holes. Do not fully tighten to allow for adjustments during assembly. Standing first upright up, attach second upright to crossrails.

2. Attach racks to frame - Using two base cradling racks, and starting on the left side of the assembled frame, align the mounting holes in racks with the holes on crossrails. Temporarily place alignment tool through center hole in first rack, crossrail and the center hole in second rack, as shown. Attach racks to crossrails as shown. After securing top and bottom of racks, remove alignment tool and replace with assembly screw. Repeat for each rack set, alternating between base and neck sets.

3. Assemble presentation rack – Position presentation racks back to back as shown. Using nut driver (included), a Phillips head screwdriver (not included) attach presentation racks with presentation rack assembly screws. Fully tighten.

4. Mount presentation rack to frame – Align presentation rack mounting plate to the mounting hole on upright. With the presentation rack assembly bolt, and washer, insert bolt through presentation rack and upright, complete with second washer, and nut. Tighten with 14mm open end wrench (not included). Repeat for second side.

5. Finishing steps – Fully tighten all screws (especially Crossrail Assembly Screws) and snap mounting hole covers in place. Fill with wine and enjoy!
