To insert a cam lock: (Please read below instructions before assembling)

1. Insert cam screw into hole as shown in diagram A .

Make sure not to insert the cam screw:
Too deep as shown in figure B as this will cause the
cam screw to be misaligned and unable to
interlock properly.

Also avoid inserting the cam screw too close to the
surface of the hole as shown in figure C, as this will
cause the cam lock to be too loose, and not interlock
properly.

2. Connect the panels together.

3. When inserting the cam lock make sure the arrow
of the cam lock faces the cam screw.

4. To tighten the cam lock turn the cam lock clockwise
