

WARNING: DISCONNECT POWER AT THE MAIN FUSE BOX BEFORE INSTALLATION.

WARNING:

This fixture is intended for installation in accordance with the National Electrical Code (NEC) and all local code specifications. If you are not familiar with code requirements, installation by a certified electrician is recommended.

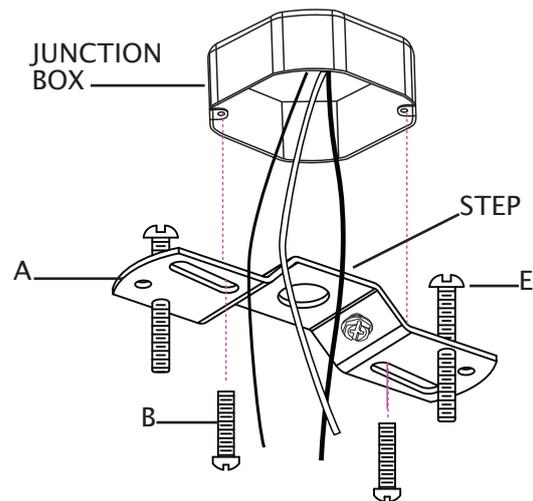

Before assembly, remove all parts and part packages from box. If anything is missing, please contact the retailer from which the product was purchased.

ANY QUESTIONS CALL: 800-613-3261
M-F 8:00AM-6:00PM ET

ITEM#: 1145-005

1. Carefully pull house wires out of junction box so house wires are easily accessible during installation.
2. Position mounting bracket (A) so step in center of mounting bracket (A) is pointing up. From top of mounting bracket (A) thread one fixture mounting screw (E) through hole at each end of mounting bracket (A).
3. Align slotted holes in mounting bracket (A) with each hole in junction box.
4. Thread one junction box screw (B) into each slot in mounting bracket (A) and into holes in junction box. Tighten junction box screws (B) to secure mounting bracket (A) to junction box. **CAUTION:** Ensure house wires are still easily accessible. **DO NOT** pinch wires between mounting bracket and ceiling.

5. Strip 3/4" of insulation from ends of fixture wires.
6. Slightly loosen ground screw on mounting bracket (A). Do not completely remove ground screw. Wrap house ground wire (copper) around ground screw, leaving enough ground wire to attach to fixture ground wire. Twist end of fixture ground wire and end of house ground wire together. Twist wire nut (C) onto ends of wires. Completely tighten wire nut (C). Reference chart below for correct wire connections.

Connect Supply (House) Ground Copper Wire to:

Bare Copper Wire or,

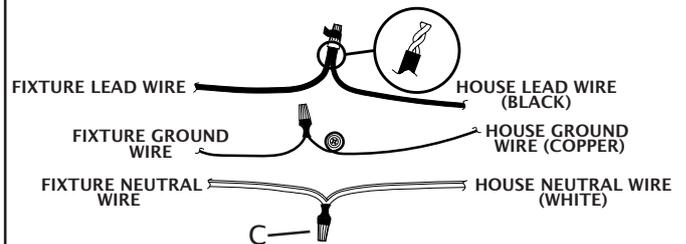

Bare Silver Wire or,

Green Insulated Wire.

7. Twist end of house lead wire (black) and end of fixture lead wire together. Twist wire nut (C) onto ends of wires. Completely tighten wire nut (C). Twist end of house neutral wire (white) and end of fixture neutral wire together. Twist wire nut (C) onto ends of wires. Completely tighten wire nut (C). Reference chart to the right for correct wire connections.
8. Wrap electrical tape (not included) around wire nuts (C) and wires. Ensure wires are securely fastened into wire nuts.
9. Carefully push all wires and wire nuts into junction box.

| Connect Black Lead Supply (House) Wire to: | Connect White Neutral Supply (House) Wire to: |
|--|--|
| Black Wire or, | White Wire or, |
| *Parallel Cord (Round and Smooth) or, | *Parallel Cord (Square and Ridged) or, |
| No printed words on wire insulation or, | Printed words on wire insulation or, |
| Insulated Wire (other than green) with Copper Conductor. | Insulated Wire (other than green) with Silver Conductor. |

*When parallel wire (SPT 1 & SPT 2) is used:
The lead wire is round in shape or smooth.
The neutral wire is square in shape or ridged.

10. The pointed bottom of fixture body (O) is a hinged door. Carefully release latch on door from fixture body (O) and allow door to open.
11. Carefully raise fixture up to ceiling. Place canopy (D) over mounting bracket (A). Slip holes in canopy (D) over ends of fixture mounting screws (E).
12. From inside fixture body, screw one threaded cap (F) onto end of each fixture mounting screw (E). Tighten threaded caps (F) to secure fixture to ceiling.
13. Screw recommended bulb (E26 Edison bulb type, not included) into socket. Verify correct bulb wattage marked on socket of fixture. **WARNING: DO NOT** exceed maximum bulb wattage.
14. Raise door to fixture body (O). Attach latch on door to fixture body (O).
