

MeacoDD8L ZAMBEZI DESICCANT DEHUMIDIFIER

The multi-award winning range of domestic dehumidifiers from British dehumidifier experts Meaco are now available in the USA and Canada

www.meacousa.com

WHY DESICCANT?

Desiccant dehumidifiers are different because they can work in all temperatures with a consistent performance **right down to 32°F!** Unlike compressor dehumidifiers there is no compressor (!) which means no refrigerant making them **greener, lighter and quieter than a compressor dehumidifier**. Meaco desiccant dehumidifiers are great for use in;

- Unheated spaces
- Garages for cars, bikes and tools
- RV, Boats and Campers
- Bedrooms
- Basements
- Crawl spaces
- And anywhere where a quieter, lighter dehumidifier would be useful

The Meaco DD8L Zambezi is top of the Meaco range with it's **six world firsts** moving one leading expert to say that it is **arguably the best domestic dehumidifier in the world**.

The digital display provides you with complete control over the feature rich controls which include;

- Fully variable humidistat for closer control
- Daily Run Timer plus On and Off Timer
- Energy use control
- Unique Meaco Control Logic and Meaco 20+ control
- Variable air deflector control
- Sterilising Ioniser to help clean the air
- Low energy Laundry mode feature to dry your clothes economically
- Child lock
- Anti-mould water tank coating
- Anti-spill cover on the water tank and anti-drip cover on the continuous drainage cover
- Class leading safety technology
- And an unique display of the Meaco Zambezi elephant to help you understand the room relative humidity.

Zambezi features the elephant because for each dehumidifier we sell **we donate £2 to the David Shepherd Wildlife Foundation** to help support their elephant orphanage in Zambia where the real Zambezi was saved.

All of the above great features are backed by **Meaco's two year parts and labour warranty**.

SPECIFICATIONS

Type of dehumidifier	Desiccant dehumidifier
World 1sts	6
Digital display	Yes
Humidistat	Variable 40 to 70%rh
