INSTALLATION INSTRUCTIONS

1. Determine where you wish to mount your rack. Make sure you locate your wall studs if you want to mount into solid wood. You will want to use a level (not included) to make sure that the rack is level. You may not be able to mount both ends to a wall stud as they are typically spaced at 16". If it is not convenient to hang your rack directly into a wall stud you may use the included DRYWALL anchors enclosed with your rack. See Toggler® brand manufacturer recommendations for weight limits included in the instructions in the Toggler kit.
2. Hold the bar against the wall in its desired location, mark the mounting holes. If installing into solid wood, you may want to pre-drill holes. Install the 1 1/2" wood screws directly into the wall studs through the holes on the wall rack (or use the toggle instructions for drywall mount).

WARNING: It is important that your utensil bar is assembled correctly. If the unit is assembled or used incorrectly, it could become unstable and collapse, possibly causing injury.
