

Comfort, Quality & Style Since 1998

FireSense®

Pyramid Heater

Item#: 60523/62263

DANGER

FOR YOUR SAFETY:

If you smell gas:

1. Shut off gas to the appliance.
2. Extinguish any open flame.
3. If odor continues, keep away from the appliance and immediately call your gas supplier or fire department.

WARNING

Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance. An LP-cylinder not connected for use shall not be stored in the vicinity of this or any other appliance.

DANGER

DANGER indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.

WARNING

Improper installation, adjustment, alteration, service or maintenance can cause property damage, injury or death. Read the installation, operation and maintenance instructions thoroughly before installing or servicing this equipment.

DANGER

Failure to comply with the precautions and instructions provided with this heater can result in death, serious bodily injury and property loss or damage from hazards of fire, explosion, burn, asphyxiation, and/or carbon monoxide poisoning. Only persons who can understand and follow the instructions should use or service this heater.

WARNING

FOR OUTDOOR USE ONLY!

WARNING

This product can expose you to chemicals including Lead, Chromium (hexavalent compounds), Di(2-ethylhexyl) phthalate (DEHP) and Diisononyl phthalate (DINP), which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, go to www.P65Warnings.ca.gov.

This manual contains important information about the assembly, operation and maintenance of this patio heater. General safety information is presented in the first few pages and is also located throughout this manual. Keep this manual for future reference and to educate new users of this appliance. This manual should be read in conjunction with the labeling on the appliance. Safety precautions are essential when any mechanical or propane-fueled equipment is involved. These precautions are necessary when using, storing, and servicing. Using this appliance with the respect and caution demanded will reduce the possibilities of personal injury or property damage. The symbols shown on page 3 are used extensively throughout this manual. Always heed these precautions, as they are essential when using any mechanical or propane-fueled equipment.

 **DANGER**

EXPLOSION—FIRE HAZARD

- Keep solid combustibles, such as building materials, paper, or cardboard a safe distance away from the heater as recommended by the instructions.
- Provide adequate clearances around air openings into the combustion chamber.
- Never use the heater in spaces which do or may contain volatile or airborne combustibles, or products such as gasoline, solvents, paint thinner, dust particles, or unknown chemicals.
- During operation, this appliance can be a source of ignition. Keep heater area clear and free from combustible materials, gasoline, paint thinner, cleaning solvents and other flammable vapors and liquids. Do not use heater in areas with high dust content. Minimum heater clearances from combustible materials: 3 feet/36 inches from top and 2 feet/24 inches from sides.
- Never store propane near high heat, open flames, pilot lights, direct sunlight, other ignition sources, or where temperatures exceed 120° F (49° C).
- Propane vapors are heavier than air and can accumulate in low places. If you smell gas, leave the area immediately.
- Never install or remove a propane cylinder while the heater is lighted, near flame, pilot lights, or other ignition sources or while heater is hot to the touch.
- This heater is red hot during use and can ignite flammables too close to the burner. keep flammables at least 3 feet/36 inches) from top and 2 feet/24 inches from sides. keep gasoline and other flammable liquids and vapors well away from heater.
- Store the propane cylinder outdoors in a well-ventilated space out of the reach of children. Never store the propane cylinder in an enclosed area (house, garage, etc.). If heater is to be stored indoors, disconnect the propane cylinder for outdoor storage.

 **WARNING:**
FOR OUTDOOR USE ONLY

 **CARBON MONOXIDE HAZARD**

This appliance can produce carbon monoxide which has no odor. Using it in an enclosed space can kill you. Never use this appliance in an enclosed space such as a camper, tent or home.

 **DANGER**

CARBON MONOXIDE HAZARD

- This heater is a combustion appliance. All combustion appliances produce carbon monoxide (CO) during the combustion process. This product is designed to produce extremely minute, non-hazardous amounts of CO if used and maintained in accordance with all warnings and instructions. Do not block the air flow into or out of the heater.
- Carbon Monoxide (CO) poisoning produces flu-like symptoms, water eyes, headaches, dizziness, fatigue, and possibly death. You can't see and you can't smell it. It is an invisible killer. If these symptoms are present during operation of this product, get fresh air immediately!
- For outdoor use only.
- Never use inside house or other unventilated or enclosed areas.
- This heater consumes air (oxygen). Do not use in unventilated or enclosed areas to avoid endangering your life.

 **WARNING**

BURN HAZARD

- Never leave heater unattended when hot or in use.
- Keep out of reach of children.

 **WARNING**

WARNING indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.

 **WARNING**

Certain materials or items, when stored under the heater, will be subject to radiant heat and could be seriously damaged.

 **CAUTION**

CAUTION indicates an imminently hazardous situation which, if not avoided, may result in minor or moderate personal injury, or property damage.

 **CAUTION**

SERVICE SAFETY

- Keep all connections and fittings clean. Make sure propane cylinder valve outlet is clean.
- During set up, check all connections and fittings for leaks using soapy water, never use a flame to check for leaks.
- Use as a heating appliance only. Never alter in any way to use with any device.

 **WARNING**

- This product is fueled by propane gas. Propane gas is invisible, odorless, and flammable. An odorant is normally added to help detect leaks and can be described as having a "rotten egg" smell. The odorant can fade over time so leaking gas is not always detectable by smell alone.
- Propane gas is heavier than air and leaking propane will sink to the lowest level possible. It can ignite by ignition sources including matches, lighters, sparks or open flames of any kind many feet away from the original leak. Use only propane gas set up for vapor withdrawal.
- Store and use propane gas in compliance with local ordinances and codes or with ANSI/NFPA 58. Always turn off propane when not in use.
- Alert children and adults to the hazards of high surface temperatures. Stay away from these surfaces to avoid burning skin or igniting clothing.
- Carefully supervise young children when in the vicinity of the heater.
- Do not hang clothing or any other flammable materials from the heater, or place near the heater.
- Replace any guard or protective device removed for servicing the appliance prior to placing back in service.
- Installation and repair should be done by a qualified service person. The heater should be inspected before each use, and annually by a qualified service person. More frequent cleaning may be required as necessary. It is imperative that the control compartment, burners, and circulating air passageway of the appliance be kept clean.

PACKAGE CONTENTS

PART	DESCRIPTION	QTY
1	Reflector	1
2	Emitter Screen w/ Reflector Hardware)	1
3	Glass Flame Tube	1
4	Guard Bracket	4
5	Protection Guard	4
6	Upper Support	4
7	Middle Plate (Plate Cover is pre-assembled to Middle Plate)	1
8	Base Panel (2 side panels with vents, 1 back panel without vents)	3
9	Bracket w/ Chain	1
10	Handle	1
11	Lower Support	4
12	Control Box	1
13	Wheels	2
14	Tank Bracket	3
15	Door Panel	1
16	Bottom Plate	1

HARDWARE CONTENTS

17
Rubber Ring
Qty: 1

18
Screws
Qty: 66
*Pre-assembled in
respective eyelets*

19
AA Battery
Qty: 1

PREPARATION

Before beginning assembly of this appliance, make sure all parts are present. Compare all parts with package contents list and hardware contents as listed on page 4 of this manual. If any part is missing or damaged, do not attempt to assemble this product. Contact customer service for replacement parts.

ESTIMATED ASSEMBLY TIME: 60 minutes

Tools Required for Assembly (NOT included):

- Phillips screwdriver w/medium blade
- Adjustable crescent wrench

1 Attach the **Wheels 13** to the **Bottom Plate 16** using the hardware pre-assembled with the **Wheels**.

Hardware Used: 8x Bolts and Nuts (*pre-assembled*)

2 Locate the **Tank Brackets 14** and attach them to the **Bottom Plate 16** using the Bolts provided with the Brackets. Secure each Bolt beneath the **Bottom Plate** using the provided Nut.

Hardware Used: 3x Bolts and Nuts
(*pre-assembled to Brackets*)

3 Assemble the lower frame. Remove the **Screws 18** pre-assembled in their respective eyelets. Align the eyelets at the bottom of one of the **Lower Supports 11** with the eyelets at the corners of the **Bottom Plate** and **Middle Plate** using the **Screws** removed earlier.

Hardware Used: 20x Screws

4 Use the **Screws 18** pre-assembled in their respective eyelets to connect **Upper Supports 6** to the **Lower Supports 11** and to fix the **Emitter Screen** between the **Upper Supports**.

Hardware Used: 12x Screws

5 Unscrew the igniter button on the **Control Box 12** and insert the included **AA Battery 19** with the **POSITIVE** end facing out. Then attach the **Control Box** underneath the **Middle Plate 7** with the pre-assembled **Screws 18**.

Hardware Used: 1x AA Battery
4x Screws

6 Carefully install the **Glass Flame Tube 3**: place the **Rubber Ring 17** around the lower rim of the **Glass Flame Tube**. Place the tube by guiding it up to insert the upper end through the center hole in the plate on the bottom of the **Emitter Screen**. Do not force the tube. Slide the bottom end into place and settle it into the hole in the Plate Cover on the **Middle Plate 7**. Ensure that the **Glass Flame Tube** is positioned properly to cover the center hole of the **Middle Plate**.

Hardware Used: 1x Rubber Ring

7 Peel blue protective film off of the **Reflector 1**. Remove **Wing Nuts** from Studs in the top of the **Emitter Screen**.

Screw Studs into holes in **Emitter Screen 2**.

Slide **Reflector** over the Studs and screw on **Wing Nuts** to secure **Reflector**.

Hardware Used: *(pre-assembled in Emitter Screen)*

3x Studs

3x Wing Nuts

8 Attach the **Protection Guards 5** to the Upper Frame by inserting the hooks at the edges of the guards into the holes on the supports. Secure the **Protection Guards** to the top of the supports with the **Guard Brackets 4** and screw in place.

Hardware Used: 4x Screws

- 9** Remove blue protective film from all panels before installation.
 Attach the **Base Panels 8** using the pre-assembled **Screws 18**.

Note: SIDE panels have ventilation holes while BACK panel has no vents. Do not cover the front, where the control knob is.

Hardware Used: 12x Screws

- 10** Screw the **Handle 10** onto the **Door Panel 15**. Install the **Front Panel** by inserting the two tabs at the bottom into the holes on the front of the **Bottom Plate 16**. Attach the **Chain 9** between inside of the door handle and the front of the **Control Box 12**, then close the panel. The panel secures with magnets.

Note: The chain is used to support the door panel while operating the controls.

11 When installing an LPG cylinder, it may be easier to remove the Door Panel completely and set aside. Place the cylinder on the **Bottom Plate**. Secure using the horizontal **Bolts** in the vertical side of each **Tank Bracket** to prevent the cylinder from shifting. Connect the gas hose to 20lb LPG cylinder (not included). Screw the regulator to the cylinder. Tighten securely.

NOTE: The regulator with gas hose is supplied.

12 Your Patio Heater is complete and ready to enjoy!

LEAK TEST

1. Make 2-3 oz. of leak test solution (one part liquid dish washing detergent and three parts water).
2. Apply several drops of solution where hose attaches to regulator.
3. Apply several drops of solution where regulator connects to cylinder.
4. Make sure all patio heater valves are OFF.
5. Turn cylinder valve ON.

WARNING

- Perform all leak tests outdoors.
- Extinguish all open flames.
- NEVER leak test when smoking
- Do not use heater until all connections have been leak tested and show no signs of leakage.

IF BUBBLES APPEAR AT ANY CONNECTION, THERE IS A LEAK.

1. Turn cylinder valve OFF.
2. If leak is detected at hose/regulator connection, tighten connection and perform another leak test. If bubbles continue to appear, call our customer service hotline at **(866) 985-7877**, 9 a.m. – 9 p.m., EST.
3. If leak is detected at regulator/cylinder valve connection, disconnect, reconnect, and perform another leak test. If you continue to see bubbles after several attempts, cylinder valve is defective. Call our customer service hotline at **(866) 985-7877**, 9 a.m. – 9 p.m., EST.

IF NO BUBBLES APPEAR AT ANY CONNECTION, THE CONNECTIONS ARE SECURE.

Note: Whenever gas connections are loosened or removed, you must perform a complete leak test.

WARNING: **FOR OUTDOOR USE ONLY**

CARBON MONOXIDE HAZARD

This appliance can produce carbon monoxide which has no odor. Using it in an enclosed space can kill you. Never use this appliance in an enclosed space such as a camper, tent or home.

Caution: Do not attempt to operate this appliance until you have read and understand all Safety Information in this manual and all assembly is complete and leak tests have been performed.

BEFORE TURNING GAS SUPPLY ON:

1. Your heater was designed and approved for **OUTDOOR use only**. Do NOT use it inside a building, garage, or any other enclosed area.
2. Make sure surrounding areas are free of combustible materials, gasoline, and other flammable vapors or liquids.
3. Ensure that there is no obstruction to air ventilation. Be sure all gas connections are tight and there are no leaks.
4. Be sure the cylinder cover is clear of debris. Be sure any component removed during assembly or servicing is replaced and fastened prior to starting.

BEFORE LIGHTING:

1. Heater should be thoroughly inspected before each use, and by a qualified service person at least annually. If re-lighting a hot heater, always wait at least 5 minutes.
2. Inspect the hose assembly for evidence of excessive abrasion, cuts, or wear. Suspected areas should be leak tested. If the hose leaks, replace it prior to operation. Only use the replacement hose assembly specified by the manufacturer.

Hose / Regulator Connection

Regulator / Cylinder Connection

A minimum supply pressure of .5 psi is required for the purpose of input adjustment of propane gas. Storage of an appliance indoors is permissible only if the cylinder is disconnected and removed from the appliance. A cylinder must be stored outdoors in a well-ventilated area out of the reach of children. A disconnected cylinder must have dust caps tightly installed and must not be stored in a building, garage, or any other enclosed area. The minimum permissible gas supply pressure of 11 W.C. is required for the purpose of hose adjustment. The minimum hourly of 1,500 BTU is the required input rating for a heater for automatic operation rating less than full input rating.

The pressure regulator and hose assembly supplied with the appliance must be used.

The installation must conform with local codes, or in the absence of local codes, with national fuel gas code, ANSI Z223.1/NFPA54, natural gas and propane Installation Code, CSA B149.1, or propane storage and handling code, B149.2

A dented rusted or damaged propane cylinder may be hazardous and should be checked by your local cylinder supplier. Never use a propane cylinder with a damaged valve connection. The propane cylinder must be constructed and marked in accordance with the specifications for LP gas cylinders of the U.S. Department of Transportation (DOT) or the standard for cylinders, spheres and tubes for transportation of dangerous goods and commission, CAN/CSA-B339.

- Do not store a spare LP-gas cylinder under or near this appliance.
- Never fill the cylinder beyond 80 percent full.
- Place the dust cap on the cylinder valve outlet whenever the cylinder is not in use. Only install the type of dust cap on the cylinder valve that is provided with the cylinder valve. Other types of caps or plugs may result in propane leakage.

- The cylinder must have a listed overfilling prevention device.
- The cylinder must have a connection device compatible with the connection for the appliance.
- The cylinder used must include a collar to protect the cylinder valve.
- Never connect an unregulated propane cylinder to the heater.

LIGHTING

NOTE: Ensure that a AA battery is installed behind the igniter button. The anode (+) side of the battery must face out.

NOTE: For initial start or after any cylinder change, hold the control knob in for 2 minutes to purge air from all gas lines before proceeding.

1. Turn the control knob to the "OFF" position.
2. Fully open the LPG tank valve.
3. Push in and turn the control knob to PILOT (⚡) position (counterclockwise). While holding in the Control Knob, press the igniter button.
4. Check for the pilot flame through the glass tube. If the pilot does not light, press and turn the Control Knob clockwise to the OFF position. Repeat steps 1-2.
5. Once the pilot flame is lit, turn the Control Knob counterclockwise to LO position.
6. For maximum heat and flame, turn the Control Knob further to the HI position.
7. To turn the heater off, turn the Control Knob clockwise to PILOT position. Then depress the Control Knob and turn clockwise to OFF position. Close the valve on your LPG cylinder when the heater is not in use.

If you experience any ignition problems, please consult the "Troubleshooting" section of this manual.

CAUTION: Avoid inhaling fumes emitted from the heater's first use. Both smoke and odor from the burning of oils used in the manufacturing will appear. Both smoke and odor will dissipate after approximately 30 minutes. The heater should NOT produce thick black smoke.

WARNING

FOR YOUR SAFETY
Be careful when attempting to manually ignite this heater. Holding in the control knob for more than 10 seconds before igniting the gas will cause a ball of flame upon ignition.

WHEN HEATER IS ON:

Emitter screen will become bright red due to intense heat. The color is more visible at night. Burner will display tongues of blue and yellow flames. These flames should not produce thick black smoke, indicating an obstruction of airflow through the burners. The flame should be blue with yellow tops. If excessive flame is detected, turn off heater and consult the "Troubleshooting" section of this manual.

RE-LIGHTING:

Note: For your safety, the control knob cannot be turned OFF without first depressing the control knob and then rotating to OFF.

1. Turn control knob to OFF.
2. Wait at least 5 minutes to allow gas to dissipate before re-lighting.
3. Repeat the "Lighting" steps listed above.

OPERATION CHECKLIST:

For a safe and pleasant heating experience, perform this check before each use:

BEFORE OPERATING:

- I am familiar with entire owner's manual and understand all precautions noted.
- All components are properly assembled, intact and operable.
- No alterations have been made.
- All gas connections are secure and do not leak.
- Wind velocity is below 10 mph.
- Heater is for use outdoors (outside any enclosure).
- There is adequate fresh air ventilation.
- Heater is away from gasoline or other flammable liquids or vapors.
- Heater is away from windows, air intake openings, sprinklers and other water sources.
- Heater is at least 36 in. on top and at least 24 in. on sides from combustible materials.
- Heater is on a hard and level surface.
- There are no signs of spider or insect nests in heater orifices.
- All burner passages are clear.
- All air circulation passages are clear.
- Clothing or other protective material should not be hung from the heater, or placed on or near the heater.
- Any guard or other protective device removed for servicing the heater must be replaced prior to operating the heater.
- Installation and repair should be done by a qualified service person. The heater should be inspected before each use and at least annually by a qualified service person.

OPERATION INFORMATION AND SAFETY:

- Unit will operate at reduced efficiency below 40°F.
- Alert children and adults to the hazards of high surface temperatures and should stay away to avoid burns or clothing ignition.
- Carefully supervise young children when they are in the area of the heater.
- More frequent cleaning may be required as necessary. It is imperative that control compartment burner and circulating air passageways of the heater be kept clean and free of debris and/or spider or insect nests.

WARNING

FOR YOUR SAFETY
Heater will be hot after use. Handle with extreme care.

SHUT DOWN:

1. Turn control knob clockwise to OFF while depressing the knob. (Normally, burner may make a slight popping noise when extinguished).
2. Turn cylinder valve clockwise to OFF and disconnect regulator when heater is not in use.

NOTE: After use, some discoloration of the emitter screen is normal.

AFTER OPERATION:

1. Gas control knob is in OFF position.
2. Gas tank valve is OFF.
3. Disconnect gas line.
4. Heater is stored upright in a secure location.

To enjoy years of outstanding performance from your heater, make sure you perform the following maintenance activities on a regular basis:

KEEP EXTERIOR SURFACES CLEAN.

1. Use soapy water for cleaning. Never use flammable or corrosive cleaning agents.
2. While cleaning your unit, be sure to keep the area around the burner and control compartment dry at all times. Do not submerge the control valve assembly. If the gas control is submerged in water, do NOT use it. It must be replaced.
3. Air flow must be unobstructed. Keep controls, burner, and circulating air passageways clean. Signs of possible blockage include:
 4. Gas odor with extreme yellow tipping of flame.
 5. Heater does NOT reach the desired temperature.
 6. Heater glow is excessively uneven.
 7. Heater makes popping noise.
 8. Spiders and insects can nest in burner or orifices. This dangerous condition can damage heater and render it unsafe for use. Clean burner holes by using a heavy-duty pipe cleaner. Compressed air may help clear away smaller particles.
9. Carbon deposits may create a fire hazard. Clean dome and burner screen with warm soapy water if any carbon deposits develop.

Note: In a salt-air environment (such as near an ocean), corrosion occurs more quickly than normal. Frequently check for corroded areas and repair them promptly.

TIP FOR STAINLESS STEEL MODELS:

Use high-quality automobile wax to help maintain the appearance of your heater. Apply to exterior surfaces from the post down. DO NOT apply to emitter screen or domes.

WARNING

FOR YOUR SAFETY

- Do NOT touch or move heater for at least 45 minutes after use.
- Reflector is hot to the touch.
- Allow reflector to cool before touching.

STORAGE:

Between uses:

- Turn control knob OFF.
- Disconnect LP source.
- Store heater upright in an area sheltered from direct contact with inclement weather (such as rain, sleet, hail, snow, dust and debris).
- If desired, cover heater to protect exterior surfaces and to help prevent build-up in air passages. Never leave LPG tank exposed to direct sunlight or excessive heat.

Note: Wait until heater is cool before covering.

SERVICE:

Only a qualified service person should repair gas passages and associated components.

Caution: Always allow heater to cool before attempting service.

PROBLEM	POSSIBLE CAUSE	CORRECTIVE ACTION
Main burner will not light	Gas valve may be off	Turn gas valve ON
	Fuel tank may be empty	Refill LPG tank
	Orifice blocked	Clean or replace orifice
	Air in supply system	Purge air from lines. Open gas lines and depress control knob for 2-3 minutes.
	Loose connection	Check all fittings
	Igniter fails	Use stick lighter to manually light
	Gas pressure low with valve open full	Replace cylinder or regulator
	New cylinder or 1st ignition	Purge air from lines
	Cylinder valve on, no gas flow	Replace hose/regulator assembly
Low burner flame	Pressure is low	Replace LPG tank
	Tank is low on fuel	Fill LPG tank
	Gas hose is kinked	Check and straighten or replace
Burner unit	Carbon on reflector and emitter screen	Clean components as needed
	Thick black smoke	Blockage in burner assembly—thoroughly clean burner

LIMITED WARRANTY

Customers in the Contiguous US

With proof of purchase from an authorized retailer, this product is warranted for a period of 1 year from original purchase date against defects in materials and workmanship under normal use. This warranty does NOT cover normal wear/weathering, exposure to water, freezing temperatures, oils, fluids, or chemicals OR use in a commercial context if the unit is not designated as a commercial model. At Well Traveled Living's sole discretion, products under warranty will be repaired and/or replaced at no charge to the customer. Returns sent back to Well Traveled Living must be sent via prepaid freight in the original retail packaging.

For warranty service, contact Well Traveled Living at the address, phone numbers or website and email listed in this owner's manual. Be sure to have your sales receipt, date of purchase and catalogue/model numbers available when calling. All warranty service will be coordinated by Well Traveled Living's, Amelia Island, Florida service center. This warranty is extended only to the original owner. Proof of purchase will be required before warranty service is rendered. The sales receipt is the only valid proof of purchase. This warranty only covers failures due to defects in materials or workmanship which occur during normal use. Failures and/or damage which result from accident, negligence, misuse, abuse, neglect, mishandling, alteration or modification, failure to maintain, improper assembly or maintenance, service by unauthorized agency or use of unauthorized components or damage that is attributable to acts of God are NOT covered.

This limited warranty gives you specific legal rights and you may also have other rights which vary from jurisdiction to jurisdiction. The provisions of the United Nations Convention on Contracts for the Sales of Goods shall not apply to this limited warranty or the sale of products covered by this limited warranty.

- THERE ARE NO EXPRESS WARRANTIES EXCEPT AS LISTED.
- PURCHASER ASSUMES ALL RISKS IN THE ASSEMBLY AND OPERATION OF THIS UNIT.
- FAILURE TO FOLLOW WARNINGS AND OPERATIONAL INSTRUCTIONS CONTAINED IN THIS MANUAL CAN RESULT IN SEVERE PROPERTY DAMAGE AND/OR PERSONAL INJURY.
- IN NO EVENT WILL WELL TRAVELED LIVING, OR ITS DIRECTORS, OFFICERS OR AGENTS BE LIABLE TO THE PURCHASER OR ANY THIRD PARTY, WHETHER IN CONTRACT, IN TORT, OR ON ANY OTHER BASIS, FOR ANY INDIRECT, SPECIAL, PUNITIVE, EXEMPLARY, CONSEQUENTIAL, OR INCIDENTAL LOSS, COST, OR DAMAGE ARISING OUT OF OR IN CONNECTION WITH THE SALE, MAINTENANCE, USE, OR INABILITY TO USE THE PRODUCT, EVEN IF WELL TRAVELED LIVING OR ITS DIRECTORS, OFFICERS OR AGENTS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH LOSSES, COSTS OR DAMAGES, OR IF SUCH LOSSES, COSTS, OR DAMAGES ARE FORESEEABLE. IN NO EVENT WILL WELL TRAVELED LIVING, OR ITS OFFICERS, DIRECTORS, OR AGENTS BE LIABLE FOR ANY DIRECT LOSSES, COSTS OR DAMAGES THAT EXCEED THE PURCHASE PRICE OF THE PRODUCT.
- SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO THE PURCHASER.

EXTEND YOUR WARRANTY

When you purchase a Fire Sense or Balkene Home product from any authorized retailer, you'll have peace of mind in knowing that it comes with a one-year warranty. Extend your warranty for *an additional year* when you review your item at balkenehome.com within 365 days of purchase.

Important Notice
