

## QUESTION 75 (MCQ)

Which of the following is not a characteristic of a good research design?

- A. It is a plan for the collection, measurement, and analysis of data.
- B. It is a plan for the collection, measurement, and analysis of data.
- C. It is a plan for the collection, measurement, and analysis of data.
- D. It is a plan for the collection, measurement, and analysis of data.
- E. It is a plan for the collection, measurement, and analysis of data.
- F. It is a plan for the collection, measurement, and analysis of data.
- G. It is a plan for the collection, measurement, and analysis of data.
- H. It is a plan for the collection, measurement, and analysis of data.
- I. It is a plan for the collection, measurement, and analysis of data.
- J. It is a plan for the collection, measurement, and analysis of data.
- K. It is a plan for the collection, measurement, and analysis of data.
- L. It is a plan for the collection, measurement, and analysis of data.
- M. It is a plan for the collection, measurement, and analysis of data.
- N. It is a plan for the collection, measurement, and analysis of data.
- O. It is a plan for the collection, measurement, and analysis of data.
- P. It is a plan for the collection, measurement, and analysis of data.
- Q. It is a plan for the collection, measurement, and analysis of data.
- R. It is a plan for the collection, measurement, and analysis of data.
- S. It is a plan for the collection, measurement, and analysis of data.
- T. It is a plan for the collection, measurement, and analysis of data.
- U. It is a plan for the collection, measurement, and analysis of data.
- V. It is a plan for the collection, measurement, and analysis of data.
- W. It is a plan for the collection, measurement, and analysis of data.
- X. It is a plan for the collection, measurement, and analysis of data.
- Y. It is a plan for the collection, measurement, and analysis of data.
- Z. It is a plan for the collection, measurement, and analysis of data.
