## INSTALLATION

1

Drill the drain hole and faucet hole on the countertop, according to the shape and size of vessel sink.

2

Carefully place the sink upside down on the counter with a towel or other soft cloth beneath to prevent damage.

3

Apply a continuous bead of silicone to the base of the vessel sink where it will rest on the counter.

4

Turn the sink right-side up and position it back over the drain hole.

5

Remove any excess silicone with a damp cloth. Let the adhesive dry for 24 hours.

6

Connect the drain to the sink and connect water supply connections according to the manufacturer's instructions.

7

Ensure that there are no leaks by running water into the sink.
