Care & Maintenance

"NOTE": Use warm soap water and a soft ,damp ,lint-free cloth to clean the mirror.Wipe dry with another clean cloth .Glass cleaner can be used on the mirror surface when required .Avoid scourers ,abrasives and chemical cleaners as they can damage the glass and the frame .

In hard water areas ,limescale may deposit on the glass .Regular cleaning will minimize this problem.If this build-up becomes increasing difficult to remove ,apply a small amount of white vinegar on the area .

 Do not attempt to cut the glass .

 Do not hit the glass with hard or sharp article.

Installation Instructions

Please read follow warm tips before installation !

 Power off electrical before installation. Use voltage detector to make sure. Verify the circuit breaker is turned off & lock it in case someone try to turn it on.

 If you're NOT expieriend in installing electrical wiring, then hire a professional electrician. Your safety is more important then saving a few dollars.

 Avoid water at all times when working with electricity. Never touch or install any electrical equipment or circuits with wet hands.

 Tools you will need: voltage tester, wire cutters, wire and cable strippers, needle nose pliers, continuity tester, and wire closure.

 Wear Safety Glasses and Protective Clothing to protect you from sparks.
