

LATOSCANA Faucet, Shower, Accessory Care and Maintenance

With proper care and maintenance, your LATOSCANA faucet, shower or accessory will give you a lifetime of service. Below are the suggestions for the care and cleaning of your product.

General Cleaning:

A soft cloth is the ideal for cleaning these products.

Under no circumstances should abrasive, caustic or aggressive cleaners be used.

Chrome-plated surfaces should be cleaned with a delicate detergent, or with soap and water.

To eliminate limescale, detergents containing mineral acids (for ex. hydrochloric acid) or aggressive organic acids (for ex. acetic acid), should not be used.

We recommend the use of products with a base of citric acid.

After cleaning, the products should be thoroughly rinsed and dried carefully.
