Assembly Instructions for Unity Tabletop Fountain with LED Light (XSS-983)

- Take the fountain out of the box, so you have two pieces, the top and the bottom.
- Plug the LED light into the adapter that is connected to the pump (Step 1)
- Connect the pump to the tubing on the bottom of the fountain (Step 2)
- Take the cord and place it in the groove that is cut out towards the back side of the fountain (Step 3)
- Put the assembled fountain on the basin (Step 4)
- Put water (approximately 1300 ml) in the basin of the fountain (about ½ way full) take all cords and pump and place it in the water, be sure to make sure there is enough water in the bottom of the fountain so that the pump will be completely submersed (Step 5)
- Connect the adaptor to the pump cable (Step 6)
- Plug the pump in and enjoy (Step 7)
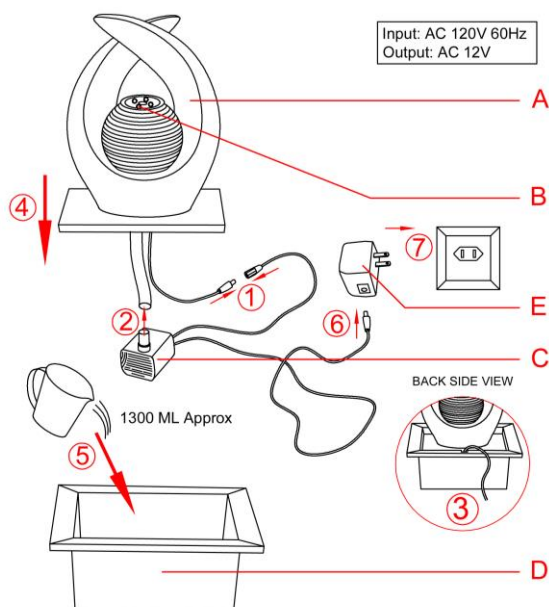

Part	Description	Quantity	Part	Description	Quantity
