

Live Edge Cedar Wood Wall Shelf with Metal Brackets - Set of 2

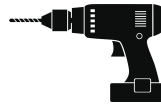

Package Content

- Short wood slab x1
- Long wood slab x1
- Short metal bracket x2
- Long metal bracket x2
- 1-inch screw x12
- 2-inch screw x12

*Anchors are NOT included and not required.

Tools Needed

- Power drill

- Level

INSTRUCTION

- * Carefully identify which brackets to go with which wood slabs based on their size.
- * We suggest securing the metal brackets onto the wood slabs first, then install them onto the wall.
- * Each shelf's weight capacity is approximately 10 lbs without anchors. You may supply your own anchors for enhanced weight capacity.

STEP BY STEP

1. Decide how far apart the two brackets are on the wood slab depending on your wall space and preference.
2. Use a power drill and the 1-inch screws to secure the short side of the bracket onto the wood slabs. Install all brackets onto wood slabs.
3. Hold the shelf against the wall and level it with a level tool.
4. Use the power drill and the 2-inch screws to mount the shelf onto the wall.
