

# INSTALLATION INSTRUCTION

## Touch Panel Switch with Occupancy Sensor

### CT-6A-R2

WAC LIGHTING  
Responsible Lighting®

#### CAUTION :

##### KEEP FROM HEAT AND METAL SURFACES

- This product is designed for use indoors with general electronic devices.
- Input voltage and current must meet specifications
- Use certified wires and cables for installation
- Not recommended to mount touch panel on metal surfaces

#### PRECAUTION :

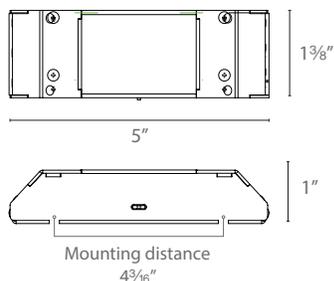

##### GARDER DES SURFACES DE CHALEUR ET DES MÉTAUX

- Ce produit est conçu pour un usage en intérieur avec des appareils électroniques générales.
- Tension et le courant doit répondre aux exigences d'entrée
- Utiliser des fils et des câbles certifiés pour l'installation
- Ne montez pas l'écran tactile sur des surfaces métalliques

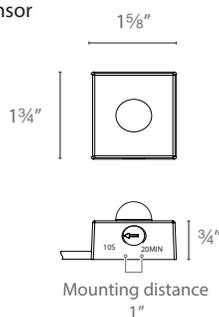

#### FEATURES:

- Intelligent motion and touch switch control of luminaires based on occupancy.
- Low-profile design compatible with a wide range of WAC Lighting low voltage LED lighting luminaires.
- Output wattage is based on the power supply (sold separately) and luminaire (sold separately) specifications. Refer to these specs for proper installation.
- Programmed with three functions:
  - TOUCH and SENSOR** To activate both motion sensor and touch switch.
  - TOUCH** Only touch switch, inactivate motion sensor.
  - SENSOR** Only motion sensor, inactivate touch switch.
- Built-in adjustable timer on motion sensor allows automatic shut off after the sensor covered area is vacated. Maximum time delay is 20 minutes (**20MIN**), minimum is 10 seconds (**10S**).
- Motion sensor supplied with 18ft wire and touch panel supplied with 8ft wire. May be cut to desired length. Lengthen of wire is not recommended as will decrease sensitivity.
- Two different mounting options (screw or double sided tape mounting) for all undercabinet application included. Choose appropriate mounting option for rough, smooth and curved surfaces.
- Designed for indoor undercabinet application. Recommended ambient temperature is 14° to 122° F (-10° to 50°C)

Touch Panel

#### INSTALLATION:

1. **TOUCH AND SENSOR SEE (P. 3-4)**
2. **TOUCH SEE (P. 5-6)**
3. **SENSOR SEE (P. 7-8)**

#### SPECIFICATION :

<b>Input:</b>	12/24V, AC/DC
<b>Output:</b>	12/24V, AC/DC
<b>Current:</b>	6A MAX

**Sample Application for Function 1) TOUCH and SENSOR**

- Designed for indoor undercabinet application. The recommended ambient temperature is 14 to 122 °F (-10 to 50 °C).
- Recommended to use with WAC Lighting Low Voltage LED (12V or 24V) undercabinet products.
- To achieve better result, install motion sensor with lens facing side ways and touch panel within sensor coverage range.

## Touch Panel Switch with Occupancy Sensor

### CT-6A-R2

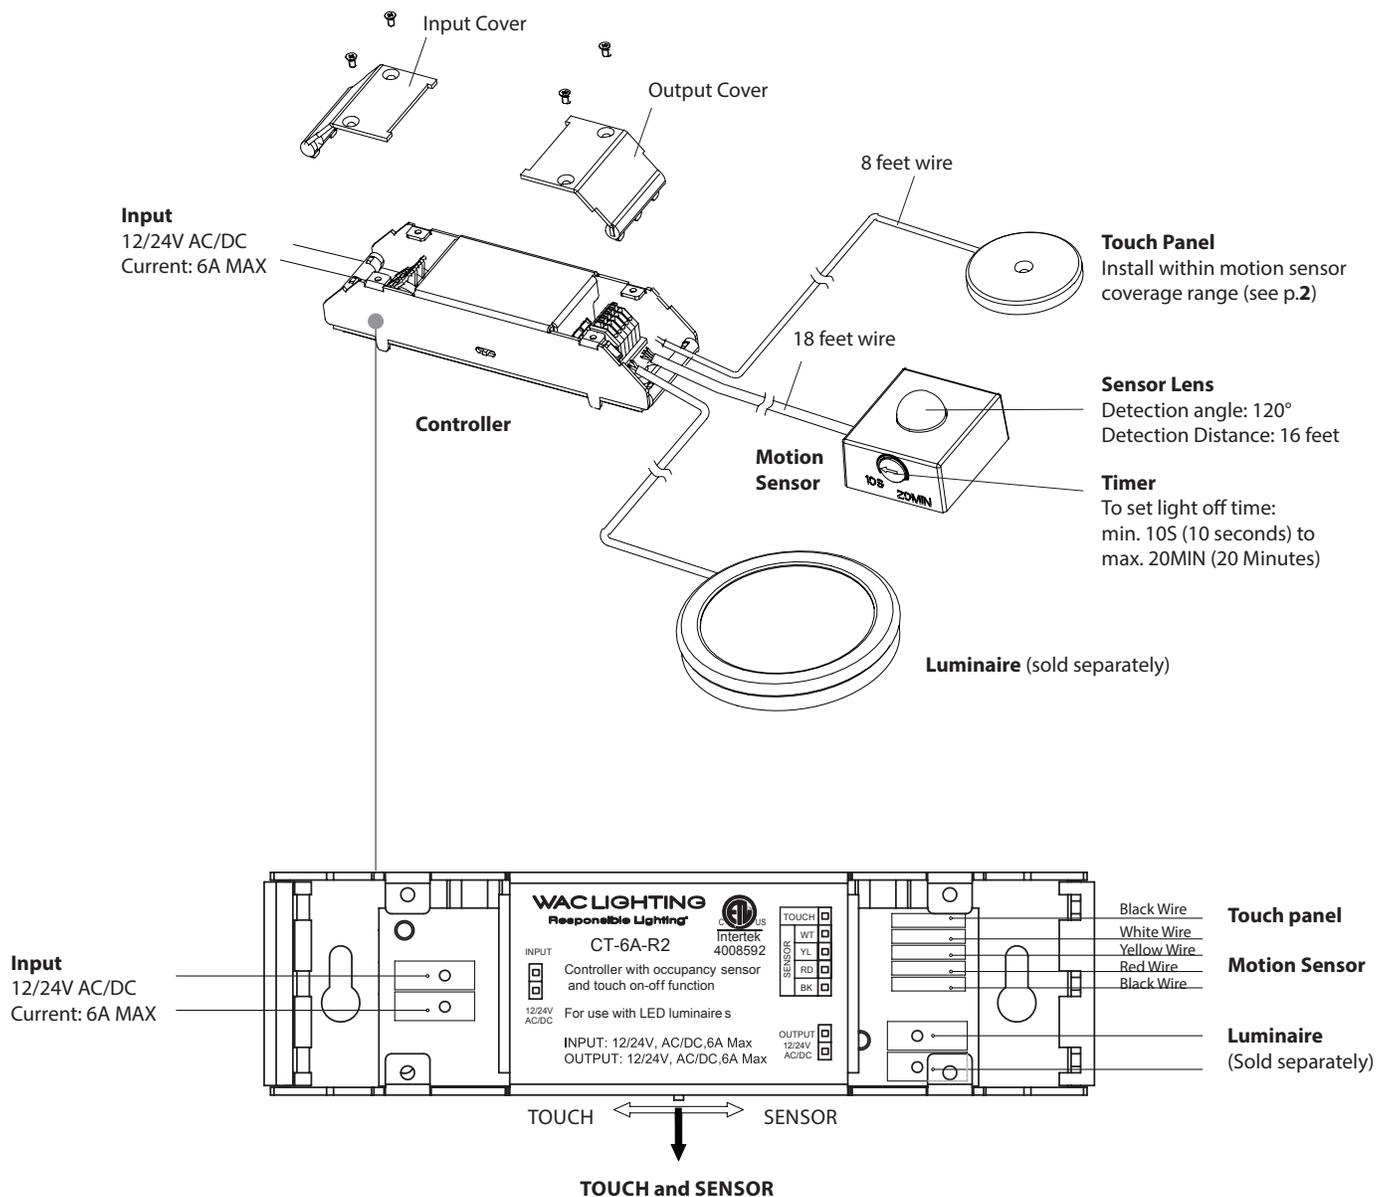

**WAC LIGHTING**  
Responsible Lighting®

#### TOUCH AND SENSOR

- Before installation, layout the application and determine the mounting locations of Motion Sensor, and the Touch Panel.
- Install within luminaires motion sensor coverage range (p.2) and adjust motion sensor to the direction of detection area to achieve best sensitivity (detection range: 120° and 16 feet).

**Note:** Touch Panel supplied with 8 feet wire, Motion Sensor supplied with 18 feet wire. Wires may be field cuttable.

### Installation

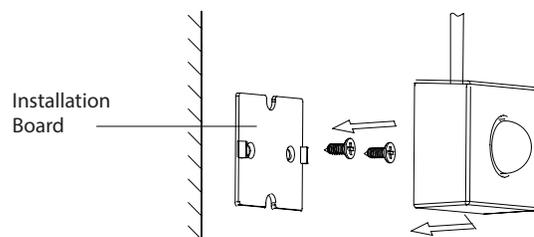

1. Make sure controller switch position to "TOUCH and SENSOR".
2. Mount the motion sensor by using screw or double sided tape (**Fig. 2**) with the lens facing the direction where the best detection range of human movement for optimal coverage. Detection angle is 120° and max distance is 16 feet (see p. 2 for sample kitchen application and coverage chart).
3. Mount the touch panel by using screws or double sided tape (**Fig. 3**) within motion sensor's coverage range.
4. Mount controller by using screws or double sided tape (**Fig. 4**). Open the input/output cover of controller by screw to connect motion sensor, touch panel, luminaires and power supply (see **Fig.1** for wiring instruction).
5. Screw back the input and output covers of the controller. The input/output covers are designed to press and secure the wires in position.

#### Motion Sensor Screw Mounting: (**Fig. 2**)

Use screws to mount the installation board.

Fix the sensor on the board with clips.

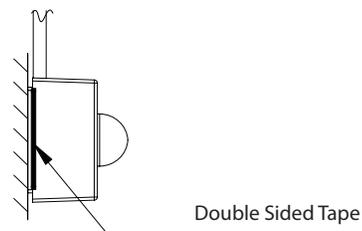

Suitable for wood cabinets with rough finishes or curved surfaces

#### Motion Sensor Tape Mounting:

Use double sided tape to mount the sensor.

Suitable for cabinets with smooth finishes.

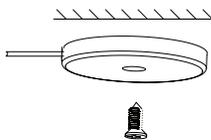

#### Touch Panel Screw Mounting: (**Fig. 3**)

Use screw to mount the touch panel.

Suitable for wood cabinets with rough finishes or curved surfaces.

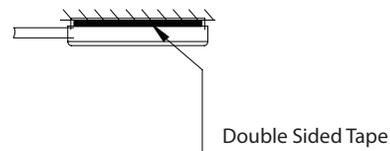

Caution: Do not install on metal surfaces.

#### Touch Panel Tape Mounting:

Use double sided tape to mount the touch panel.

Suitable for cabinets with smooth finishes.

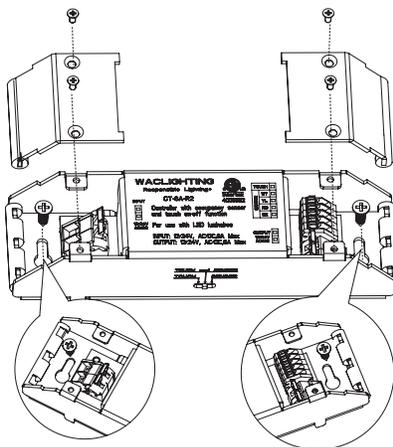

#### Controller Screw Mounting: (**Fig. 4**)

Open the input and output covers of controller.

Use screws to mount by waist shaped holes.

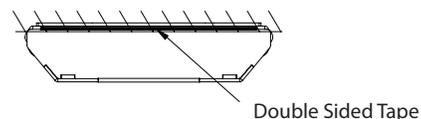

Suitable for wood cabinets with rough finishes or curved surfaces.

#### Controller Tape Mounting:

Use double sided tape to mount the controller.

Suitable for cabinets with smooth finishes.

#### Installation

1. Make sure controller switch position to "TOUCH".
2. Mount the touch panel by using screw or double sided tape (**Fig. 6**).
3. Mount controller by using screws or double sided tape (**Fig. 7**). Open the input and output covers of controller to connect, the touch panel, luminaires and power supply to the controller (see **Fig.5** for wiring instruction).
4. Screw back the input and output covers of the controller. The input/output covers designed to press and secure the wires position.

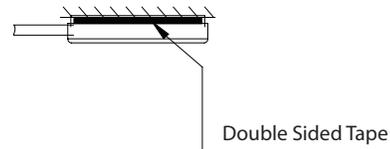

#### Touch Panel Screw Mounting: (**Fig. 6**)

Use screw to mount the touch panel.  
Suitable for wood cabinets with rough finishes or curved surfaces.  
Caution: Do not install on metal surfaces.

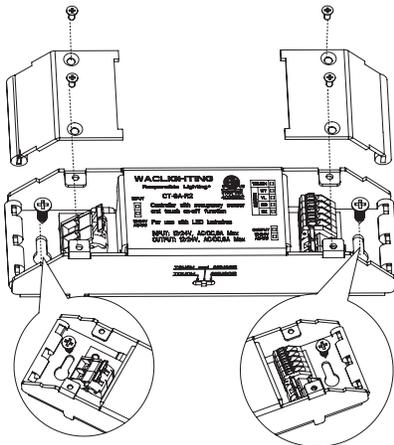

#### Touch Panel Tape Mounting:

Use double sided tape to mount the touch panel.  
Suitable for cabinets with smooth finishes.

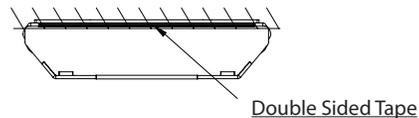

#### Controller Screw Mounting: (**Fig. 7**)

Open the input and output cover of controller.  
Use screws to mount by waist shaped holes.  
Suitable for wood cabinets with rough finishes or curved surfaces.

#### Controller Tape Mounting:

Use double sided tape to mount the controller.  
Suitable for cabinets with smooth finishes.
