

PREPARING FOR INSTALLATION

Carefully remove all contents from the carton. Shut off the power at the circuit breaker and completely remove the old fixture from the ceiling, including the old mounting bracket. Remove the new mounting bracket assembly from the bag. Then remove cap nuts (N) from mounting screws (A). Mounting plate (B) contains several pairs of threaded holes. Find the pair of holes that matches the spacing on the holes on the fixtures canopy. Attach two mounting screws (A) to the mounting plate (B). Tighten nuts (C) to hold the screws in place. Put the hollow rubber plug (H) inside the hole in the ceiling, then insert the tapping screw (I) through the mounting plate (B) into the rubber plug (H). Place the mounting plate (B) over the junction box so that mounting screws (A) and nuts (C) are visible. Pull the house wires through the center of mounting plate (B). Secure mounting plate (B) to the junction box by tightening the screws (D). Adjust the position of mounting screws (A) so that mounting screws (A) can be exposed 5-6 mm after passing through the canopy (G). Once the ideal position of mounting screws (A) has been confirmed, tighten nuts (C) on mounting screws (A) under the mounting plate to ensure that mounting screws (A) are in place.

ASSEMBLING THE FIXTURE

There are 4 12-inch rods (P), and 1 6-inch rod (Q) included for each side of the fixture. Determine the correct number of rods needed for proper hanging height. To lengthen the fixture, add additional rods. To shorten the fixture, trim the wires to desired length. Leave at least 8 to 10 inches of wire in addition to the desired length and slide any excess rods off the fixture's wiring to discard. Keep in mind that you must use at least one rod to hang the fixture. Thread the wires through the rods and pull the wires until taut before connecting the rods together. Screw rod onto threaded post (R) on the fixture. Place reinforcing plate (M) inside canopy (G) and the canopy (G) over the threaded post (O) of the top rod. Put one side of threaded post (O) through the wirerope noose (F) and washer (L). Lock the reinforcing plate and canopy with the wing nut (K) and threaded post (O). Hide wirerope inside the canopy (G). Secure the screw collar loop (J) to mounting plate (B).

CONNECTING THE WIRES

Have a helper support the fixture's weight while completing the wiring. Attach the fixture's wires to the power supply wires from the junction box. Connect black to black (live); white to white (neutral); grounding to grounding (green or copper). Twist the ends of the wire pairs together. Then, twist on a wire connector. Make sure all twists are in the same direction. Loop fixture's ground wire around grounding screw (E) and tighten. If there is no ground wire (green or copper) from the junction box, contact a qualified electrician.

FINISHING THE INSTALLATION

Raise canopy (G) to mounting plate (B) and position mounting screws (A) so that they protrude through the openings of canopy (G). Secure canopy (G) in place with cap nuts (N). Secure glass (U) onto the socket (S) by screwing socket ring (V) tight. Make the flat iron ring (T) horizontal and parallel with glass (U). Install light bulb (not included) in accordance with the fixture's specifications. Do not exceed the recommended wattage. Your installation is now complete. Turn on the power and test the fixture.

CLEANING TIPS

Treat the fixture gently! Regular cleaning will reduce the need for deep cleaning. For regular cleaning, turn off the light and wipe down the fixture with a clean lint-free cotton or microfiber cloth. Never spray cleaner directly onto the fixture.

NOTICE

Drill 9/64" pilot holes in support structure to aid in securing light fixture.

NOTICE

In order to use a 12in. rod by itself you must first remove the threaded post from the 6in. rod and install it on one of the ends of the 12in. rod.

Hunter Pro Tip:

Twist or tape wire ends together to make it easier to pass them through the downrods. Threaded post may also be removed for easier wire access.

INSTALLATION INSTRUCTIONS

INSTRUCCIONES DE INSTALACIÓN/ INSTRUCTIONS D'INSTALLATION

WARNING

- To avoid possible electrical shock, before installing your light fixture, disconnect the power by turning off the circuit breakers to the outlet box associated with the wall switch location.
- The lighting fixture must be grounded. If the ground wire for the installation site is not present, immediately STOP installation and consult a qualified electrician.
- All wiring must be in accordance with national and local electrical codes ANSI/NFPA 70. If you are unfamiliar with wiring or in doubt, consult a qualified electrician.

ADVERTENCIA

- Para evitar una posible descarga eléctrica, antes de instalar su lámpara, desconecte la energía apagando los interruptores automáticos (breakers) que alimentan la caja de salida asociada con la ubicación del interruptor de pared.
- La lámpara se debe conectar a tierra. Si el alambre de conexión a tierra no está presente en el sitio de la instalación, DETENGA inmediatamente la instalación y consulte con un electricista calificado.
- Todo el cableado debe realizarse de acuerdo con los códigos eléctricos locales y nacionales ANSI/NFPA 70. Si no está familiarizado con el cableado, o si tiene duda, consulte a un electricista calificado.

AVERTISSEMENT

- Pour éviter tout choc électrique, avant d'installer le luminaire, coupez le courant en éteignant les disjoncteurs de la boîte électrique associée à l'interrupteur mural.
- Le luminaire doit être mis à la terre. Si le fil de terre du lieu d'installation n'est pas présent, ARRÊTER immédiatement l'installation et consulter un électricien qualifié.
- Tout le câblage doit être conforme aux codes électriques nationaux et locaux en vigueur et à la norme ANSI/NFPA 70. Si vous n'avez pas l'habitude de faire ce câblage ou en cas de doute, adressez-vous à un électricien qualifié.

READ AND SAVE THESE INSTRUCTIONS

These instructions are provided for your safety. It is very important that they are read carefully and completely before beginning installation of the lighting fixture.

LEA Y GUARDE ESTAS INSTRUCCIONES

Estas instrucciones se proporcionan para su seguridad. Es muy importante leerlas detenidamente y completamente antes de comenzar la instalación de la lámpara.

LISEZ ET CONSERVEZ CES INSTRUCTIONS

Ces instructions sont fournies pour votre sécurité. Il est très important de les lire attentivement dans leur intégralité avant d'entreprendre l'installation du luminaire.
