

KNOW YOUR BUS

KNOW YOUR BUS

1. The bus is a vehicle that carries passengers and cargo. It is designed to transport multiple people or goods from one location to another. Buses are commonly used for public transportation, school transport, and long-distance travel.

2. Buses are typically larger than cars and have a high seating capacity. They are equipped with features such as air conditioning, safety seats, and emergency exits. Buses are also designed to be accessible for people with disabilities, often featuring ramps and wheelchair spaces.

Feature	Description
Capacity	Typically 10-50 passengers
Accessibility	Wheelchair ramps and spaces
Safety	Emergency exits and safety seats
Comfort	Air conditioning and seating
