CARE AND CLEANING

JSG *Oceana* Glass Cookware & Serving Pieces

JSG *Oceana* glass products can be used for storing, cooking, and serving and are similar to all other glass baking products on the market which suggest the following care:

- You can put your JSG *Oceana* glass product in the dishwasher or wash it in hot soapy water with a non-abrasive pad. If the food is burnt or tends to stick, soak your glass item in hot water for half an hour before cleaning.
- Avoid dropping the product, and be careful not to put the glass item on cold or wet surfaces, or put cold liquids in hot glass items or on hot plates as the dramatic temperature change could cause the item to break. Do not immerse hot glass item in cold water. The glass must have food or water in it when heating. The golden rule for glass is that it has to be heated and cooled evenly.
- JSG *Oceana* glass products are microwaveable safe and oven safe to 450°F. Glass bakeware dishes behave differently from metal bakeware. Glass bakeware heats up and cools down more slowly and helps prevent thick crusts from forming on casseroles and other foods. Generally, to adapt to a recipe from the metal dish to a glass dish, you should lower the baking temperature by 25° and allow a bit of extra time in the oven. Do not use on the rangetop.
