

# SOLAR FOUNTAIN INSTALLATION INSTRUCTION

F305B

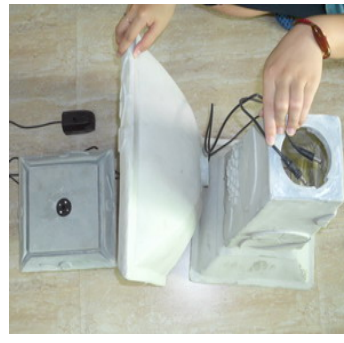

We hope you will find these instructions helpful in setting up your product.

Pass the big plug cord down the pipe in the bowl.

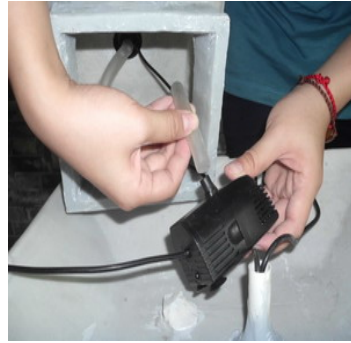

Pass the small plug cord down the pipe in the bowl.

Carefully rest the bowl on its side. Feed the power cord down the pedestal and out the base. Align the power cord with the groove at the base of the pedestal.

Carefully lower the bowl on to pedestal. Align the grooves, twist and lock the bowl to the pedestal.

Connect the tubing from the top to the pump.

Gently lower the top in place.

The final product.

## **Operating Instructions**

*For complete operating instructions, please see the included manual.*

1. Install the included batteries.
2. Attach the included stake to the panel.
3. Fully charge the unit with the included charging cable or a minimum of 6 hours of direct sunlight.
4. Connect the pump to the corresponding socket on the panel.
5. Place the panel in a location where it will obtain consistent direct sunlight.
6. Fill the fountain with clean water.
7. Turn the device on by pressing the power button.
8. Toggle the device to the desired method of operation: Direct solar or Battery Power.

*Direct Solar Power is the default method of operation. Battery Powered operation will work for a period of up to 4 hours with a full charge.*

The final assembly should look like this

**The pump must be fully submersed at all times to avoid pump burnout.  
Product must be properly stored for winter.**
