

Pre-purchase Information

Door is not included, only the hardware kit is for sale.

You will need 6" clearance from the top of your door to the ceiling (or crown molding, if any) for this kit to fit correctly.

Fit for door panel thickness: 1-3/8" to 1-3/4".

This hardware kit can hold door weight 230lbs.

The gap between door and cabinet is 5/8" based on 1-1/2" thick door.

To help you choose the fit kit, we recommend the track length should be twice of the door's width at least, and you can also cut the track into any length to meet your need.

Safety Assurance Measures

Hanger: Upgraded Nylon wheels, each with 2 life time lubricated bearing ensure slide smoothly and quietly. Test beyond 120,000 rolls. You can use it for a long time!

Door Stopper: Prevent your door from rolling off the rail, Anti-collision, the rubber caps ensure a quiet close

Anti-jump Pad: Prevent door be lifted off rail. Install them on the top of your door, the anti-jump pad and the roller can hold the rail once the door hit the stopper.

L Floor Guide

The floor guide can prevent the door from swing, allow you to open and close your door freely.

Two Install Methods: Like picture shows.
