

General Instructions:

We strongly recommend that this product be installed by a professional.

Materials Recommended:

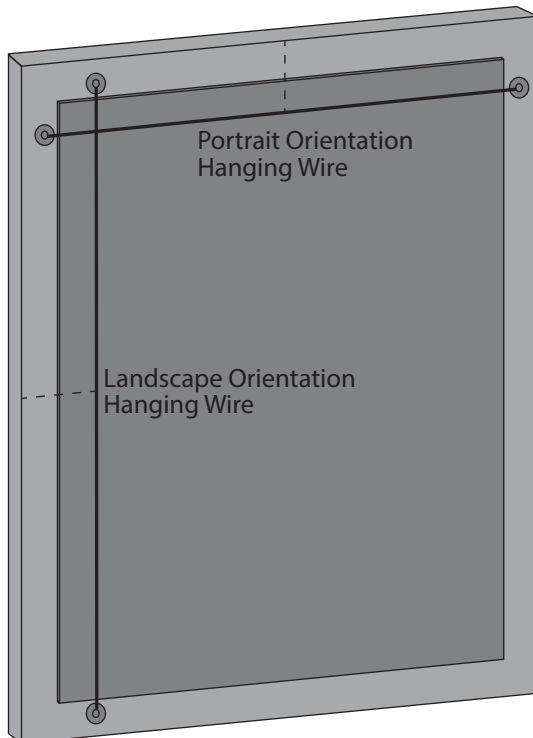

Appropriate hanging hardware for your chosen mounting surface *(Rated for at least 40lbs)*

Tools Needed:

Measuring Tape Pencil Level

1. Decide the hanging orientation for the mirror: portrait or landscape.
2. Select a mounting location that will accommodate the weight and shape of the mirror.
3. On the back of the mirror, measure and record the distance from the top of the frame to the center of the appropriate mounting wire. *(Figure 1)*

Figure 1

4. Hold the mirror to the selected mounting location and lightly mark the wall at the top center of the frame, then using the previously recorded measurement mark the wall down where the mounting wire will sit. *(Figure 2)*
5. Install hanging hardware at the marking on the wall according to the manufacturer's instructions and then attach the mirror. Check with a level and adjust if necessary.
