

Vicenza Oil Rubbed Bronze Stainless Steel Rainfall Shower Panel with Hand Shower

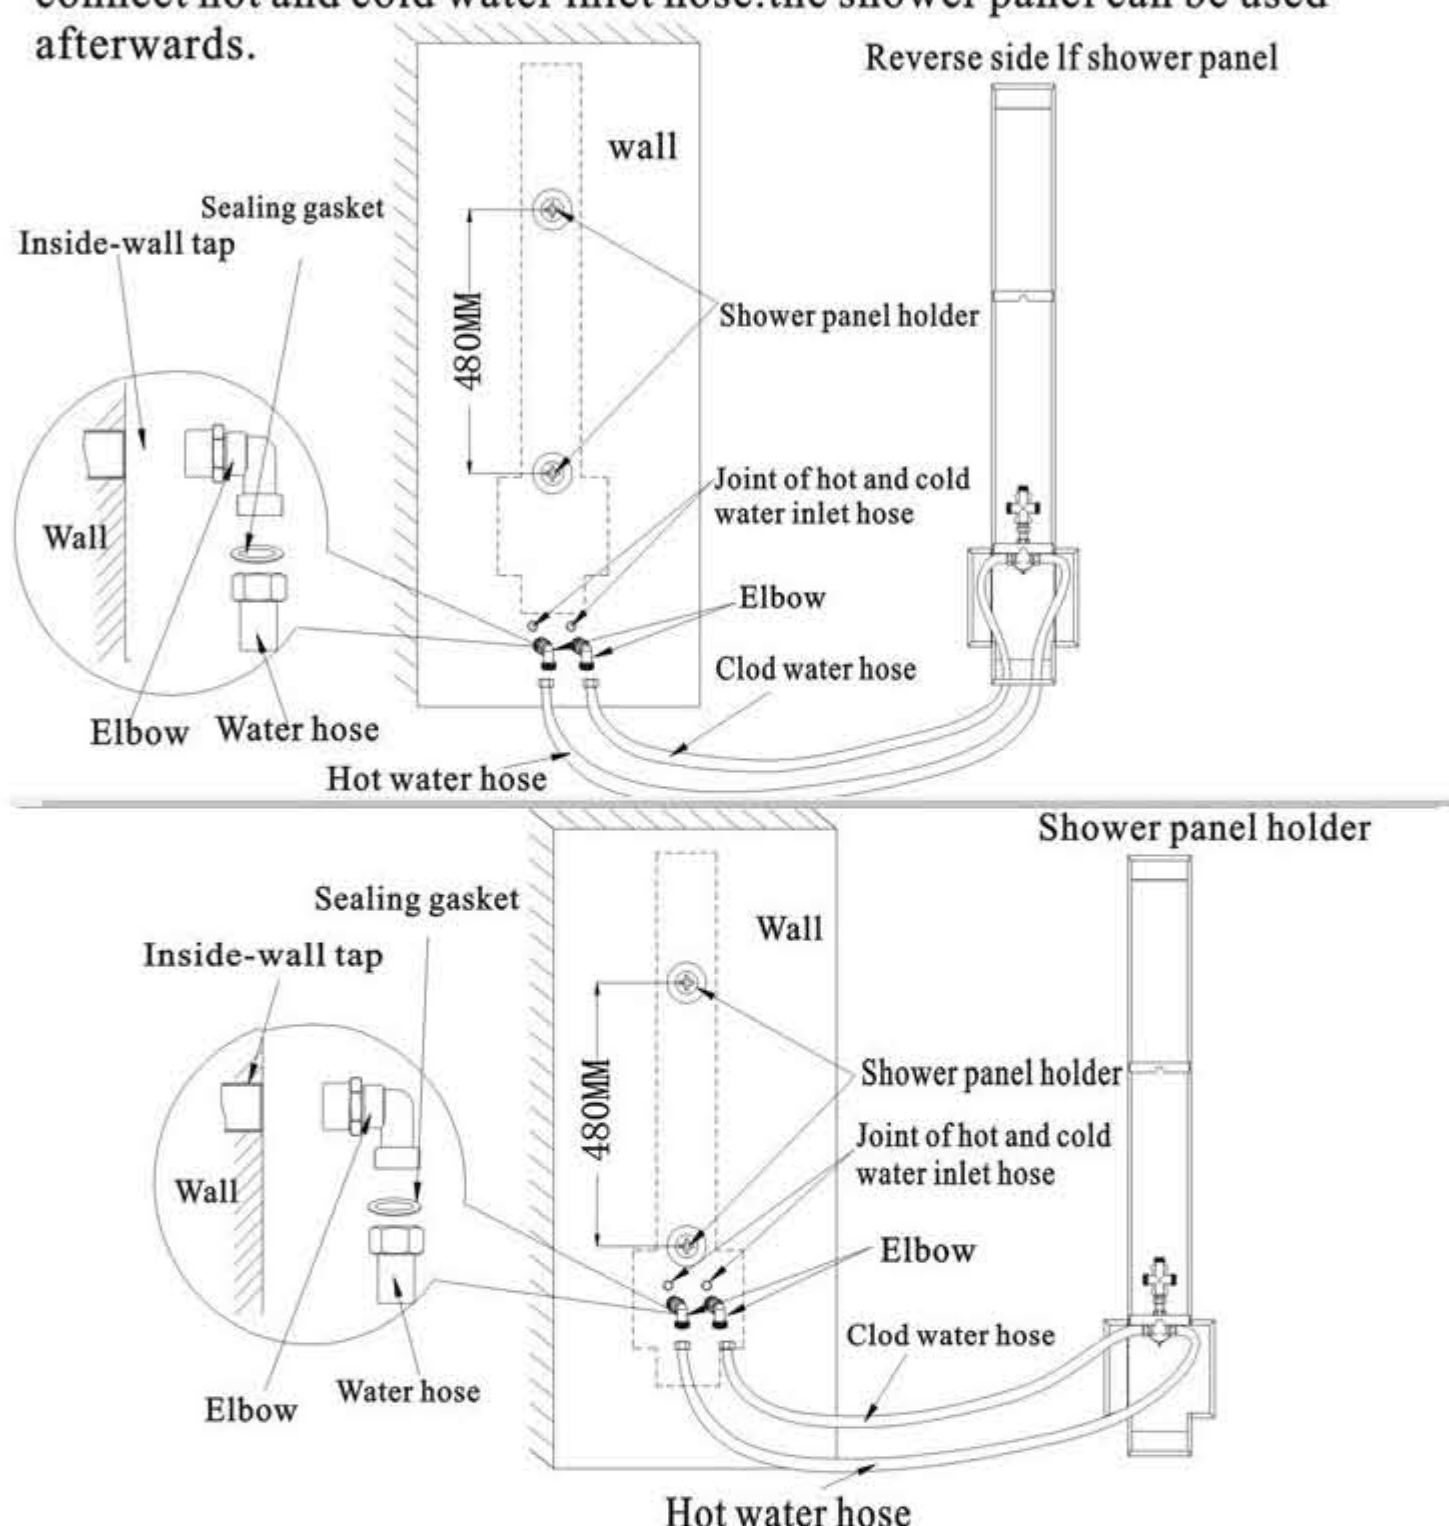

Shower panel installation instruction

Connection way:

Before installation please choose an install method (visible way-hose exposed/ invisible way-hose concealed) according to your product type and requirements.

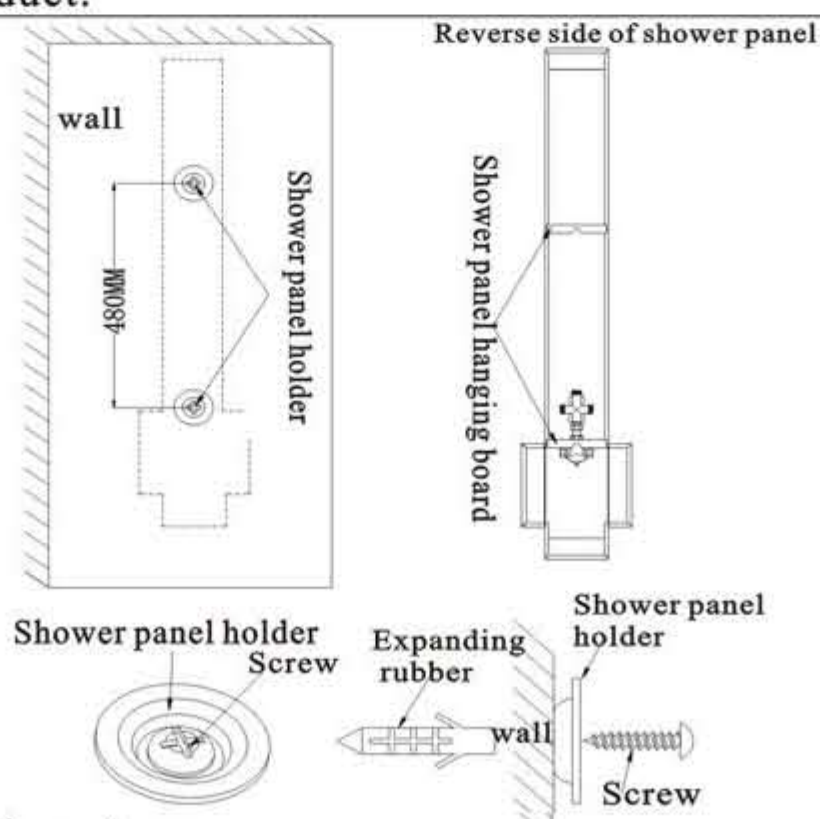

Visible way (hose exposed): determine the install method basing on your bathroom environment and usage requirement. Hang the shower panel, connect hot and cold water inlet hose. the shower panel can be used afterwards.

Note: the elbow should firstly be cleaned by water to make sure no (sand) soil wastes inside before assembling, and make sure the hexagonal side of elbow is into the wall.

Installation method :

Note: Install the shower panel hanging board on the reverse side of the product.

Installation steps:

1. To determine the installation location and height, mark relative holes on the wall for drilling (the diameter of the two hole: $\phi 6$, distance: 480 MM)
2. Drill (the hold and the wall as 90°), Put inside the expanding Rubber afterwards.
3. Fix the shower panel holder on the wall by screw (The big end of the shower panel holder out and the small end against wall)
4. Hang the shower panel then it can be used (check carefully if the shower panel is firmly hung)
