Drain line	1/2" copper line, 1/2" NPT female thread

Dedicated circuit required	
Generator: S-600	6KW, 240V, 25A

Installation Notes

Install this product according to the installation guide. Factory sized: L x H x W = cubic feet. Choose the appropriate model. For every foot of ceiling height over 8 ft use the next larger steam unit. Always round your measurements up. Wall material is irrelevant. For this steam generator, do not exceed the maximum volume rating:

Steam generator model	Power rating	Maximum volume rating
Generator: S-600	6KW,	150 cu ft
