

## USER CARE AND MANUAL

### HDPE CARE:

1. We suggest to keep your furniture covered when not in use. Reduce exposure to sunlight by storing in a covered area. This will minimize fading and keep the life of your furniture longer.
2. For quick cleaning, remove any debris first. Then, rinse with water and mild soap if needed. For deeper cleaning, mix 1/3 bleach with 2/3 warm water. Apply with a soft bristle brush and rinse thoroughly.

### CUSHION AND PILLOW CARE:

1. Gently remove any loose dirt or debris by vacuuming or using a soft bristle brush.
2. To clean stains, mix a mild dishwashing soap of ¼ cup to a gallon of water. Do not let stains sit. Apply the soap mixture with a clean cloth immediately and blot the fabric to soak up moisture.
3. Air dry completely by propping the cushions vertically at a sunny area.
4. Store or cover cushions when not in use.
