Controls	Push Button Panel

The PLJW 121 under cabinet range hood is quiet, yet efficient. At just under ten inches tall it is visually slim, but the 900 CFM blower will easily keep your kitchen free of grease and smoke. The control panel is tucked under the front face giving the 121 a clean, minimal aesthetic while still being easy to use. This model can be simply converted to a recirculating hood to leave the ductwork out of the installation process.
