

VIGO SOHO ADJUSTABLE FRAMELESS SHOWER DOOR PUERTA DE DUCHA AJUSTABLE SIN MARCO VIGO SOHO PORTE DE DOUCHE SANS CADRE RÉGLABLE VIGO SOHO

VG6072

PRODUCT FEATURES / CARACTERÍSTICAS DEL PRODUCTO / CARACTÉRISTIQUES DU PRODUIT

- Built-in horizontal adjustability makes this shower door easy to install
 - Includes all mounting hardware
 - Constructed from ANSI Z97.1 and 16 CFR 1201-certified tempered glass for added safety
 - MagnaLock™ Technology ensures door stays closed to prevent leaks
 - High-quality stainless steel and solid brass hardware resist corrosion and tarnishing
 - All VIGO Shower Doors feature a quality assured Limited Lifetime Warranty
- La capacidad de ajuste horizontal incorporada hace que esta puerta de ducha sea fácil de instalar
 - Incluye todo el hardware de montaje
 - Construido con vidrio templado certificado por ANSI Z97.1 y 16 CFR 1201 para mayor seguridad
 - La tecnología MagnaLock™ asegura que la puerta permanezca cerrada para evitar fugas
 - Los herrajes de latón macizo y acero inoxidable de alta calidad resisten la corrosión y el desgaste
 - Todas las puertas de ducha VIGO cuentan con una garantía limitada de por vida de calidad garantizada
- Le réglage horizontal intégré rend cette porte de douche facile à installer
 - Comprend tout le matériel de montage
 - Fabriqué en verre trempé certifié ANSI Z97.1 et 16 CFR 1201 pour plus de sécurité
 - La technologie MagnaLock™ garantit que la porte reste fermée pour éviter les fuites
 - La quincaillerie en acier inoxydable et en laiton massif de haute qualité résiste à la corrosion et au ternissement
 - Toutes les portes de douche VIGO bénéficient d'une garantie à vie limitée de qualité garantie

CERTIFICATE & WARRANTY / •CERTIFICADO Y GARANTÍA / CERTIFICAT & GARANTIE

ANSI Z97.1 and 16 CFR 1201-certified glass
All VIGO Shower Door have a Limited Lifetime Warranty

Vidrio certificado ANSI Z97.1 y 16 CFR 1201
Todas las Puertas de Ducha VIGO tienen una Garantía Limitada de Por Vida.

ANSI Z97.1 et 16 CFR 1201 - Verre certifié
Toutes les portes de douche VIGO bénéficient d'une garantie de qualité limitée à vie.

NOTE / NOTA / REMARQUE

VIGO reserves the right to modify/update all hardware and glass components based on bettering the product for the end user's experience. If you have any questions contact VIGO Tech Support at 1-866-591-7792.

*VIGO se reserva el derecho de modificar/actualizar todos los componentes de metal y vidrio con la finalidad de mejorar el producto para la experiencia del usuario final. Si tiene alguna pregunta, comuníquese con el Servicio Técnico de Productos VIGO al 1-866-591-7792

*VIGO se réserve le droit de modifier/mettre à jour tout le matériel et les composants en verre avec l'objectif d'améliorer le produit pour l'expérience de l'utilisateur final. Si vous avez des questions, veuillez contacter le support technique VIGO en appelant 1-866-591-7792.

VIGO INDUSTRIES INSTALLATION GUIDE FOR SHOWER ENCLOSURE (MODEL VG6072)

SAFETY PRECAUTIONS

This Installation Guide uses the following symbols to indicate important information. Always observe the instructions indicated by these symbols.

WARNING

Instructions that, if ignored, could result in death or serious personal injury caused by incorrect handling or installation of the product. These instructions must be observed for safe installation.

IMPORTANT

Maintenance and other important non-personal injury and non-material damage instructions or statements that should be observed.

It is highly advised to dry fit the unit prior to any installation.

*VIGO reserves the right to modify/update all hardware and glass components based on bettering the product for the end user's experience. If you have any questions contact VIGO Tech Support at 1-866-591-7792.

MODEL VG6072 SOHO

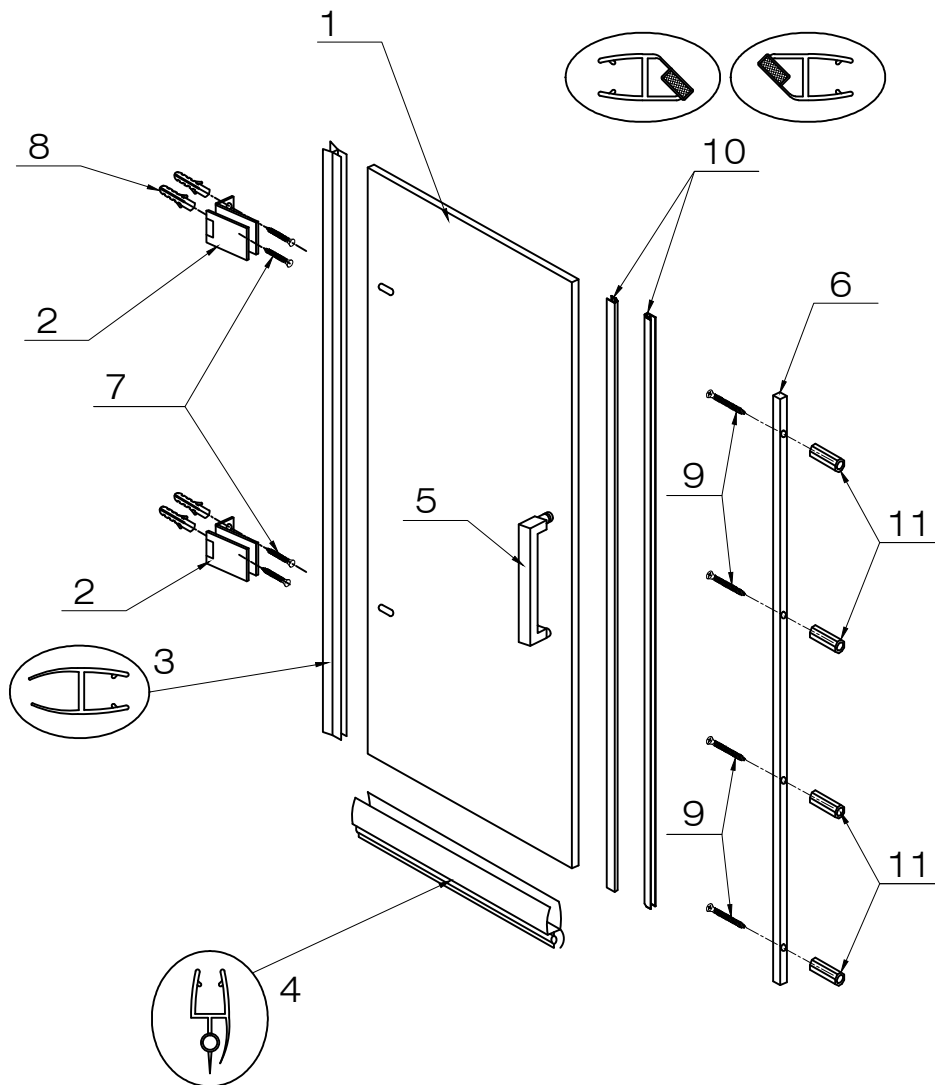

VIGO

INSTALLATION INSTRUCTIONS FOR SHOWER DOOR

PLEASE READ INSTRUCTIONS BEFORE PROCEEDING

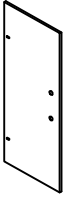

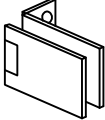

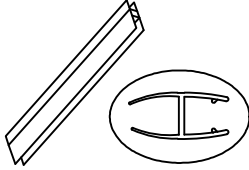

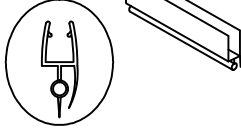

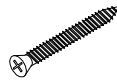

Parts List

1. Door (1pc)
2. Hinge (2pc)
3. Split wall side seal strip (1pc)
4. Door bottom seal strip (1pc + 1pc is extra)
5. Handle assembly (1pc)
6. Vertical track (1pc)
7. Hex screw 1 5/8" (4pc)
8. White plastic anchor (4pc)
9. Phillips screw 1 1/4" (4pc)
10. Door magnetic seal strip (2pc)
11. Green plastic anchor (4pc)
12. Screw covers (8pc)

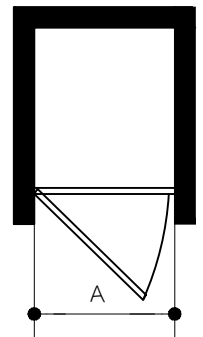

GLASS THICKNESS: 8mm / 5/16"

NOTE: INSTALLATION MUST BE DONE BY A QUALIFIED, LICENSED CONTRACTOR.

1. DOOR 97029-24 97029-26 97029-28 97029-30 	2. HINGE ASSEMBLY 98075 	3. SPLIT WALL SIDE SEAL STRIP 96022 	4. DOOR BOTTOM SEAL STRIP 96018 	5. DOOR HANDLE 98076 
6. VERTICAL TRACK 98074 	7. HEX SCREW 1 5/8" 98039 	8. WHITE PLASTIC ANCHOR 98038 	9. PHILLIPS SCREW 1 1/4" 98077ST 	10. DOOR MAGNETIC SEAL STRIP 96020 
11. GREEN PLASTIC ANCHOR 98037 	12. SCREW COVER 98040 			

MODEL	DIMENSION "A"	HEIGHT*	#1 - DOOR (97029)

26X70	26" - 26 1/2"	70 5/8"	24 1/4" X 70"
28X70	28" - 28 1/2"	70 5/8"	26 1/4" X 70"
30X70	30" - 30 1/2"	70 5/8"	28 1/4" X 70"

⊗ Product lines may change, contact your Vigo representative at 1-866-591-7792 or visit our website at www.vigoindustries.com for the most up to date product line information.

WARNING

WE STRONGLY RECOMMEND THAT A LICENSED PROFESSIONAL INSTALL THIS SHOWER CABIN AND INCLUDE THE ASSISTANCE OF A SECOND PERSON TO INSTALL THE DOOR UNIT.

INSTALLATION OF THE SHOWER DOORS BY AN INEXPERIENCED PERSON MAY RESULT IN GLASS BREAKAGE AND, CONSEQUENTLY, CAUSE PERSONAL INJURY OR DEATH.

- Handle fragile items with care to prevent injury or material damage.
- Glass on panels and doors is tempered glass and must never be cut to prevent personal injury.
- Always rest glass on a level surface

BEFORE STARTING

Compare items on your invoice with what you have received. Carefully review the Parts List on page 2. If any items are missing contact Vigo Industries at 1-866-591-7792. Please check our website at www.vigoindustries.com for additional information or instructional videos.

REQUIRED TOOLS

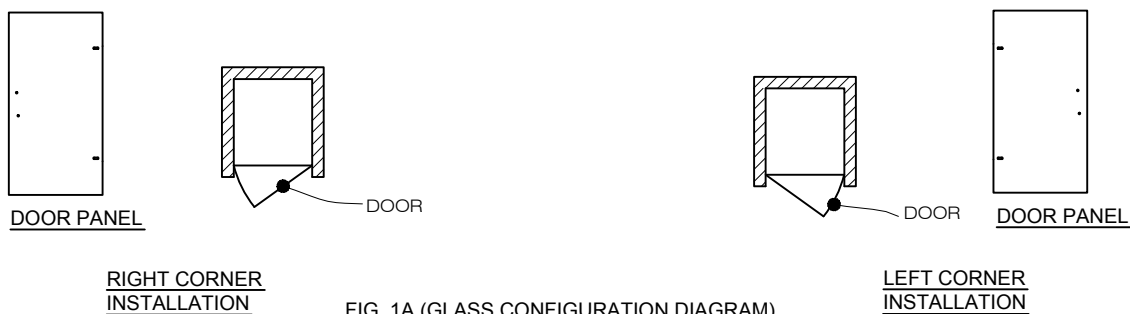

- Square and/or Phillips #1 and #2 screwdriver
- Flat head screwdriver
- Electric drill plus 1/8", 5/16", 1/4" and 3/16" drill bits (depending on wall)
- Level
- Measuring tape
- Pencil (non-permanent)
- Clear silicone caulking
- Utility knife
- Shims (not provided)

IMPORTANT

- Fiberglass, acrylic or sheetrock construction might not be sufficiently strong enough to support the shower door enclosure. You should use the wood framing from behind the face edge of the stall to provide a secure mounting to the door. Apply a bead of silicone between the walls and base of the stall.
- For optimum performance, you should install the shower door perfectly level on a level surface.
- When installing use heavy duty gloves.
- FOR THE MATTE GLASS MODELS: Oil secretions from skin will leave transparent spots on the matte side of the glass. Use a degreasing, non-abrasive cleaner to remove these secretions. The same will happen if you get silicone on the matte glass. Use a silicone remover to remove these stains.

IMPORTANT:

THE CLEAR GLASS MODEL HAS A REVERSIBLE DOOR AND CAN BE INSTALLED TO THE RIGHT OR LEFT SIDE.
(SEE CONFIGURATION DIAGRAM BELOW)

MODEL VG6072

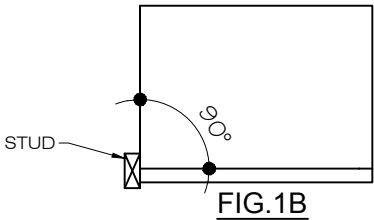

PREPARATION STEPS TO FOLLOW BEFORE INSTALLATION

1. Remove the plastic layer from the base border (if needed). Do NOT remove the plastic layer off the plastic platform of the base/tub.
2. Properly apply silicone to the wall and base joints.
3. Measure your opening to determine if your unit will fit properly. See the chart below to determine the dimensions.

MODEL	OPENING DIMENSION
24X70	24" - 24 1/2"
26X70	26" - 26 1/2"
28X70	28" - 28 1/2"
30X70	30" - 30 1/2"

IMPORTANT

- Ensure that there is sufficient structural support behind the shower wall to hold the weight of the shower door. If there is insufficient support, then reinforce the shower walls with wooden studs prior to shower door installation. [SEE FIG.1B]

CAUTION

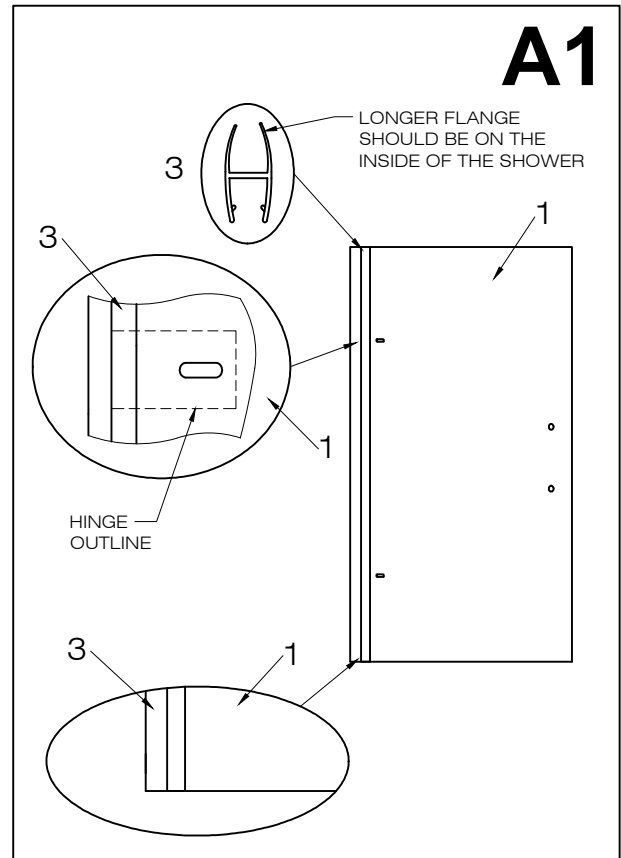

- GASKETS NEED TO BE IN BETWEEN ALL GLASS AND METAL CONTACT. FAILURE TO DO SO CAN LEAD TO BREAKAGE AND POTENTIAL BODILY HARM.

INSTALLATION STEPS

A. INSTALLING THE SPLIT WALL SIDE SEAL STRIP

1. Clean all glass panel edges receiving seal strips with rubbing alcohol. Cut and install the seal strip (#3) according to the seal strip diagram, making sure that the longer of the flanges is on the inside of the shower.

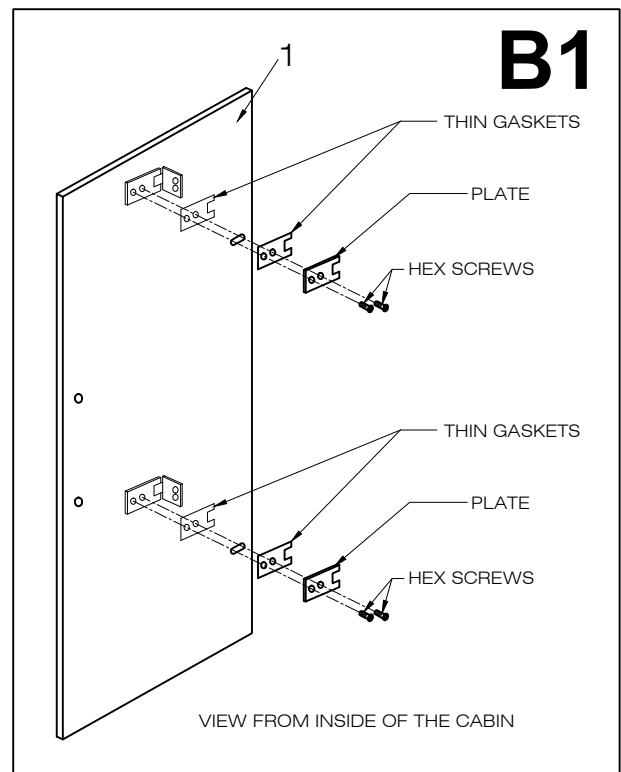

NOTE: If the seal strips are not flat, use a hair dryer to apply minimal heat and press the seal strip back into position.

B. HINGE INSTALLATION

1. Clean the glass surface where the hinges (#2) are to be installed with rubbing alcohol. Position hinges on the door glass panel (#1). Place gaskets on each side of the door glass panel. Screw the hinges to the door glass panel with the hex key (supplied).

⚠ There is a 1/2" adjustment in the glass holes where the hinges are installed. You may need to adjust your hinges more than once to close your unit opening properly.

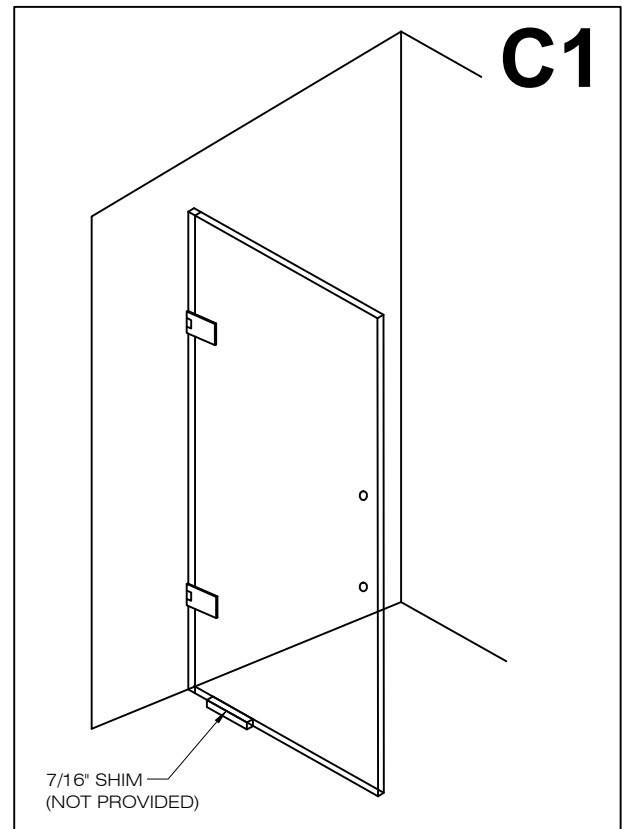

C. INSTALLING THE DOOR

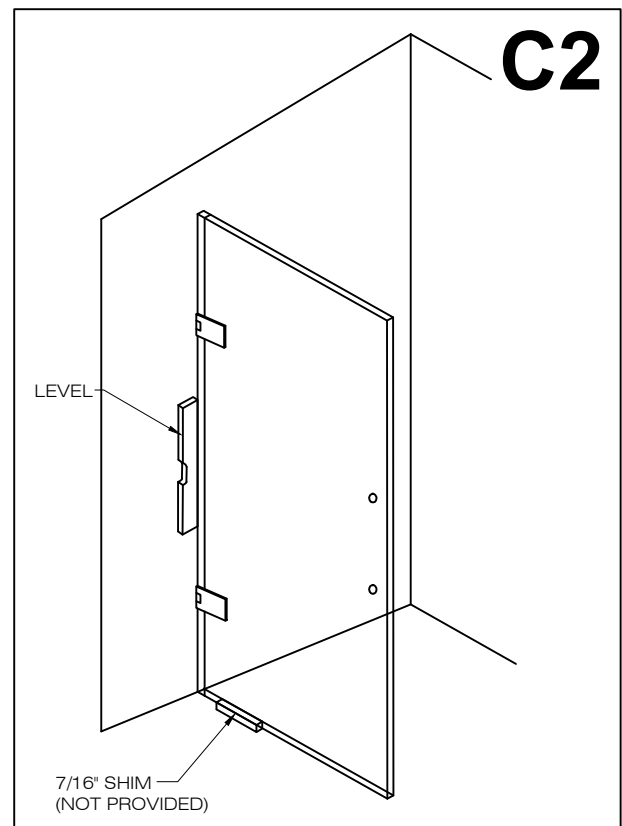

WARNING

DOOR PANEL INSTALLATION REQUIRES TWO OR MORE PEOPLE TO ASSIST

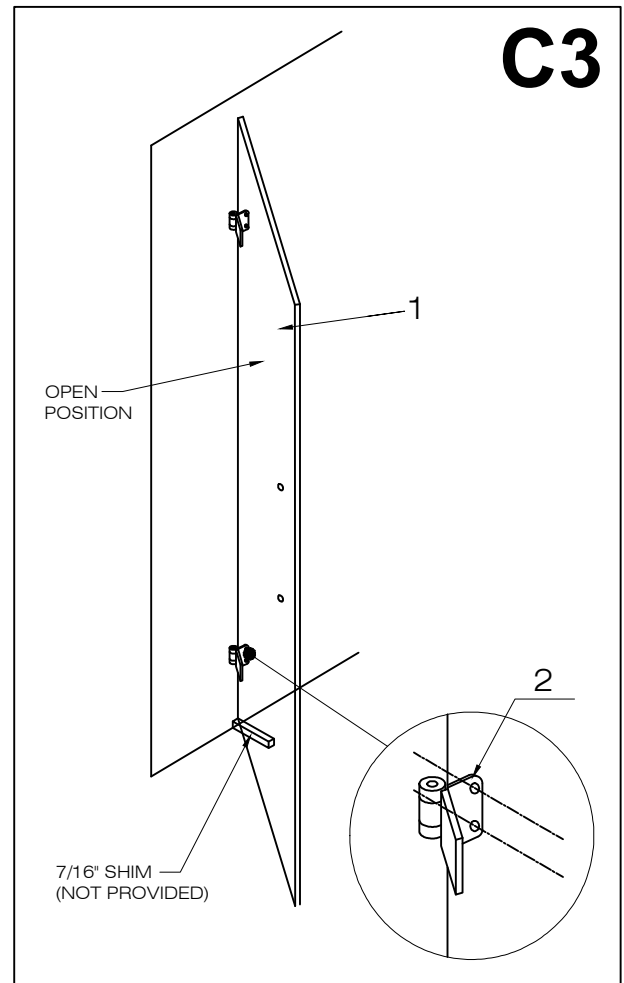

1. Place the door (#1) on the shims raising the door up 7/16" to accommodate the bottom door seal strip.

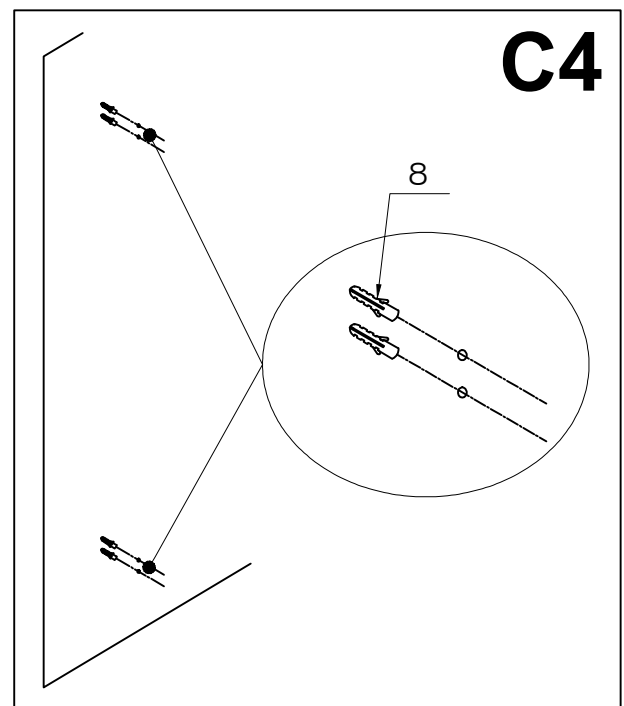

2. Align the door correctly using a level.

3. Hold the door in the open position and mark two (2) holes on the wall for the mounting screws for each hinge.

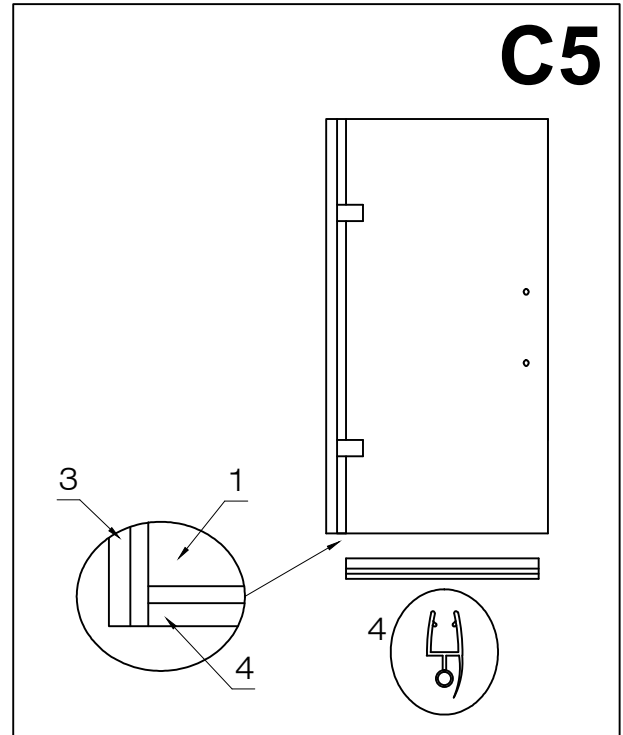

4. Remove the door and drill holes into the wall where marked. Place plastic anchors (#8) inside the holes. **⚠ Not necessary if installing into studs. Studs are the preferred means of installation, anchors can pull out of the wall causing property damage and bodily harm.**

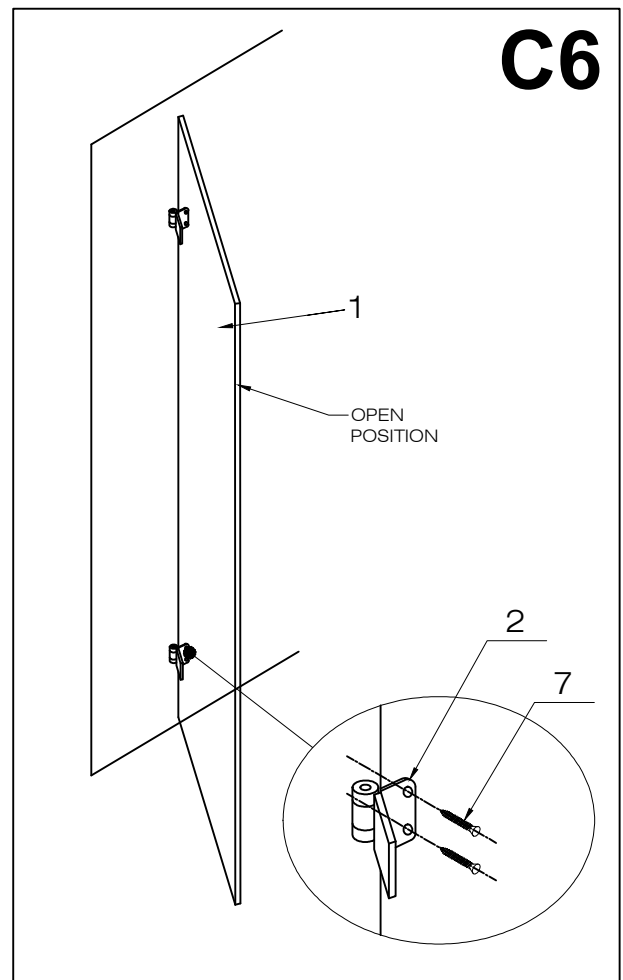

5. Clean the door glass panel (#1) edges where the door bottom seal strip (#4) is to be installed with rubbing alcohol. The door bottom seal strip (#4) will have to be fit and cut to the proper size. Verify that the lip of the seal strip faces toward the inside of the shower cabin before seal strip installation. Install the seal strip according to the diagram.

NOTE: If the seal strips are not flat, use a hair dryer to apply minimal heat and press the seal strip back into position.

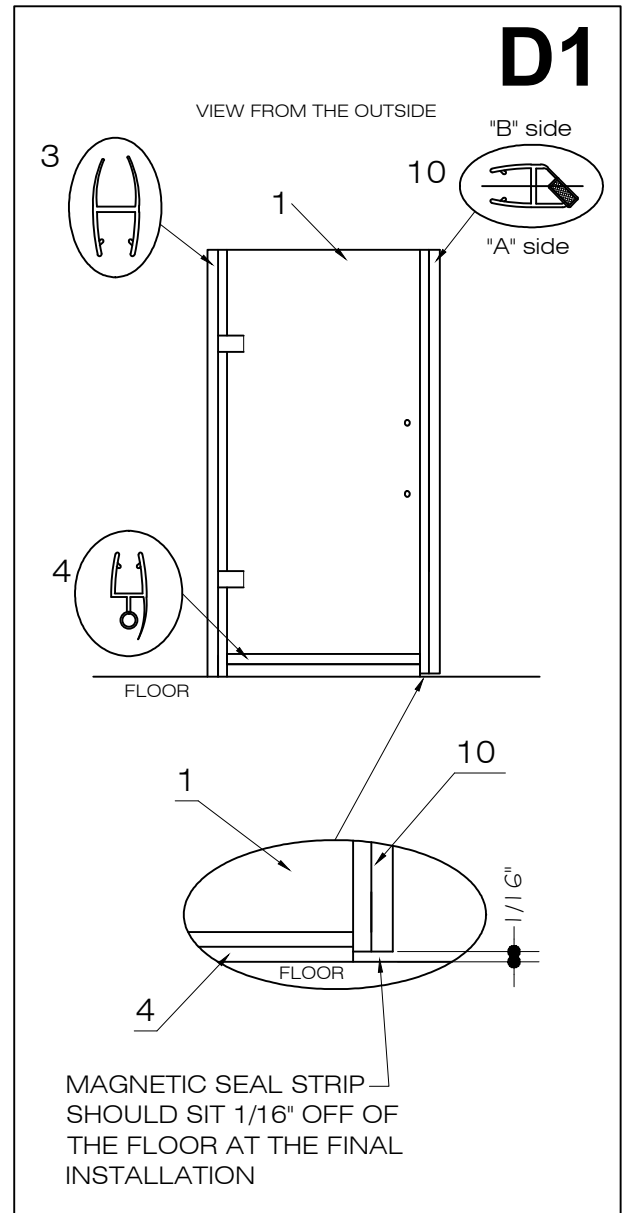

6. Replace the door (#1) back into place in the open position. Screw the door securely to the wall with 1 5/8" screws (#7). **⚠ One installer will need to hold the door in place while the other installer screws the hinges to the wall. Make sure not to rest the bottom door seal strip on the curb.**

D. INSTALLING THE MAGNETIC SIDE SEAL STRIP

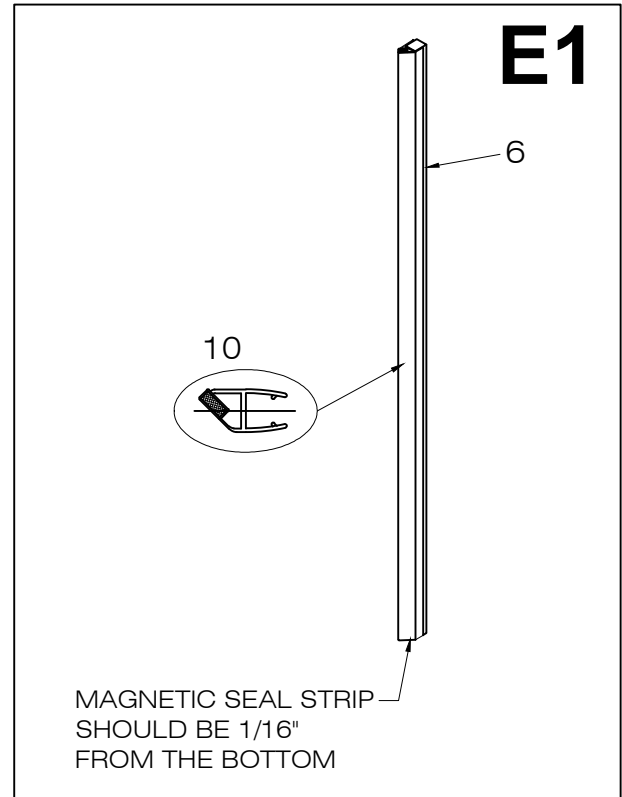

1. Clean all glass panel edges receiving seal strips with rubbing alcohol. Install the seal strip (#10) according to seal strip diagram. The seal strip should rest 1/16" off of the floor. Be aware that the door magnetic seal strip (#10) should have the "A" side facing out.

NOTE: If the seal strips are not flat, use a hair dryer to apply minimal heat and press the seal strip back into position.

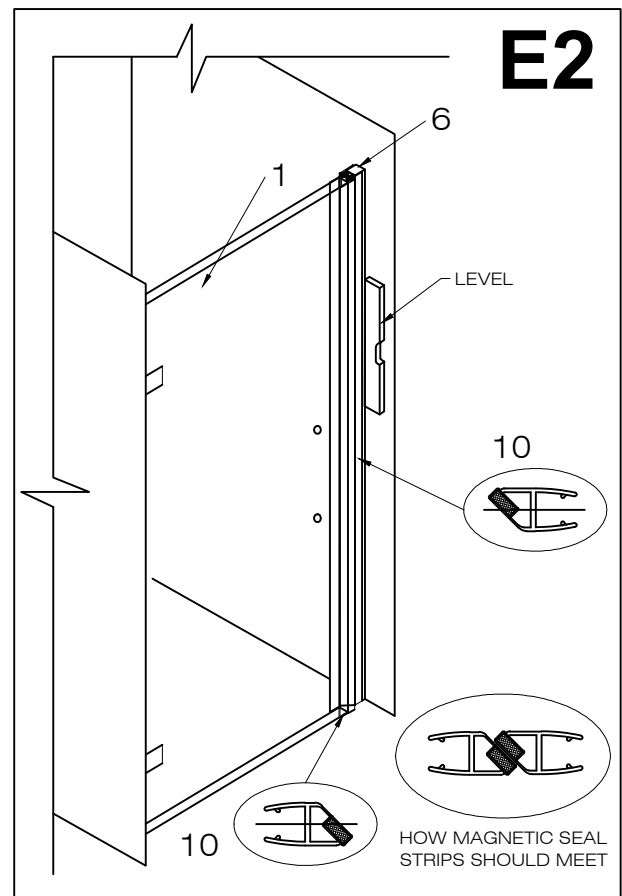

E. VERTICAL TRACK INSTALLATION

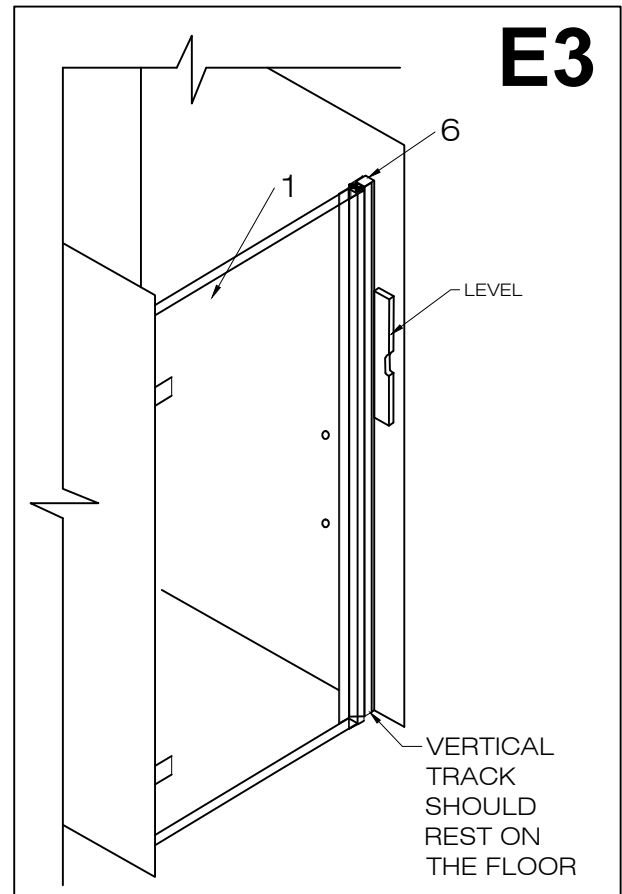

1. Install the door magnetic seal strip (#10) to the vertical track (#6) leaving a 1/16" gap at the bottom. [SEE FIG.6] The vertical track (#6) and the door magnetic seal strip (#10) are the same length.

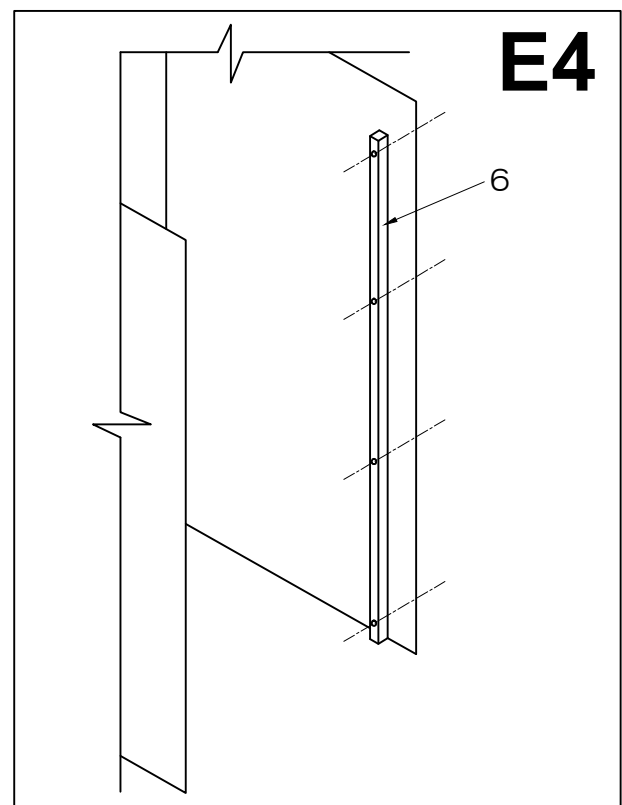

2. Attach the door magnetic seal strips (#10) to each other and then close the door, making sure the door is on a level plain, keeping the walls and opening at a perfect 90° angle.

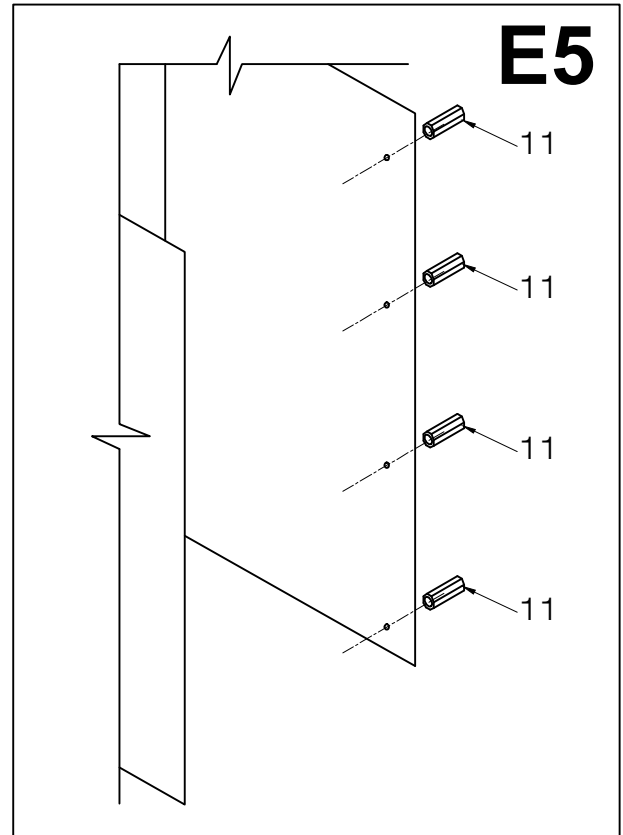

3. Mark the wall on both sides of the vertical track (#6). The vertical track should be installed with the bottom resting on the floor

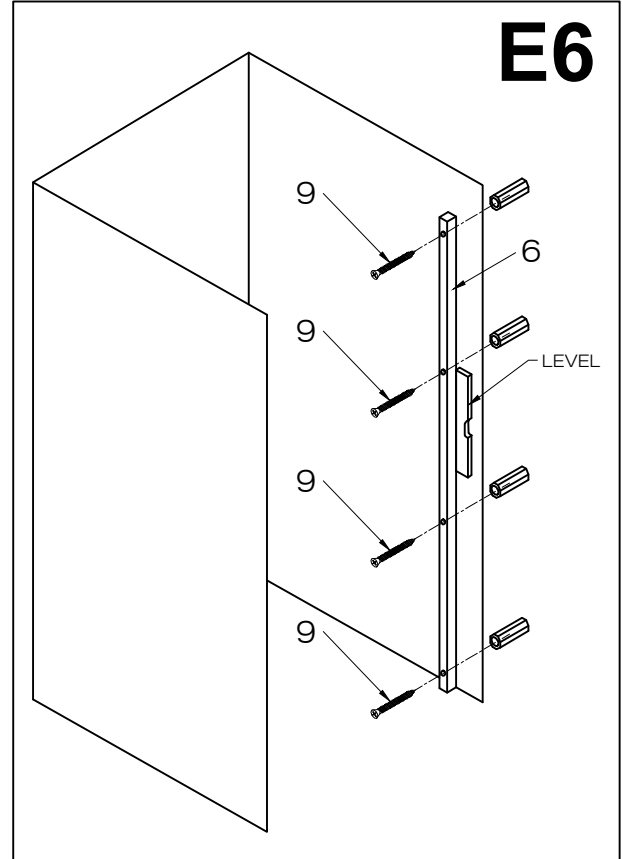

4. Remove the magnetic seal strip (#10) from the vertical track (#6). Hold the vertical track up to the wall where you previously marked and mark the wall through the holes in the vertical track (#6) for installation.

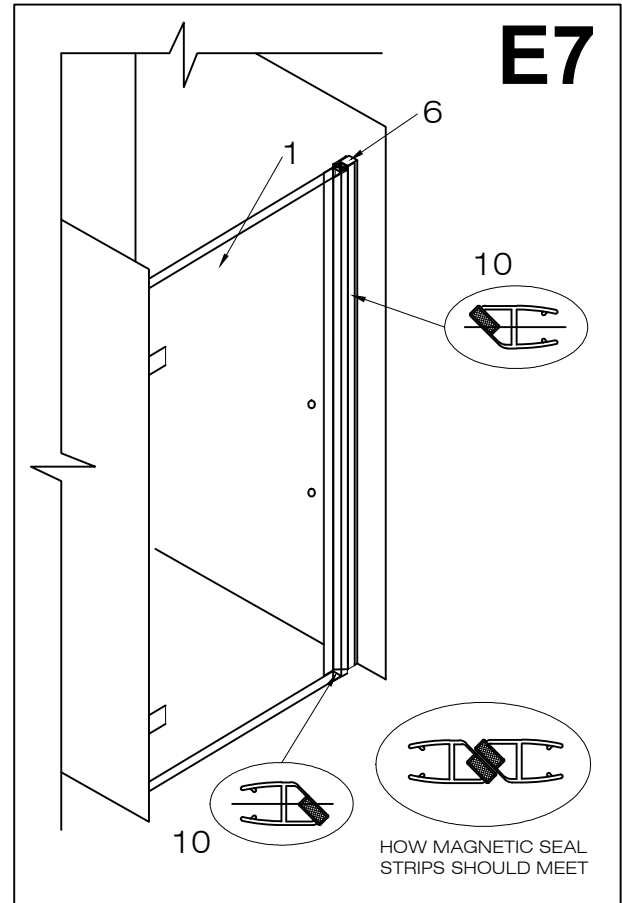

5. Remove the vertical track, pre-drill and sink plastic anchors (#11) into the wall. **⚠ Not necessary if installing into studs. Studs are the preferred means of installation, anchors can pull out of the wall causing property damage and bodily harm.**

6. Drill the vertical track (#6) to the wall with the 1 1/4" phillips screws (#9), making sure it is level and true.

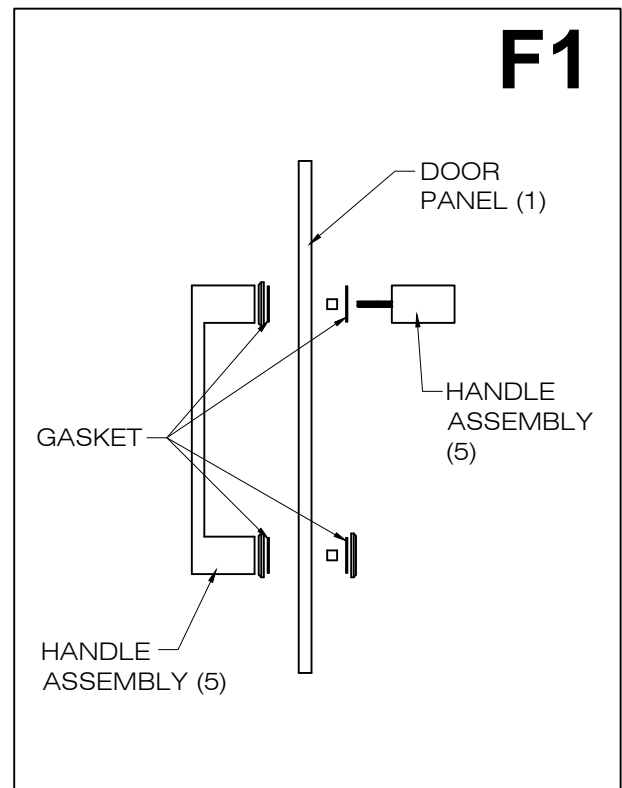

7. Install the magnetic seal strip (#10) back onto the vertical track (#6), making sure that it complements the door magnetic seal strip.

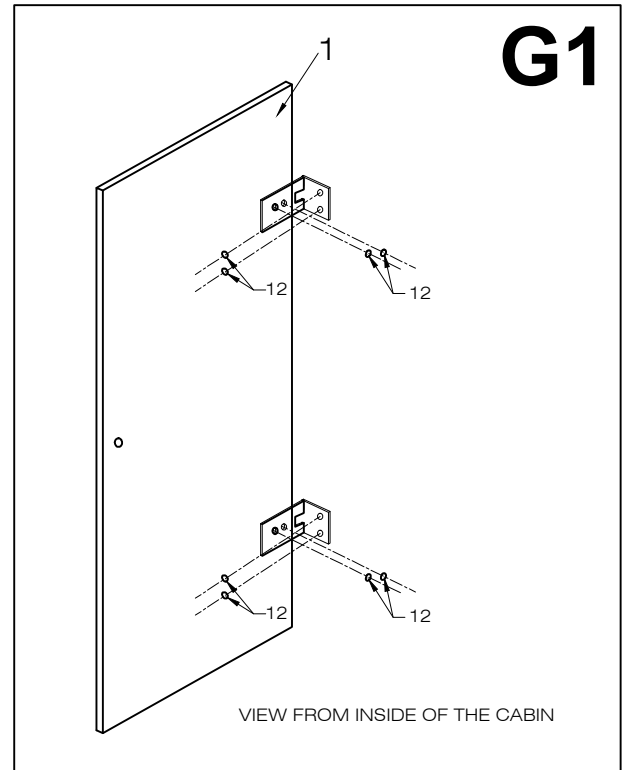

F. HANDLE INSTALLATION

1. Unscrew the handle holders from the handle assembly (#5). Place the handle to the position on the door. Place plastic washers (supplied) on each side of the door. Tighten the handle nuts from inside the shower.

G. INSTALLING COVERS

1. Install screw covers (#12) to the hinges.

⚠ IMPORTANT

- WAIT 24 HOURS BEFORE USING SHOWER
- DO NOT ALLOW WATER TO DIRECTLY HIT DOOR SEAL STRIPS.

CLEANING INSTRUCTIONS FOR THE SHOWER CABIN

1. Use a mild liquid household cleaner to keep metal surfaces bright and clean. Rinse well and dry with a soft, clean cloth.
2. Remove dust with a soft, damp cloth.
3. Use a standard household window cleaner to clean the glass panels.
4. A water beading treatment, similar to what you would use on an automobile windshield, can be used on the inside of the glass to keep it looking brand new.
5. Use rubbing alcohol to clean and remove grease, oil, paint and ink.
6. Should you accidentally scratch or stain your shower enclosure, use a liquid automobile polish to remove.

⚠ IMPORTANT

1. DO NOT use abrasive cleaners, scrapers, metal brushes or any items that could scratch or dull the surface.
2. DO NOT allow surface to come in contact with acetone (nail polish remover), dry cleaning solution, lacquer thinner, gasoline or other similar products.

REGULAR CARE AND MAINTENANCE OF YOUR VIGO SHOWER ENCLOSURE

Your home is a moving entity, shifting and settling over time. Vigo understands this and has designed their shower enclosures with this in mind. It is the responsibility of the homeowner or end user to maintain the integrity of their newly installed enclosure, using the integrated adjustability features. In order to keep your shower enclosure in optimal working condition, Vigo recommends regularly inspecting your enclosure and tightening any hardware that may have loosened during use. This simple step will insure optimal results from your Vigo shower enclosure for many years to come.
