EL2284 ASSEMBLY INSTRUCTIONS (English)

INSTALLATION & OPERATION INSTRUCTIONS TOOLS & MATERIALS REQUIRED READ & SAVE

 Adjustable Wrench □ • Wire Cuttersa • Wiring Supplies

Screwdriver

CAUTION

Prior to assembly, refer to ELECTRICAL CINNECTIONS section. If you do not have electrical wiring experience, refer to a do-it-yourself wiring handbook or have your fixture installed by a qualified licensed electrician.

GENERAL

- Be sure to read these instructions and review the diagrams thoroughly before
- beginning.
- Electrical connections must be in accordance with local codes, ordinances, or the National Electric Code. If you are unfamiliar with methods of installing electrical
- wiring, secure the services of a qualified licensed electrician.
- or by removing appropriate fuse at fuse box. Turning the power off at the light switch Before starting the installation, disconnect the power by turning off the circuit breaker
- UNPACK THE FIXTURE

is not sufficient to prevent electrical shock.

Mounting Hardware Package

Check the contents of the wire connector. You should receive:

- Unassembled Fixture

NOTE: First turn off electricity. PREPARE THE FIXTURE

- If replacing an existing fixture, disconnect and remove old fixture. Expose the supply wiring from wire connector.
- If your fixture is supplied with two machine screws, thread the long machine screws into the opposite side of the anchors. While supporting the fixture, make electrical
- connections.

FINAL ASSEMBLY

- Spread electrical splices so brown wires are on one side of wire connector and blue wires on the other.
- top cap to allow access to bulbs. Install light bulbs (not provided) and cover assembly. Some models employ a twist off
- CAUTION: Refer to the relamping gtl label located near lamp holder for

Glass

- recommended maximum wattage. Do not exceed recommended wattage.
- Use weather resistant caulk to seal around top and side perimeter of fixture back plate. Leave bottom uncaulked to allow for condensation evaporation.
- Restore electrical power.
