

INSTALLATION INSTRUCTIONS

TOOLS REQUIRED

2

Tape Measure, Pencil, Utility Knife, Scissors, Straight Edge

1

Unbox planks and let them sit in room of install for 10 days to acclimate. Just like you would do with a wood floor.

Clean your wall. Damp paper towels will do the trick.

Cut the AIM strips to length and apply them to your wall every 10 inches.

Apply the planks to your wall. We recommend starting from the bottom and working your way up.

Pro Tip

Use a credit card to create a small gap between the planks. The planks will expand and fill the gaps in a week.

Trim the planks to fit your wall. Score both sides of the plank with a utility knife and snap.
