

Benolti User Care Guide for Bidet

Thank you for choosing our bidet for your personal hygiene needs. To ensure the optimal performance and longevity of your bidet, please follow these important user care instructions:

1. **Avoid Harsh Chemicals:** Refrain from using harsh chemical cleaners or solvents on your bidet. These can damage the surface and components of the bidet. Instead, use mild, non-abrasive cleaners or natural alternatives.
2. **Use Baking Soda:** For cleaning purposes, we recommend using baking soda mixed with water. Baking soda is effective at removing stains and odors without causing any harm to the bidet's materials. Simply mix baking soda with water to form a paste, apply it to the surface of the bidet, and gently scrub before rinsing thoroughly.
3. **Do Not Sit on the Lid:** The bidet lid is designed for cover and protection purposes only. Sitting or placing heavy objects on the lid may cause damage to the bidet mechanism and void the warranty. Please use the bidet as intended and avoid putting excessive weight on the lid.
4. **Regular Maintenance:** Perform regular maintenance checks on your bidet to ensure all components are functioning correctly. Inspect hoses, connections, and controls periodically for any signs of wear or damage. Promptly address any issues to prevent further problems.
5. **Follow Manufacturer's Instructions:** Refer to the user manual provided with your bidet for specific care and maintenance guidelines. Following the manufacturer's instructions will help optimize the performance and longevity of your bidet.

By following these user care instructions, you can enjoy the benefits of your bidet for years to come. If you have any questions or concerns, please don't hesitate to contact our customer support team for assistance. Thank you for choosing our bidet.
