## **Upholstery Care Instruction**

---

Rotate cushions and pillows weekly to distribute wear. Vacuum upholstery weekly using the upholstery attachment and crevice tool of your vacuum to remove loose particles.

Periodic cleaning by a professional upholstery cleaning service is the only recommended cleaning method for your upholstery, including furniture base beneath slipcovers. Annual cleaning is suggested, but this may vary depending on use.

To prevent possible “bleeding” of ink onto fabric, do not leave newspapers or other printed materials lying on upholstery. Take special care when spraying household chemicals and commercial products near upholstery.

Avoid placing your furniture in direct sunlight. All fabric and leather will fade over time.

Applying noncommercial scented fabric fresheners, neutralizers and fabric protectors is never recommended.

### **Spills and Spot Cleaning**

In some cases, spot cleaning can cause a ring or fading. It is best to have the entire piece or cushion casing cleaned by a professional upholstery cleaning service to ensure uniform results. If you decide to spot clean on your own, check the standard cleaning code (below) to determine the correct type of product to use.

Always blot—never rub—spills immediately with a clean, absorbent white cloth. Blot from the outside to the middle of the affected area to prevent rings.
