

# 7 Piece Fold & Store Oval Table & 6 Chairs with Cushions and Table Cover

*How To Use & Enjoy!*

Also visit our website at [www.outdoorinteriors.com](http://www.outdoorinteriors.com) for a how to video on set up and storage!

**Step 1**

Open box and remove cushions, cover and bags.

**Step 2**

Always use (2) people when opening and closing table.

**CAUTION:** Do not lift sides too abruptly and beyond 1" upwards to release catch.

**Step 3**

Lift up both curved sides of the table at an angle just slightly above the center section of the table. Approximately 1/2" - 3/4". This releases a locking mechanism built into the center of your table.

**Step 4**

While holding up the table just slightly above the horizontal table position as explained in step 3, begin rotating the table top counter clockwise around until you feel and/or hear the table lock in position.

**Step 5**

After finalizing the table top rotation please note that the larger part of the oval table top when open will rest over the table base and chair storage area.

**Step 6**

Your table is further engineered with sliding brackets that should be pulled out for additional table strength and support.

**Step 7**

Continue sliding out the brackets outwards until you see or feel the extension supports lock into the table ends...

**Step 8**

...until the bracket becomes flush with the stationary wood supports underneath both ends of the oval table top.

**Step 9**

**CAUTION:** When table is FULLY OPEN, we recommend removing the chairs from under the table before moving or wheeling the table around. Failure to do so may cause unnecessary stress on the support base of the table.

Please enjoy your beautiful table set from Outdoor Interiors. Don't forget to oil your eucalyptus wood table and chairs twice per year to keep it good & healthy. *Enjoy!*
