

Let's Yeego

Who are we?

Yeego, the perfect fusion of fashion and innovation. We are a factory seller specializing in wine cooler and beverage refrigerator.

We pursue fashionable design and innovative technology to create a space full of personality and modernity for you.

Whether you are a connoisseur who loves wine tasting, or a host looking to add unique charm to family gatherings, Yeego products can meet your needs.

Choose Yeego, let us create a fashionable, innovative and wonderful life experience together.

A large, light blue, stylized watermark of the word "Yeego" is positioned at the bottom of the page. The letters are thick and rounded, with a modern, sans-serif feel. The 'Y' is particularly large and bold, and the 'e's have a unique, elongated shape. The overall design is clean and minimalist, matching the brand's aesthetic.

Yeego 12 Inch Dual Zone Wine Fridge

YEG-WD12 Product Technical Illustration

Overall Width (in.) A	11.6"
Overall Depth (in.) B	22.4" (24.1" with handle installed)
Overall Height (in.) C	34.25"

Significant Feature

17 Wine Bottle Storage Capacity

Enjoy this wine refrigerator with plenty of space to store all your favorite drinks with 5 movable wooden shelves.

Upgraded Cooling System Beverage Fridge

The wine cooler maintains temperatures between 40°F and 65°F, keeping both red and white wines at the perfect serving temperature, and you can customize that you need.

Freestanding and Built-in Installation

Design with stainless steel frame and double tempered glass door, and blue-color interior led lighting. The stylish look decorates your kitchen, living room, office or bar area.

Double Tempered Glass Door Beverage Fridge

Double-layer tempered glass door improves temperature stability, reduces condensation, and keeps your drinks perfect with low electricity consumption.

Yeego 12 Inch Dual Zone Wine Fridge

More Easy-To-Use Features

- 17 Wine Bottles Storage Capacity
- Advanced Cooling System Wine Cooler
- Wine Cooler With Inside Digital Temperature Control Panel
- Double-Layer Tempered Glass Door Wine Cooler
- Interior Blue LED Lighting
- Reversible Hinges Wine Cooler

Key Product Features

- Freestanding
- Full Removable Shelves
- Whisper Quiet & Low Vibration Function
- Double Tempered Glass & Reversible Door (Open Left or Right)
- Digital Led Temperature Panel
- Soft Blue Internal Led Lighting

Power Requirements

Voltage: 115V/60Hz
Rated Current: 0.9A

General Appliance Information

Please read all installation details and instructions before use.

Note

Before connecting the beverage refrigerator to the power source for the first time, please keep it upright at least 24-36 hours. It will reduce the possibility of a malfunction in the cooling system from handling during transportation. It is suggested to put the beverage refrigerator in a cool and ventilated place, which will greatly improve the cooling performance.

IMPORTANT SAFETY RULES

Before the appliance is used, it must be properly positioned and installed as described in this manual, so read the manual carefully. To reduce the risk of fire, electrical shock or injury when using the appliance, please follow basic precautions, including the following:

* DANGER

Plug into a grounded 3-prong outlet, do not remove grounding prong, do not use an adapter, and do not use an extension cord.

Replace all panels before operating.

It is recommended that a separate circuit, serving only your appliance be provided. Use receptacles that cannot be turned off by a switch or pull chain.

Never clean appliance parts with flammable fluids. These fumes can create a fire hazard or explosion. And do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance. The fumes can create a fire hazard or explosion.

* WARNING

To ensure safe moving and installation of the appliance, it is recommended to have two or more individuals assist. Failure to do so can result in back or other injuries.

To ensure proper ventilation for your appliance, the front of the unit must be completely unobstructed. Choose a well-ventilated area with temperatures above 60°F (16°C) and below 90°F (32°C). This unit must be installed in an area protected from the element, such as wind, rain, waterspray or drips.

The appliance should not be located next to ovens, grills or other sources of high heat.

The appliance must be installed with all electrical, water and drain connections in accordance with state and local codes. Standard electrical supply (115 V AC only, 60 Hz), should be properly grounded in accordance with the National Electrical Code and local codes and ordinances as required.

Before proceeding with cleaning and maintenance operations, make sure the power line of the unit is disconnected.

Do not connect or disconnect the electric plug when your hands are wet.

Unplug the appliance or disconnect power before cleaning or servicing. Failure to do so can result in electrical shock or death.

Do not attempt to repair or replace any part of your appliance unless it is specifically recommended in this material. All other servicing should be referred to a qualified technician.

Do not kink or pinch the power supply cord of appliance.

The fuse (or circuit breaker) size should be 15 amperes.

It is important for the appliance to be leveled in order to work properly. You may need to make several adjustments to level it.

Never allow children to operate, play with or crawl inside the appliance.

Do not use solvent-based cleaning agents or abrasives on the interior. These cleaners may damage or discolour the interior.

Do not use this product for other than its intended purpose.

FLAMMABLE REFRIGERANT GAS

For your safety, observe the following recommendations.

This appliance contains a small quantity of R600a refrigerant which is environmentally friendly, but flammable. It does not damage the ozone layer, nor does it increase the greenhouse effect.

During transportation and installation, ensure that the tubing of the refrigerant circuit is not damaged.

Avoid using or manipulating sharp objects near by the appliances.

Leaking refrigerant can ignite and may damage the eyes.

In the event any damage does occur, avoid exposure to open fires and any device which creates a spark. Disconnect the appliance from the mains power.

Thoroughly ventilate the room in which the appliance is located for several minutes.

Notify Customer Service for necessary action and advice.

The room for installing the appliance must be at least 1 cubic metre per 8 grams of refrigerant. The refrigerant quantity contained in this appliance is listed above in grams, it is also noted on the Rating Plate of the appliance.

* DANGER

Risk of fire or explosion. Flammable refrigerant used.

DO NOT use mechanical devices to defrost refrigerator.

DO NOT puncture refrigerant tubing.

Flammable refrigerants have a risk of fire or explosion and should only be repaired by trained service personnel.

* WARNING

The use of flammable refrigerants is a fire or explosion hazard. Please refer to the Service Manual for guidance before attempting to service this product. All safety precautions must be followed.

Risk of fire or explosion: Dispose of property in accordance with federal or local regulations.

Risk of fire or explosion due to puncturing of the refrigerant tubing. Follow handling instructions carefully.

To prevent a child from being entrapped, keep out of reach of children and not in the vicinity of the cooler.

IMPORTANT SAFETY RULES

To reduce the risk of fire, electrical shock, or injury when using your appliance, follow these basic precautions:

* WARNING

Read all instructions before using the wine cooler.

DANGER or WARNING: Risk of child entrapment. Child entrapment and suffocation are not problems of the past. Junked or abandoned appliances are still dangerous.

Before you throw away your old wine cellar, take off the door but leave the shelves in place so that children may not easily climb inside.

Never allow children to operate, play with, or crawl inside the appliance.

Never clean appliance parts with flammable fluids. The fumes can create a fire hazard or explosion.

Do not store or use gasoline or any other flammable vapours and liquids in the vicinity of this or any other appliance. The fumes can create a fire hazard or explosion.

Technical Data:

Voltage:	115V/60Hz
Rated Current:	0.9A
Capacity :	17 standard 750ml wine bottles
Temperature Range:	40°F-65°F (5°C-18°C)
Net Weight:	48 lbs
Gross Weight:	57 lbs
Unit Dimension:	11.6"W x 22.4"D x 34.25"H
Packaging Dimension:	15"W x 25.6"D x 37.4"H
Refrigerant:	R600a

INSTALLATION INSTRUCTIONS

Before Using the Wine Cooler

Remove the exterior and interior packing

Check to be sure you have all of the following parts:

5 Wooden Shelves with Wooden Front*

Keys

Stainless Steel Handle

Instruction Manual

L-Shaped Screwdriver

Before connecting the wine cooler to the power source, let it stand upright for approximately 24~36 hours. It will reduce the possibility of a malfunction in the cooling system from handling during transportation.

Clean the interior surface with lukewarm water using a soft cloth.

Install the handle on the left side of the door.

Installation of the Wine Cooler

This appliance is designed to be for freestanding installation or built-in (fully recessed). Place your product on a floor that is strong enough to support it when it is fully loaded. To level the product, adjust the front leveling legs at the bottom of the unit.

Please locate the product away from direct sunlight and sources of heat (stove, heater, radiator, etc.). Due to direct sunlight may affect the acrylic coating and heat sources may increase electrical consumption. Extreme cold ambient temperatures may also cause the unit not to perform properly. Don't install in a location where the temperature will fall below 60°F (16°C). Avoid locating the unit in a moist area.

For best performance, it is recommended that you install the appliance in a location with an ambient temperature between 72°-78°F. If the ambient temperature is above or below recommended temperatures, the performance of the unit may be affected.

Built-in Cabinet Instructions

For built-in installation, leave a (6 mm) space on each side and at the top of the wine cellar to ensure proper air circulation to cool the compressor and condenser. Also, be sure to not obstruct the front exhaust vent with any objects as this may affect the unit from performing properly.

Cabinet Opening Dimensions

- Minimum Width: 11.72" (29.8 cm)
- Minimum Depth: 22.65" (57.6 cm)
- Minimum Height: 34.37" (87.3 cm)

Electrical Connection

* NOTE

Improper use of the grounded plug can result in the risk of electrical shock. If the power cord is damaged, have it replaced by an authorized service center.

This appliance should be properly grounded for your safety. The power cord of this appliance is equipped with a three-prong plug which mates with standard three prong wall outlets to minimize the possibility of electrical shock.

* NOTE

Plug the unit into an exclusive, properly installed-grounded wall outlet. Do not under any circumstances cut or remove the third (ground) prong from the power cord. For personal safety, this appliance must be properly grounded. And any questions concerning power and/or grounding should be directed toward a certified electrician or an authorized service center.

The appliance should always be plugged into its own individual electrical outlet which has a voltage rating that matches the rating label on the appliance. This provides the best performance and also prevent overloading house wiring circuits that could cause a fire hazard from overheated. Never unplug the appliance by pulling the power cord. Always grip the plug firmly and pull straight out from the receptacle. Repair or replace immediately all power cords that have become frayed or otherwise damaged. Do not use a cord that shows cracks or abrasion damage along its length or at either end. When moving the appliance, be careful not to damage the power cord.

This appliance requires a standard 115/120 Volt AC ~/60Hz electrical ground outlet with three-prong. Have the wall outlet and circuit checked by a qualified electrician to make sure the outlet is properly grounded. When a standard 2-prong wall outlet is encountered, it is your responsibility and obligation to have it replaced with a properly grounded 3-prong wall outlet. The cord should be secured behind the appliance and not left exposed or dangling to prevent accidental injury.

Power Bar with Surge Protection (Recommended)

Most electrical appliances use a series of electric control boards to operate. These boards are very susceptible to power surges and could be damaged or destroyed.

If the appliance is going to be used in an area or if your city / country is prone to power surges / outages; it is suggested that you use a power surge protector for all electrical devices / appliances you use. The surge protector that you select must have a surge block high enough to protect the appliance it is connected to.

If you have any questions regarding the type and size of surge protector, you need to contact a licensed electrician in your area.

INSTALLATION INSTRUCTIONS

Extension Cord

Because of potential safety hazards under certain conditions, it is strongly recommended that you should not use an extension cord with this appliance. However, if you must use an extension cord it is absolutely necessary that it be a UL/CUL-Listed, 3-wire grounding type appliance extension cord having a grounding type plug and outlet and that the electrical rating of the cord be 115 volts and at least 10 amperes.

Installing the Handle

This wine cooler includes a stainless steel handle. To install the handle please follow the below instructions:

Step 1: Remove the door gasket where the handle should be installed on the left side of the door, as shown below. You won't need tool since the gasket can be removed by hand. You can start with a corner if you can't remove it from the center.

Step 2: Use the two handle screws, lock washer and flat washer included in the bag containing the instruction manual and insert them into the side of the door from the inside to the outside.

Step 3: Align the holes in the handle with the screws, tighten the screws by using the screwdriver until the base of the handle is at the level of the door and that the handle is tight but not too tight to damage the assembly.

Step 4: Replace the gasket the door in place.

Note: The Handle Screws 4) are packed with other accessories in the instruction manual bag please insert them into the door before installing the handle.

- ① Gasket
- ② Flat washer
- ③ Lock washer
- ④ Screw
- ⑤ Handle
- ⑥ Doorframe

Installing Reversible Door

1. Please remove the bottom hinge holder ② by unscrewing the two lock screws. Be careful to hold the glass door firmly after removing the screws. **Please check Figure 1**
2. Gently pull down to remove the glass door from the right top hinge and place it on a padded surface to avoid the risk of damage
3. Using a flat-head screwdriver, gently pry up the decorative hinge cover plate from the top left of the unit and the round black decorative cover caps on the upper left side corner of the inside cabinet frame. Use them to cover the screw holes from the right-hand side.
4. Move the top hinge from the right-hand side to and use the upper right hinge that is equipped along with the manual in the cabinet to install on the left side of cabinet by removing the screws ④. **Please check Figure 2** And change the location of the handle to the left side as Figure 3.
5. Relocate the door to the left-hand side of cabinet by placing the door hinge holes into the hinge, then screw the bottom hinge assembly with the lower hinge fixer 64 onto the left designated position and tighten after the door is leveled. **Please check Figure 4**

Figure 1

Figure 3

Figure 3

Figure 4

OPERATING YOUR WINE COOLER

It is recommended you install the beverage refrigerator in a place where the ambient temperature is between 19°C-24°C (66°F-75°F). If the ambient temperature is above or below recommended temperatures, the performance of the unit may be affected. For example, placing your unit in extreme cold or hot conditions may cause interior temperatures to fluctuate. The range of 34°F-54°F(1°C-12°C) may not be reached.

Control Panel

① ON/OFF:

To turn on or off the unit, press on the ON/OFF buttons at the same time for 5 seconds.

INSIDE LIGHTING:

To turn on or off the lighting, press on the light button.

TEMPERATURE DISPLAY:

Press on the light button for 5 seconds. The display will change and show you your preference(°C or °F).

[+] BUTTON: To increase the temperature by 1°C or 1°F

[-] BUTTON: To decrease the temperature by 1 °C or 1 °F

* NOTE

If the unit is unplugged, if the power is lost, or turned off, you must wait 3 to 5 minutes before restarting the unit. If you attempt to restart before this time delay, the wine cellar will not start.

When you use the beverage refrigerator for the first time or restart the beverage refrigerator after having been shut off for a long time, there could be a few degrees variance between the temperature you select and the one indicated on the LED readout. This is normal and it is due to the length of the activation time. Once the wine cellar is running for a few hours everything will be back to normal.

Setting the Temperature

The temperature range of wine cooler(YEG-WD12) is 40°F-65°F(5°C-18°C). The temperature will increase by 1°C or 1°F if you touch UP once, or the temperature will decrease by 1°C or 1°F if you touch DOWN once. The unit has two separate temperature zones. The temperature of both zones can be set between 40°F and 65°F(5°C and 18°C).The LOWER temperature zone is ideal for storing white and red wine. The UPPER temperature zone is suitable for storing champagne and white wine. The temperature in the lower zone must be set either the same as or higher than the temperature in the upper zone. For optimal performance, the temperatures in the two zones should differ by at least 4°C.

OPERATING YOUR WINE COOLER

* NOTE

This product is designed for storing and cooling wine. It is not intended for storage of perishable foods.

Large Storage Capacity

While bottles may vary in size and dimension, approximately 17 traditional Bordeaux 750ml bottles can be stored in the wine cooler. You can place 3 bottles on each shelf and 2 standard bottles in the bottom of the cabinet.

POSSIBLE CAUSE

Wine Conservation	°C	°F
sparkling wines	5-8	40-47
Rose wines	10-11	49-51
Dry/white wines	9-14	48-57
Red wines	15-22	58-72

About total 17 bottles

Shelves

This appliance is equipped with 3 pcs of glass shelves with holes on the glass for better air circulation to cool your drinks evenly.

To prevent damaging the door gasket, make sure to have the door all the way opened when pulling shelves out of the product. For easy access to the drinks, you must pull the shelves approximately 1/3 out of the cabinet.

Moving the Wine Cooler

1. Remove all items
2. Tape down securely all loose items (shelves) inside your appliance.
3. Turn the adjustable leg up to the base to avoid damage.
4. Tape the door shut
5. Be sure the appliance stays secure in the upright position during transportation. If you absolutely need to transport the cellar horizontally, transport the cellar on its back (door on top).
6. Protect outside of appliance with a blanket, or similar item.

Large Storage Capacity

Your unit is provided with a lock and key. The keys are located inside the plastic bag that contains the Instruction Manual. Insert the key into the lock and turn it counterclockwise to unlock the door. To lock the door do the reverse operation making sure metal pin is engaged completely. Remove the key and place it in a secure place for safekeeping.

OPERATING YOUR WINE COOLER

Cleaning the Wine Cooler

Turn off the power, unplug the appliance, and remove all items including shelves. Wash the inside surfaces with a warm water and baking soda solution. The solution should be about 2 tablespoons of baking soda to 1 cup of water. Wash the shelves with a mild detergent solution. Wring excess water out of the sponge or cloth when cleaning area of the controls, or any electrical parts. Wash the outside cabinet with warm water and mild liquid detergent. Rinse well and wipe dry with a clean soft cloth.

* NOTE

Please do not disconnect the unit during operation to avoid you exposing yourself to risk of electric shock or personal injury.

Charcoal Filtration System

Your beverage refrigerator is equipped with an active charcoal filtration system to ensure air purity and to maintain an odour free cabinet for the storage of your wines. The filter is located at the bottom of the rear panel inside your cellar. Keep in mind, that this filter should be changed every 12 months.

Remove the bottles of wine stored on the two shelves in front of the filter.

Remove the shelves and set aside to be replaced once you have changed the filter

Hold the filter and turn it at 45 degrees in the counter-clockwise direction and then pull it out.

Remove the existing filter and replace with a new one.

Put the new filter into the hole and then turn the filter at 45 degrees in clockwise direction.

Automatic Defrosting

The unit defrost automatically. The evaporator behind the rear wall of the unit defrosts automatically. The condensate collects in the drainage channel behind the rear wall of the unit, and flows through the drainage hole into the drip tray by the compressor where it evaporates.

Power Failure

Most power failures are corrected within a few hours and should not affect the temperature of your appliance if you minimize the number of times the door is opened. If the power is going to be off for a longer period of time, you need to take the proper steps to protect your contents.

Energy Saving Tips

The beverage refrigerator should be located in the coolest area of the room, away from heat producing appliances, and out of the direct sunlight. Ensure that the unit has proper clearances on all sides for proper ventilation. Never cover any air vents.

Only open the cooler door when necessary. Opening the door frequently will affect internal temperature.

TROUBLESHOOTING GUIDE

You can solve many common beverage refrigerator problems easily, saving you the cost of a possible service call. Please try the suggestions below to see if you can solve the problem before emailing the service team.

PROBLEM	POSSIBLE CAUSE	SOLUTION
Product does not operate.	Not plugged in. The appliance is turned off. The circuit breaker tripped or a blown fuse.	Plug the unit. Turn on the unit. Check the breaker and/or fuses.
Product is not cold enough.	External environment may require a higher setting. The door is opened too often. The door is not closed completely. The door gasket does not seal properly.	Check the temperature control setting. Close the door properly. Check the door gasket.
The compressor turns on and off frequently.	The room temperature is hotter than normal. A large amount of contents has been added to the cellar. The door is opened too often. The door is not closed completely. The temperature control is not set correctly. The door gasket does not seal properly.	Close the door properly. Check the door gasket.
The fans turn on and off frequently.	In order to circulate the air and maintain the set temperature inside the cabinet the fans must cycle on and off even when the compressor is off. The fans will cycle ON and OFF while the compressor is off approximately every 20 seconds, this is called "Semi-speed status*". This cycle is normal and meant both to circulate the air as well as ensure the continued operational status of the fans. If the fan stops completely and does not complete this cycle the fan is non-operational.	
Fan is always running	This is simply a function of the cooling system. The lower the setting, the more the fan will run. If the room is very warm, the cooler will run more. The unit has been designed to run continuously when operating at the lower temperatures.	
The light does not work.	Not plugged in. The circuit breaker tripped or a blown fuse. The light button is "OFF".	Plug the unit. Check the breaker and/or fuses.

TROUBLESHOOTING GUIDE

PROBLEM	POSSIBLE CAUSE	SOLUTION
Vibrations.	The cellar does not be leveled The bottles are vibrating. There is an object under the Cellar.	Check to ensure that the Cellar is level. Make sure the bottles don't touch each others. Remove the object.
The product seems to make too much noise.	The unit is not level.	Level the cellar. The rattling noise may come from the flow of the refrigerant, which is normal. As each cycle ends, you may hear gurgling sounds caused by the flow of refrigerant in your cellar. Contraction and expansion of the inside walls may cause popping and crackling noises.
Display shows EL OR EH	The air temperature sensor in the corresponding temperature zone has failed	Call service center
Fan is always running	In some instances, this is normal the light may flash when the automatic defrost function starts to work. Set temperature is higher than inner temperature.	Adjust temperature to resolve
Frost appears in cabinet (on back)	Either too much humidity or too low of temperature inside cabinet.	Unplug cellar and allow to manually defrost. Reconnect when ice has melted. If problem persists, contact for service instructions.
The door will not close properly.	The Cellar is not level. The door was reversed and not properly installed. The gasket is dirty. The shelves are out of position.	Level the cellar. Close the door properly. Clean the door gasket. Place the shelves properly.

If the above problems occur and cannot be solved by following the instructions, please contact us by email: service@yeegolife.com Please describe your problems in detail in words, pictures or videos, and we will answer for you as soon as we receive your feedback.

1 YEAR WARRANTY PARTS

For a year (12 months) from the delivery by the original owner, we would provide accessories to replace any part of the unit which proves to be defective in material or workmanship, with installation video or online guide. You could also contact us by email to get a solution.

During this period we will provide all parts necessary to correct such defects free of charge, so long as the unit has been installed and operated in accordance with the written instructions in this manual.

3 YEAR WARRANTY COMPRESSOR

For the 2nd through the 3rd year from date of original delivery, we will provide a replacement compressor free of charge due to a failure.

You are responsible for the service labour and freight charges. Cost to move the wine cellar to the servicers' shop and back to the user's home, as may be required, are the user's responsibility.

WHAT IS NOT COVERED

Damage due to such things as accident, misuse, abuse, mishandling, neglect, acts of God, fires, earthquakes, floods, high winds, government, war, riot or labour troubles, strikes, lockouts, delay of carrier, or any cause beyond the control of the Seller whether similar or dissimilar to the foregoing.

Content losses due to spoilage.

Incidental or consequential damages.

Parts and labour costs for the following will not be considered as warranty:

- ° Door springs, and/or frames.
- ° Inner door panels, door rails and/or door supports.
- ° Light bulbs and/or plastic housing.
- ° Plastic cabinet liners.

Purchaser understands and acknowledges that the goods purchased are wine cellars, which house wines. Purchaser assumes all risk of using this unit, including risk of spoilage, humidity variations, temperature variations, leaks, fire, water damage, mold, mildew, dryness, and similar perils that might occur.

Punctured evaporator that voids the warranty on the complete sealed system.

Repairs performed by unauthorized servicers.

Service calls that do not involve defects in material or workmanship such as customer education, door reversal, or proper installation.

Service calls that are related to external problems, such as abuse, misuse,

inadequate electrical power, accidents, fire, floods, or acts of God.

Replacement of house fuses or resetting circuit breakers.

Failure of the product if it is used for other than its intended purpose.

This warranty does not apply outside Canada or the Continental USA.

CUSTOMER SERVICE

Read This Guide Carefully.

It is intended to help you operate and maintain your new wine cellar properly. Keep it handy to answer your questions.

Keep proof of original purchase date (such as your sales slip) with this guide to establish the warranty period.

Save time and money. Before you call for service, check the Troubleshooting Guide. It lists causes of minor operating problems that you can correct yourself.
