Faucet Installation

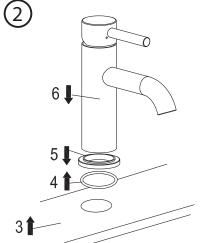

Preparation: Turn off water supplies and drain water lines. Clean installation site and remove any debris from the area.

Step 1: Connect Supply Hoses:

A. Screw supply hoses and into base of faucet body.

B. Screw in steel post into base of faucet body.

Faucet Installation

Step 2: Secure Spout Body in place:

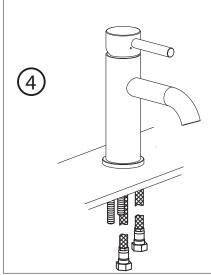

- C. Insert black rubber ring into the metal ring.
- D. Insert the metal ring in between bottom of faucet body and sink deck hole.
- E. Insert faucet body through sink deck hole.

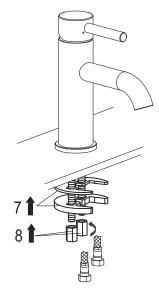

Step 3: Insert Rubber and Metal washers:

F. Slide black rubber washer and metal washer over steel post, so that they fit around supply hoses.

G. Insert nut onto steel post.

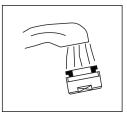

Step 4: Securing all connections:

- H. Connect supply hoses to main water supply.
- I. Ensure all connections are tight to avoid potential leakage.

Test Faucet Installation

- A. Move handle into "OFF" position.
- **B.** Turn on water supplies. Check connections for leaks.
- C. Remove aerator and let both hot and cold water run for one minute. This will help clean any debris that might otherwise clog the system. Replace aerator.
- **D.** Operate handle up and down, in cold and hot positions, to flush water lines thoroughly

Maintenance:

Simply rinse the surface with clear water or mild liquid detergents (if necessary) Dry the faucet with a clean soft cotton cloth. Do not use any cleaning agents containing acids, polish abrasives, or harsh cleaners.
