

CHALLENGE

Write a program that

- 1. reads in a number of test cases
- 2. for each test case, reads in a number of test cases
- 3. for each test case, reads in a number of test cases
- 4. for each test case, reads in a number of test cases

Write a program that

- 1. reads in a number of test cases
- 2. for each test case, reads in a number of test cases
- 3. for each test case, reads in a number of test cases
- 4. for each test case, reads in a number of test cases

CHALLENGE

- 1. reads in a number of test cases
- 2. for each test case, reads in a number of test cases
- 3. for each test case, reads in a number of test cases
- 4. for each test case, reads in a number of test cases

Write a program that

- 1. reads in a number of test cases
- 2. for each test case, reads in a number of test cases
- 3. for each test case, reads in a number of test cases
- 4. for each test case, reads in a number of test cases

LINGSTON

Node	Value
1	10
2	20
3	30
4	40
5	50
6	60
7	70
8	80
9	90
10	100

Write a program that

- 1. reads in a number of test cases
- 2. for each test case, reads in a number of test cases
- 3. for each test case, reads in a number of test cases
- 4. for each test case, reads in a number of test cases
