

## TRADITIONAL CONSTRUCTION

*Enjoy the warmth and beauty of exterior wood shutters. Our wood shutters are hand crafted from the most popular wood species and can be clear coated, stained, or painted.*

*Each joint is joined with two wood dowels and glued with polyurethane exterior glue. A 3 ½" treated screw is then inserted, countersunk then plugged and sanded smooth.*

## AUTHENTIC MATERIALS

*We use only the finest species for construction of beautiful wood shutters. Available in Pine, Cedar, Redwood, and Mahogany. For painted panel shutters, we offer them available with Extria panels to give you the look of an authentic painted wood shutter, but with the durability of advanced, maintenance free, materials.*

# BOARD-N-BATTEN SHUTTERS

*In its simplest form, the Board-n-Batten shutter has been rumored to be the first style of shutter invented. The vertical members are referred to as the boards and the horizontal members are referred to as the battens. This classic style is perfect for ranch style homes or homes that want to reflect historical significance and simplicity.*

# COMBINATION SHUTTERS

The Combination Shutter originated in the New Orleans area with its unique combination of both louver and raised panel. It offers the beauty of both styles, yet offers a second glance appeal to traditional styles. You can mix and match your styles with a variety of louver and raised panel combinations to make your own unique look.

# FLAT PANEL SHUTTERS

Flat panel shutters are inspired after the Shaker design where clean lines and simplicity define style. These shutters are perfect for Arts & Crafts or Craftsman style homes. Like all our wood shutters, these shutters are hand crafted and assembled for authenticity and architectural correctness.

# BAHAMA SHUTTERS

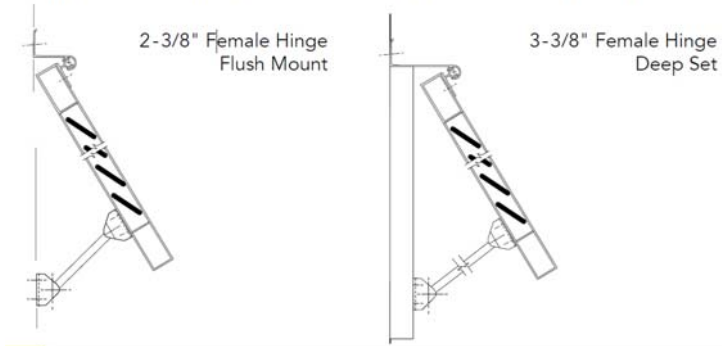

Inspired by the traditional Caribbean design, Bahama shutters provide a bold accent with smart functionality. Attached to the exterior with a top hinge, the shutters can swing out at the bottom, letting breezes and sunlight bathe the space. When the shutters are closed, open louvers reduce the sun's hot rays and enhance privacy while still allowing air to circulate.
