

BECAUSE THE SHOWER IS EVERYTHING

Use & Care – Product Care & Cleaning

To assure a long lasting finish wipe down your shower enclosure with a towel after each use. Never use a scouring agent to clean the hardware or the glass. For maximum protection, Basco doors should be treated with AquaGlideXP at the factory before you receive it. Units damaged by improper cleaning are not covered under Basco's limited lifetime warranty. With minimum maintenance and proper cleaning your bath enclosure will provide you with years of beautiful service.

AquaGlideXP Home Kit

If you did not have the opportunity to purchase the factory-applied AquaGlide XP protection, consider purchasing the Shower & Bath Glass Protection Treatment Kit. This easy step-by-step process will provide added protection to your shower enclosure. This innovative coating increases the sheen and luster of the glass while reducing spotting, soap scum and mineral deposits. If you selected to have AquaGlideXP applied at the factory when you purchased your enclosure, you may also utilize the home kit to revitalize the original coating extending its protective qualities indefinitely. *Please note that our AquaGlideXP ten-year warranty applies only to units with a factory applied coating.*

Maintain AquaGlideXP Spray Cleaner

This 16oz bottle is the same formula as the small Maintain spray cleaner in the AquaGlideXP kit. Regardless if you had AquaGlassXP applied at the factory, or opted to use the at home kit, this spray cleaner will enhance the durability and performance of the protection when used for deeper cleaning. Most homeowners find that in addition to spraying their doors with water and towel drying daily, using maintain spray cleaner every one to two weeks keeps their treated doors looking spot free and like new.

Clerét

When used after showering, Clerét is a superior glass cleaning tool that prevents soap build-up and water spots.
