How to Install MR16 Bulb and Refrax™ Pendant:

Pendants may be mounted to monorail systems, monopoints or line voltage track by coupling to the quick connect transformer adapter. Attached to the socket is a cable that may be cut on site during installation to any length (see instructions below).

1 Position the pendant grid against the socket and secure in place by screwing the metal collar onto the socket.

2 Plug bulb carefully but completely into socket. Use only an MR16 glass covered lamp bulb.

How to Shorten the Cable:

7 Screw quick connect into quick connect adapter until it seats. If you adjust the orientation of the pendant, be careful not to loosen the connection.

8 Hang A chains first, following the crystal map. Hook the connectors into the pinholes located towards the outside of the grid. See illustration to the left.

9 Hang B chains by sliding the octagon with an open hole onto the pin. Chains B will nest into position between A chains. See illustration to the left.
