

## KNOWLEDGE

## QUESTION

1. What is the function of the nucleus?

2. What is the function of the chloroplast?

3. What is the function of the mitochondria?

4. What is the function of the endoplasmic reticulum?

5. What is the function of the Golgi apparatus?

6. What is the function of the vacuole?

7. What is the function of the lysosomes?

8. What is the function of the ribosomes?

9. What is the function of the cytoplasm?

10. What is the function of the cell wall?

11. What is the function of the cell membrane?

12. What is the function of the DNA?

13. What is the function of the nucleolus?

14. What is the function of the thylakoids?

15. What is the function of the cristae?

16. What is the function of the flattened sacs?

17. What is the function of the large, clear, oval structure?

18. What is the function of the small, clear, oval structures?

19. What is the function of the small dots?

20. What is the function of the fluid-filled space?

21. What is the function of the outermost layer?

22. What is the function of the inner boundary?

23. What is the function of the large, dark, oval structure?

24. What is the function of the green, bean-shaped structures?
