- ISVEA Fireclay Kitchen Sink
- Sink Strainer
- Metal Grid (depending on the variation)
- Cutting Board (depending on the variation)
- Paper Cut-out Template
- Installation Instructions
- User's Guide and Warranty

Prior to commencing this installation, please carefully review the instructions below.

CAUTION

- Handle with care and exercise caution to prevent personal injury or product damage, as the product may break, chip, or cause harm.
- Heavy item: team lift the sink with two or more individuals and use proper tools/materials, such as safety gloves, goggles and boots, during the installation of the product in order to avoid personal injury.
- ISVEA does not have any liability for any damage to the countertop, sink, faucets, floors, walls, tiles or personal injury due to the improper installation.

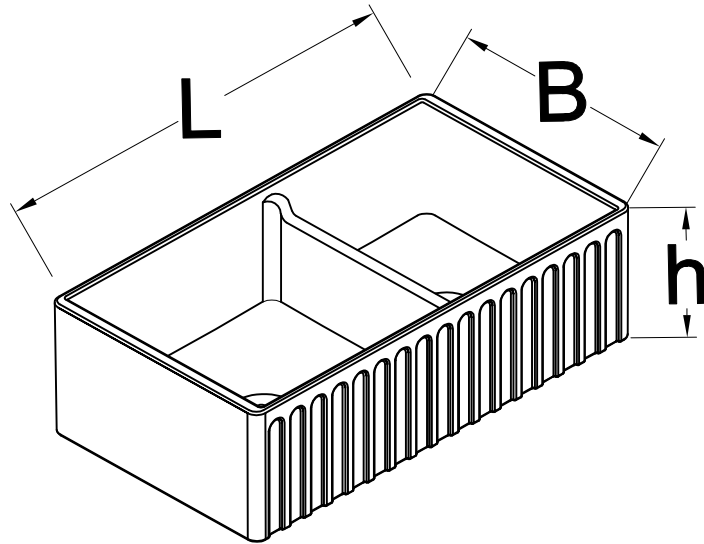

BEFORE THE INSTALLATION

- Prior to commencing this installation, please carefully review these instructions.
- Comply with any applicable local plumbing and building codes.
- Turn off both the hot and cold water supplies. Examine the drain, supply tubing, and faucets for any issues, and replace them if needed.
- Before starting, unbox the new sink and carefully check for any damage. Keep the sink in its protective carton until you're prepared to proceed with the installation.
- ISVEA strongly suggests that all sink installations be carried out by skilled professionals. We recommend consulting a professional if you are unfamiliar with installing kitchen fixtures and plumbing. ISVEA does not accept any liability for damage to countertop, sink, faucets, or personal injury due to improper installations.
- Fireclay Kitchen Sink is a heavy product so for a secure and damage-free installation, it is recommended to have at least two individuals install the sink.
- Ensure a proper installation by having a custom countertop, sink base cabinet, and supporting frame in place. Installer must provide all load bearing supports in accordance with installation instructions supplied with kitchen sink. Load bearing supports not included must be provided separately.
- To install this product, custom cabinetry is required. ISVEA advises engaging an experienced cabinet maker to construct a new cabinet or make necessary modifications to existing ones for this product.
- For safety purposes and to prevent any potential sink damage, we strongly advise building a support frame undertake sink that is capable of bearing a minimum load of 300 pounds. This load estimate accommodates the weight of an average fireclay sink filled to capacity and allows for additional stress caused by a waste disposer.
- Because this sink offers various installation possibilities, you have the option to utilize procedures different from those outlined in these instructions, in that case ISVEA does not have any liability.
- A cut-out template is provided in the box in order to make the installation process easier. However, due to the manufacturing process of fireclay products there may be slight differences in size of the actual sink, so ISVEA strongly recommends that the installer review the measurements of the the actual sink itself and check with the template before starting the installation process. Failing to do so, ISVEA does not have any liability.
- The cabinet and load bearing support frame displayed in these instructions are general examples and may not reflect the specific design or structure.
- The instructions provided are based on the most current product information available at the time of publication. ISVEA retains the right to make design revisions to their products without prior notice.
