

AR7707

Ø 7.99"

Ø 4.69"

19.09"

A technical line drawing of a mechanical assembly. On the left is a circular component with a diameter of 4.69 inches. It features a central vertical slot with three rectangular cutouts and two small circular holes at the top and bottom. A horizontal shaft extends from the center of this component to the right. The shaft has a step or change in diameter. At the end of the shaft is a larger circular component with a diameter of 7.99 inches. This larger component has a flange with two small rectangular tabs on opposite sides. A dimension line at the bottom indicates a total length of 19.09 inches from the left edge of the first component to the right edge of the second component.
