Hello,

Thank you for purchasing from our beautiful Lautan range.

All our LAUTAN furniture has been treated with UV resistant teak oil at the factory.

To maintain its original appearance, it is essential to treat your new furniture with UV resistant protection. If left untreated, the wood will weather to a silvery gray and will likely split. Lautan has tried and tested the '**BEHR Premium** - Transparent Waterproofing Wood Finish' coating. The use of this product will maintain the integrity and appearance of the wood. This product has to be used for Warranty Validation.

We advise coating your new Lautan furniture every 18 months with this product. 'BEHR Premium - Transparent Waterproofing Wood Finish' can easily be found in most hardware stores and is available in clear or tinted finishes.

Please note: Small cracks and fissures may develop with changes in humidity and temperature. This is a natural, uncontrollable characteristic of solid wood furniture and is completely normal.

Although the fabric used in our product is UV and weather resistant, there is no fabric completely resistant to the damages of prolonged periods of sun exposure. For the longevity of this product, we highly recommend you remove all furnishings, these being the cushions and/or canopy to prevent fading and sun damage. This is also relevant in storm or wild weather. We also recommend removing all furnishings when your furniture is not in use for long periods.

There are products available on the market which can be used regularly to protect the fabric, such as '**Scotchgard TM** - Water & Sun Shield'.

Enjoy your beautiful Lautan furniture and please don't hesitate to contact us with any further questions or inquiries you may have.

Kind Regards

The Team at Lautan

Warranty Details: 1 year - Wood must be coated as advised at least once a year or warranty will be void. Fabric furnishings' care instructions must be followed or warranty will be void

WATER & SUN SHIELD

10.5 oz
