

Bella Depot Retractable Ceiling Fan

Installation & Troubleshooting Manual

CAUTION

**READ INSTRUCTIONS CAREFULLY FOR
SAFE INSTALLATION AND FAN OPERATION**

SAFTY RULES

1. To reduce the risk of electric shock, turn off the electricity to the fan at the main fuse box or circuit panel before beginning.
2. All wiring must be in accordance with the local electrical codes or National Electrical Code. Electrical installation should be performed by a qualified licensed electrician.
3. To avoid personal injury, the use of gloves may be necessary while handling fan parts with sharp edges.
4. Make sure the installation site you choose allows clear space for the blades to rotate and at least seven 7 feet (2.13 meters) of clearance between the floor and the fan blade tips. The fan should be mounted so that the tips of the blades are at least thirty 18 inches (45.72 centimeters) from walls or other upright structures.
5. **WARNING:** To reduce the risk of fire, electric shock, or personal injury, mount fan only to an outlet box marked acceptable for fan support and use mounting screws provided with the outlet box. Most outlet boxes commonly used for the support of lighting fixtures are not acceptable for fan support and may need to be replaced. Consult a qualified electrician if in doubt.
6. The outlet box and ceiling support structure must be securely mounted and capable of supporting at least 45 KGs.
7. To avoid personal injury or damage to the fan and other items, be cautious when working around or cleaning the fan.
8. Do not use water or detergents when cleaning the fan or fan blades. A dry dust cloth or lightly dampened cloth will be suitable for most cleaning.
9. After making electrical connections, spliced conductors should be turned upward and pushed carefully up into the outlet box. The wires should be spread apart with the grounded conductor and the equipment-grounding conductor on one side of the outlet box.
10. Electrical diagrams are for reference only.
11. The fan is suitable for indoor use only.

TOOLS REQUIRED

BEFORE INSTALLATION

Unpack your fan and check the contents. You should have followings:

INSTALL THE FAN

Tools Required: Phillips Screwdriver, Pair of Pliers, Straight slot screwdriver, Adjustable Wrench, Step Ladder and Wire Cutters.

INSTALL THE MOUNTING BRACKET

To prevent personal injury and damage, ensure that the hanging location allows the blade a clearance of 7 feet (2.13 meters) from the floor and 18 inches (45.72 centimeters) from any wall or obstruction.

If there isn't an existing CUL listed mounting box, then read the following instructions:

1. For the concrete ceiling: Mark the location for the ceiling fan first, then drill two holes in the ceiling to aid in securing ceiling bracket with two expansion screws provided, and secure the mounting bracket to the building structure with two expansion screws provided, tighten the screws. (Fig.1)

2. For the Wood Ceiling: Mark the location for the ceiling fan first, secure the mounting bracket to the building structure with four wood screws provided. (Fig.2)

3. Refer to the Fig.3 for mounting when the ceiling is angled max. 15 degree angle.

NOTE: Hanger after the installation must be able to withstand the weight of 45 kgs or more

INSTALL THE DOWNROD

REMEMBER to turn off the power. Follow the steps below to hang your fan properly:

1. Remove the lock pin and hitch pin from downrod
2. Place downrod assembly into canopy and coupling cover, carefully feed motor wires through the downrod assembly
3. Loosen the two set screws in downrod coupling
4. Insert downrod into downrod coupling. Install coupling lock pin through coupling and downrod. Insert hitch pin into cross pin until it snaps into place. Tighten set screws in coupling. Slide coupling cover over the downrod coupling.

CHANGE DOWNROD (OPT)

The Bella Depot Ceiling Fan comes with one 5 inches standard downrod which is preassembled and attached to the hanger ball, one longer 10 inches downrod is also included for higher ceilings. If you need a different downrod length, please follow these steps:

1. Loosen the hanger ball from downrod by removing set screw.
2. Slide downrod ball off of downrod and remove pin
3. Re-install pin into extended downrod, and slide downrod ball up to the top of the downrod
4. Re-install set screw to secure ball to downrod

Securing the safety cable

A safety support cable is provided to help prevent the ceiling fan from falling, please install it as follows:

1. Attach the provided screw to the ceiling joist next to the mounting bracket and install the "J" hook.
2. While the fan assembly is still on the ground, thread the safety cable through the mounting bracket.

MOUNTING

1. Carefully lift motor assembly and place hanger ball onto hanger bracket. Rotate fan until notch on downrod ball engages the ridge on the mounting bracket. Rod should not rotate if this is done correctly.
2. Adjust the length of the safety cable, attach the safety cable from fan unit to "J" hook, Secure by looping zip tie through safety cable and "J" hook. Tighten zip tie securely.

WIRING WITH REMOTE RECEIVER

Make wiring connections from the house and the motor to the remote receiver as shown right. Connect using wire nuts (provided).

Once wiring step has been completed, slide the wired remote receiver in between the mounting bracket and the top of the downrod ball.

SECURE THE CANOPY

Raise the canopy up and align the keyholes on the bottom of the canopy with the 2 screws on the bottom of mounting bracket. Rotate the canopy until both screws from the mounting bracket drop into the slot recesses. Tighten screws securely.

INSTALL THE LIGHT KIT

1. Remove the 4 garnish nuts preassembled from the garnish screws on the base plate
2. Make wiring connections between fan motor and the light bulb assembly.
3. Attach the light pan onto the motor base plate. Align the 4 holes on the light pan with the 4 preassembled garnish bolts on the bottom of fan body, secure all screws.
4. Install bulbs to the lamp bases, and ensure they are tightened enough to the bases. (Note: Bulbs not included as default setting.)

INSTALL THE CAGE FRAME

Following the installation of the light bulb assembly, the next step will be to install the cage frame. Please follow the steps below to install the cage frame:

1. Align the four installation holes in the cage frame with the corresponding four holes in the base plate as shown in the picture on the right.
2. Attach the frame to the plate with four screws provided. Tighten the screws to make sure the cage frame and the base plate are tightly attached to each other.

Now the installation of the main parts of the ceiling fan is finished.

TROUBLESHOOTING GUIDE

If you have difficulty operating your new ceiling fan, it may be the result of incorrect assembly, installation, or wiring. In some cases, these installation errors may be mistaken for defects. If you experience any faults, please check this Trouble Shooting guide. If a problem cannot be remedied, please consult with your authorized electrician and do not attempt any electrical repairs yourself, and please feel free to contact us: support@BellaDepot.com

Before:

1. Check circuit fuses or breakers and make sure the battery is installed correctly.
2. Check line wire connections to the fan and switch wire connections in the switch housing.

CAUTION: Make sure main power is off.

Problem: Light does not work

Solution:

1. Check to see that the wire connections in the switch housing are connected.
2. Make wiring connections from the house to the light directly (don't connect the remote and the fan) to determine it's the issue of the light or not.

Problem: Fan will not start.

Solution:

1. Check line wire connections to the fan and switch wire connections in the switch housing. **CAUTION: Make sure main power is off.**
2. Make the Fan wiring connections Without the Remote & transmitter and the light, to determine it's the issue of the fan body or not.
 - a) Please don't wire the light at the bottom
 - b) Connect the Ceiling Fan Neutral Wire (White) to the Neutral Wire (White) coming through the ceiling
 - c) Connect the Ceiling Fan Live Wire (Black) to the Live wire (Black or Colored) coming through the ceiling

Then turn on the main power, check the fan works separately or not.

Problem: Fan & Light do not work / Remote control malfunction

Solution: Test the Fan and LED Lights -- Without the Remote & transmitter

In most cases, the ceiling fan & light don't work because of the wrong programming of the Remote Control, please try to connect the wiring without the Remote & transmitter:

Turn off the main power:

- Connect the wiring at the bottom for the LED Light
- Connect the Ceiling Fan Neutral Wire (White) to the Neutral Wire (White) coming through the ceiling
- Connect the Ceiling Fan Live Wire (Black AND Blue wire) to the Live wire (Black or Colored) coming through the ceiling

Then turn on the main power, if the ceiling fan and the light works, it's the issues of the remote & transmitter issues.
